**Exits, Voices and Social Investment** Keith Dowding, Peter John, 2012-04-12 Over fifty years ago Albert Hirschman argued that dissatisfied consumers could either voice complaint or exit when they were dissatisfied with goods or services Loyal consumers would voice rather than exit Hirschman argued that making exit easier from publicly provided services such as health or education would reduce voice taking the richest and most articulate away and this would lead to the deterioration of public services This book provides the first thorough empirical study of these ideas Using a modified version of Hirschman's account examining private and collective voice and viewing loyalty as a form of social investment it is grounded on a dedicated five year panel study of British citizens Given government policies over the past decade or more which make exit easier from public providers this is a timely publication for all those who care about the quality of government services

**Debating Modern Monetary Theory** Costas Lapavistas, Robert Rowthorn, 2022-04-27 This book considers the theoretical and empirical claims of Modern Monetary Theory MMT in developed and developing countries It is structured as a debate between leading MMT theorists and MMT critics MMT threw down a challenge to mainstream economics and forced it to respond above all in the USA This is a rare occurrence almost unknown for heterodox economics during the last few decades It is not surprising therefore that MMT has attracted strong attention from a broad swathe of researchers It is even less surprising that it has become the theoretical vehicle of choice for political activists opposing austerity Its influence is remarkable and has gradually spread to other social disciplines including even cultural theory Furthermore the policy responses to coronavirus by several governments particularly the extraordinary expansion of central bank balance sheets in 2020 appears to support MMT in practice This volume takes into account the rising popularity of MMT and considers its theoretical claims in depth since popularity does not necessarily equate to being right in theory It also considers MMT claims regarding fiscal and monetary policy in view of the implications of the pandemic crisis for public spending and public debt It is not accidental that the strongest support for MMT in both theory and policy is to be found in the USA since MMT conclusions rely heavily on close institutional analysis of US government financing mechanisms The chapters in this book were originally published as a special issue of The Japanese Political Economy

Property Hanoch Dagan, 2011-03-18 Property Values and Institutions by Hanoch Dagan offers an original understanding of property different from the dominant voices in the field yet loyal to the practice of property It rejects the misleading dominant binarism in which property is either one monistic form structured around Blackstone's in famous formula of sole and despotic dominion or a formless bundle of rights Instead it conceptualizes property as an umbrella for a set of institutions bearing a mutual family resemblance It resists the prevailing tendency to discuss property through the prism of only one particular value notably efficiency Dagan argues that property can and should serve a pluralistic set of liberal values These property values include not only autonomy and utility which are emphasized by many contemporary scholars but also labor personhood

community and distributive justice Dagan claims that property law at least at its best tailors different configurations of entitlements to different property institutions with each such institution designed to match the specific balance between property values best suited to its characteristic social setting Dagan develops this theoretical account and applies it to key doctrinal contexts In particular he analyzes the normative underpinnings of the doctrines regulating the interactions between landowners and governments both eminent domain and regulatory takings doctrines and those regulating the governance of property owned by multiple owners such as co ownership marital property and the law of common interest communities
