Making England Landscape Of Bedfordshire:

The Hat Industry of Luton and its Buildings Katie Carmichael, David McOmish, David Grech, 2015-04-01 Although perhaps best known today as the home of Vauxhall Motors Luton's industrial roots run much deeper Long before it became associated with motor cars Luton was the centre of ladies hat production in this country a success founded upon the earlier regional industry of straw plaiting Many surrounding towns and villages fed into the industry and helped to make the region globally renowned At its peak in the 1930s the region was producing as many as 70 million hats in a single year however it entered a rapid decline following the Second World War from which it never recovered This has left Luton Dunstable and a number of other local towns with a challenging inheritance of neglected and decaying fragments of a once vital industry This book is intended to be an introduction and guide to the area's historical depth and to its distinctive and varied character seeking to explain the development of the region as the centre of the hatting industry in the south and exploring the lives of the people working there during the nineteenth and early twentieth centuries The historic links between the surviving building stock and the hatting industry are assessed and the book highlights the significance of the surviving fabric and the potential of the historic environment within future conservation and regeneration plans *The English Medieval Landscape* Leonard Cantor, 2021-11-30 First published in 1982 *The English Medieval Landscape* was written to recreate and analyse the development of the major elements of the medieval landscape Illustrated with maps and photographs the book explores the nature of the English landscape between 1066 and 1485 from farms and chases to castles monastic settlements villages roads and more *The English Medieval Landscape* will appeal to those with an interest in medieval history and British social history *The Making of Oliver Cromwell* Ronald Hutton, 2021-08-10 The first volume in a pioneering account of Oliver Cromwell providing a major new interpretation of one of the greatest figures in history Oliver Cromwell 1599-1658 the only English commoner to become the overall head of state is one of the great figures of history but his character was very complex He was at once courageous and devout devious and self-serving as a parliamentarian he was devoted to his cause as a soldier he was ruthless Cromwell's speeches and writings surpass in quantity those of any other ruler of England before Victoria and for those seeking to understand him he has usually been taken at his word In this remarkable new work Ronald Hutton untangles the facts from the fiction Cromwell pursuing his devotion to God and cementing his Puritan support base quickly transformed from obscure provincial to military victor At the end of the first English Civil War he was poised to take power Hutton reveals a man who was both genuine in his faith and deliberate in his dishonesty and uncovers the inner workings of the man who has puzzled biographers for centuries **British and Irish Archaeology**, 1994 *The Geography of British History* William Hughes, 1863 *Historical Geography: Progress and Prospect* Michael Pacione, 2013-01-11 Historical geography has been a major area of activity in recent years Much of the recent work and research findings have been extremely valuable to historians and archaeologists and as background to the study of

contemporary geography This reissue first published in 1987 presents an overview of contemporary developments in all the major branches of the discipline As such it provides a valuable introduction to the subject a review of the latest state of the art and a pointer to future research directions **Handbook for British and Irish Archaeology**, 1997 A one stop truly comprehensive dedicated and reliable sourcebook for archaeology Kingdom, Civitas, and County Stephen Rippon, 2018 This book explores the development of territorial identity in the late prehistoric Roman and early medieval periods Over the course of the Iron Age a series of marked regional variations in material culture and landscape character emerged across eastern England that reflect the development of discrete zones of social and economic interaction The boundaries between these zones appear to have run through sparsely settled areas of the landscape on high ground and corresponded to a series of kingdoms that emerged during the Late Iron Age In eastern England at least these pre Roman socio economic territories appear to have survived throughout the Roman period despite a trend towards cultural homogenization brought about by Romanization Although there is no direct evidence for the relationship between these socio economic zones and the Roman administrative territories known as civitates they probably corresponded very closely The fifth century saw some Anglo Saxon immigration but whereas in East Anglia these communities spread out across much of the landscape in the Northern Thames Basin they appear to have been restricted to certain coastal and estuarine districts The remaining areas continued to be occupied by a substantial native British population including much of the East Saxon kingdom very little of which appears to have been Saxon By the sixth century a series of regionally distinct identities that can be regarded as separate ethnic groups had developed which corresponded very closely to those that had emerged during the late prehistoric and Roman periods These ancient regional identities survived through to the Viking incursions whereafter they were swept away following the English reconquest and replaced with the counties with which we are familiar today The Geography of British History: a Geographical Description of the British Islands at Successive Periods from the Earliest Times to the Present Day: with a Sketch of the Commencement of Colonisation on the Part of the English Nation William HUGHES (F.R.G.S.), 1863

