Making Hard Choices in Journalism Ethics David E. Boeyink, Sandra L. Borden, 2010-04-05 This book teaches students how to make the difficult ethical decisions that journalists routinely face By taking a case based approach the authors argue that the best way to make an ethical decision is to look closely at a particular situation rather than looking first to an abstract set of ethical theories or principles This book goes beyond the traditional approaches of many other journalism textbooks by using cases as the starting point for building ethical practices Casuistry the technical name of such a method develops provisional guidelines from the bottom up by reasoning analogically from an easy ethical case the paradigm to harder ethical cases Thoroughly grounded in actual experience this method admits more nuanced judgments than most theoretical approaches

Strategic Decision Making Craig W. Kirkwood, 1997 This work on strategic decision making focuses on multi objective decision analysis with spreadsheets

Bacchi,1999-06-16 This book offers a powerful new approach to policy studies Drawing on recent perspectives from social constructionism discourse analysis the sociology of social problems and feminism Carol Bacchi develops a step by step analytical tool for deconstructing policy problems Her What s the Problem approach encourages students to reflect critically

upon the ways in which policy problems get constructed within policy debates and policy proposals World Development Report 2015 World Bank, 2014-12-04 Development economics and policy are due for a redesign In the past few decades research from across the natural and social sciences has provided stunning insight into the way people think and make decisions Whereas the first generation of development policy was based on the assumption that humans make decisions deliberatively and independently and on the basis of consistent and self interested preferences recent research shows that decision making rarely proceeds this way People think automatically when deciding they usually draw on what comes to mind effortlessly People also think socially social norms guide much of behavior and many people prefer to cooperate as long as others are doing their share And people think with mental models what they perceive and how they interpret it depend on concepts and worldviews drawn from their societies and from shared histories The World Development Report 2015 offers a concrete look at how these insights apply to development policy It shows how a richer view of human behavior can help achieve development goals in many areas including early childhood development household finance productivity health and climate change It also shows how a more subtle view of human behavior provides new tools for interventions Making even minor adjustments to a decision making context designing interventions based on an understanding of social preferences and exposing individuals to new experiences and ways of thinking may enable people to improve their lives The Report opens exciting new avenues for development work It shows that poverty is not simply a state of material deprivation but also a tax on cognitive resources that affects the quality of decision making It emphasizes that all humans including experts and policy makers are subject to psychological and social influences on thinking and that development organizations could benefit from procedures to improve their own deliberations and decision making It demonstrates the need for more discovery learning and adaptation in policy design and implementation The new approach to development economics has immense promise Its scope of application is vast This Report introduces an important new agenda for the development community National Policy Objectives and the Adequacy of Our Current Navy Forces United States.
