

Making a Difference

An old man walking along the beach came upon a child sifting through debris left by the night's tide. Every so often, he would pick up a starfish and toss it back to the sea.

The old man asked him the purpose of his efforts.

"The tide has washed the starfish onto the beach. They will die unless I throw them back."

The old man looked around at the miles of beach.

"There are more starfish than you can ever save. You cannot make a difference."

The child bent to pick up another starfish and sent it back to the ocean. Then he looked up at the old man, smiled and replied, "I can make a difference to this one."

You make a difference!

Difference Etienne Wenger-Trayner, Beverly Wenger-Trayner, 2020-10-01 Today more people want to know how to make a meaningful difference to what they care about But for that traditional approaches to learning often fall short In this book we offer a theoretical and practical way forward We introduce the concept of social learning spaces for developing both new

capabilities and a sense of agency We provide a rich framework for focusing on the value of social learning spaces how to generate this value monitor it and learn iteratively through the process The book is a useful extension and refinement of communities of practice for those familiar with the theory For those who are not the chapters will lay out a new way to approach learning This volume is written to serve the needs of readers across fields including researchers educators and leaders in business government healthcare and international development Change Your Career: Nursing as Your New Profession Barbara Arnoldussen,2007-01-04 Change Your Career Nursing as Your New Profession includes A diagnostic test designed to show if nursing is right for you An overview of the nursing profession what options are available to you The basics to getting a nursing degree the courses and standardized tests you ll have to take How and where to search for new jobs Making your resume work for you with the skills from your previous career Profiles of real people who switched to nursing mid career **House of Commons - Health Committee: After Francis: Making A Difference - HC 657** Great Britain: Parliament: House of Commons: Health Committee,2013-09-18 The NHS needs to be an organization in which an open dialogue about care quality is part of the natural culture of the organization not a duty which only arises in cases of service failure Robert Francis made 290 recommendations in his report but in truth they boil down to just one that the culture of doing the system s business is pervasive in parts of the NHS and has to change Many who raise their concerns in the NHS at present risk serious consequences for their employment and professional status But disciplinary procedures professional conduct hearings and employment tribunals are not the proper place for honestly held concerns about patient safety and care quality to be aired constructively The NHS standard contract imposes a duty of candour on all NHS providers This is an essential principle but it is not adequately understood or applied It should mean that all providers create a culture which is routinely open both with their patients and their commissioners The same principle should apply to commissioners so that they are routinely open and accountable to local communities The Health Committee recommended this approach in 2011 and repeats that now It should be a prime role of the CQC to encourage the development of this culture within care providers and of NHS England to develop the same culture within commissioners The Health Committee will in future work closely with the Professional Standards Authority to develop the accountability process for professional regulators in healthcare *Making a Difference with Children and Families* Alison Prowle,Angela Hodgkins,2020-06-02 This textbook explores the changing children young people and families CYPF landscape and the varied roles within that landscape It considers the question of what are the essential skills and qualities for working with children and families today It provides practitioners and students with opportunities to reflect upon what it means to be an effective practitioner through the exploration of theoretical material and practice case studies from a range of professional disciplines **Creating Caring Classrooms** Kathleen Gould Lundy,Larry Swartz,2013-05 This passionate book is about community compassion and creativity it is about caring for others It is also about helping students care about their work Teachers will learn how to

establish inclusive classrooms where kindness and concern become crucial backdrops for critical conversations They will be introduced to simple but profound strategies that initiate and maintain respectful dialogue promote collaboration over competition and confront difficult issues such as bullying and exclusion Creating Caring Classrooms is committed to building respectful relationships among students teachers and the school community Through active engaging relevant open ended activities students will be encouraged to explore events ideas themes texts stories and relationships from different perspectives and then represent those new understandings in innovative and creative ways