Interpreting the Landscape Michael Aston, 2002-09-11 Most places in Britain have had a local history written about them Up until this century these histories have addressed more parochial issues such as the life of the manor rather than explaining the features and changes in the landscape in a factual manner Much of what is visible today in Britain's landscape is the result of a chain of social and natural processes and can be interpreted through fieldwork as well as from old maps and documents Michael Aston uses a wide range of source material to study the complex and dynamic history of the countryside illustrating his points with aerial photographs maps plans and charts He shows how to understand the surviving remains as well as offering his own explanations for how our landscape has evolved *The Domesday Geography of South-East England* Ella M. J. Campbell, 2008-09-11 The Domesday Book has long been used as a source of information about legal and economic matters but its bearing upon the geography of medieval England has been comparatively neglected The extraction of

geographical information involves problems of interpretation since it necessitates an analysis into elements and their subsequent reconstruction on a geographical basis But when this has been done new materials for making a general picture of the relative prosperity of different areas are available as well as data for the comparative study of varying geographic and economic factors The whole work The Domesday Geography of England will be in six volumes In them different experts are to be allotted large distinct districts under Professor Darby s editorship He will himself draw together all the threads and write the concluding chapters of each volume and the whole of the concluding volume The book will be fully illustrated by many maps all specially drawn under the general editor s supervision The volumes will be separately available though the first contains some general introductory matter relevant to the whole work The Making of the English Landscape William George Hoskins,1970 Deals with the historical evolution of the English landscape as we know it It dispels the popular belief that the pattern of the land is a result of 18th century enclosures and attributes it instead to a much longer evolution The Archaeology of Medieval England and Wales John Steane,2014-10-30 In the preceding 25 years to this book s publication in 1985 there was an extensive and unprecedented burst of archaeological activity in evidence from below ground deposits above ground structures and artefacts During the boom of the late 1960s and 1970s which led to go much central town redevelopment it was buried remains which yielded the most dramatic information In the recession of the 1980s it was realised that upstanding remains had a lot to offer as well and they were being subject to ever more sophisticated study techniques This book examines those recent developments in archaeology and assesses their bearing on the study of medieval English and Welsh history Taking a series of important themes such as government religion and the countryside the book offers a chronological approach from the coming of the Vikings 850 AD to the Reformation in 1530 This approach focuses on the impact of man on the urban and rural landscape An important text for students of ancient history A New Geography on the Comparative Method John Miller Dow Meiklejohn,1908 **Landscapes of the Norman Conquest** Trevor Rowley,2022-11-04 For a long time the Norman Conquest has been viewed as a turning point in English history an event which transformed English identity sovereignty kingship and culture The years between 1066 and 1086 saw the largest transfer of property ever seen in English History comparable in scale if not greater than the revolutions in France in 1789 and Russia in 1917 This transfer and the means to achieve it had a profound effect upon the English and Welsh landscape an impact that is clearly visible almost 1 000 years afterwards Although there have been numerous books examining different aspects of the British landscape this is the first to look specifically at the way in which the Normans shaped our towns and countryside The castles abbeys churches and cathedrals built in the new Norman Romanesque style after 1066 represent the most obvious legacy of what was effectively a colonial take over of England Such phenomena furnished a broader landscape that was fashioned to intimidate and demonstrate the Norman dominance of towns and villages The devastation that followed the Conquest characterised by the Harrying of the North had a long term impact in the form of new planned settlements and

agriculture The imposition of Forest Laws restricting hunting to the Norman king and the establishment of a military landscape in areas such as the Welsh Marches had a similar impact on the countryside *New Historical Geography of England* H. C. Darby, 1973-12-06 Analytic survey of the changing face of England countryside and town from the coming of the Anglo Saxons to 1914 **Greater Medieval Houses of England and Wales, 1300-1500: Volume 2, East Anglia, Central England and Wales** Anthony Emery, 1996 The second volume of a massive illustrated survey of the greater houses of medieval England and Wales first published in 1996 **A New Geography on the Comparative Method, with Maps and Diagrams and an Outline of Commercial Geography** John Miller Dow Meiklejohn, 1895 **Gardens and Landscapes in Historic Building Conservation** Marion Harney, 2014-04-03 This comprehensive guide on historic garden and landscape conservation will help landscape professionals familiarise themselves with what the conservation of historic gardens garden structures and designed landscapes encompasses The aim of the series is to introduce each aspect of conservation and to provide concise basic and up to date knowledge within five volumes sufficient for the professional to appreciate the subject better and to know where to seek further help *Gardens Landscapes in Historic Building Conservation* is an essential guide for everyone with an interest in the conservation of historic gardens and designed landscapes worldwide The latest assessment of the origins scope and impact of gardens and designed landscapes is vital reading Covering history and theory survey and assessment conservation and management and the legislative framework the book considers all aspects of garden and landscape conservation and related issues It explores the challenge of conserving these important sites and surviving physical remains and a conservation movement which must understand protect and interpret those remains This book demonstrates how the discipline of the history and conservation of gardens and landscapes has matured in recent decades recognising the increased participation of professional contract and curatorial managers in the management of these sites and in conserving and interpreting landscapes Drawing on a wide range of sources combining academic and professional perspectives the book provides information and advice relevant to all involved in trying to preserve one of England's greatest cultural contributions and legacy for future generations to enjoy With chapters by all the leading players in the field and illustrated by copious examples this gives essential guidance to the management and conservation of historic gardens and designed landscapes **Chambers's concise geography of the world** Chambers W. and R., Ltd, 1902
