Making News Of Police Violence:

Making News of Police Violence Jeffrey Ian Ross Ph.D., 2000-08-30 Although many people consider excessive police violence disconcerting if when and how they voice their opinion or respond by taking some sort of action has generally remained empirically unknown In the hope of understanding this process Ross has developed a four stage model based on a review of the literature and on interviews with the relevant actors He then uses this tool to analyze police violence that occurred in Toronto Canada and New York City over a fifteen year period To better focus the study he uses in depth case studies of three well publicized cases of police violence from each city matched on important criteria This study addresses a difficult timely and important topic for victims for police personnel and for society Ross concludes that in general most individuals do not respond to police use of excessive force further if and when they do usually depends on the context of the violence Using both quantitative and qualitative methods Ross s model integrates a variety of approaches to improve our understanding of how communities come to define and control the use of force by police including literature on the role of media efforts and their impact upon police violence The work concludes with an analysis of the reasons why people react so infrequently to incidents of excessive force

discourse analysis conversation analysis linguistics and related areas **Law Enforcement, Communication, and Community** Howard Giles, 2002-07-25 Given widespread media attention to issues of crime and its prevention police heroism and new modes of police community involvements this international collection is timely It is unique in examining ways in which police and citizens communicate across a range of contexts and problem areas While much attention is afforded the critical roles of communication by police agencies there has been little recourse to communication science and its theories Likewise the latter has not until recently concerned itself with analyzing police citizen interactions This volume examines the character of such encounters forging new theoretical frameworks having implications for practice in many instances Topics include media portrayals of law enforcement communication and new technologies within police culture domestic violence hate crimes stalking sexual abuse and hostage negotiations This book should be relevant not only to a range of social sciences besides Communication scholars and students but also to practitioners working in the field Voices from the Favelas Fernanda Amaral, 2021-03-11 The mainstream media in Brazil portrays favelas unregulated low income neighbourhoods in a negative light This has been the case since their emergence over a century ago Voices from the Favelas navigates through the contemporary representation of the favelas in the established media discussing how this partial representation impacts issues of identity and social segregation the legitimization of structural violence in those sites and providing an account of the recent emergence of digital social networks as counterpublics In order to understand the struggle against the characterisation of the favela as a site dominated by violence a framework which has been disseminated on a global scale and accepted as the norm this book will take its readers inside the mindset of the favela media activists examining the production of information and the organisation of the residents as they resist and challenge the status quo Are the activists able to counteract the official narrative in the struggles against misrepresentation and social invisibility or is the mainstream version of the favela still strong enough to help in the legitimization of the institutionalised violence **America on Fire: The Untold History of Police Violence and Black Rebellion Since the 1960s** Elizabeth Hinton, 2021-05-18 Not since Angela Davis's 2003 book *Are Prisons Obsolete* has a scholar so persuasively challenged our conventional understanding of the criminal legal system Ronald S Sullivan Jr Washington Post From one of our top historians a groundbreaking story of policing and riots that shatters our understanding of the post civil rights era What began in spring 2020 as local protests in response to the killing of George Floyd by Minneapolis police quickly exploded into a massive nationwide movement Millions of mostly young people defiantly flooded into the nation's streets demanding an end to police brutality and to the broader systemic repression of Black people and other people of color To many observers the protests appeared to be without precedent in their scale and persistence Yet as the acclaimed historian Elizabeth Hinton demonstrates in *America on Fire* the events of 2020 had clear precursors and any attempt to understand our current crisis requires a reckoning with the recent past Even in the aftermath of Donald Trump many Americans consider the decades

since the civil rights movement in the mid 1960s as a story of progress toward greater inclusiveness and equality Hinton's sweeping narrative uncovers an altogether different history taking us on a troubling journey from Detroit in 1967 and Miami in 1980 to Los Angeles in 1992 and beyond to chart the persistence of structural racism and one of its primary consequences the so called urban riot Hinton offers a critical corrective the word riot was nothing less than a racist trope applied to events that can only be properly understood as rebellions explosions of collective resistance to an unequal and violent order As she suggests if rebellion and the conditions that precipitated it never disappeared the optimistic story of a post Jim Crow United States no longer holds Black rebellion America on Fire powerfully illustrates was born in response to poverty and exclusion but most immediately in reaction to police violence In 1968 President Lyndon Johnson launched the War on Crime sending militarized police forces into impoverished Black neighborhoods Facing increasing surveillance and brutality residents threw rocks and Molotov cocktails at officers plundered local businesses and vandalized exploitative institutions Hinton draws on exclusive sources to uncover a previously hidden geography of violence in smaller American cities from York Pennsylvania to Cairo Illinois to Stockton California The central lesson from these eruptions that police violence invariably leads to community violence continues to escape policymakers who respond by further criminalizing entire groups instead of addressing underlying socioeconomic causes The results are the hugely expanded policing and prison regimes that shape the lives of so many Americans today Presenting a new framework for understanding our nation's enduring strife America on Fire is also a warning rebellions will surely continue unless police are no longer called on to manage the consequences of dismal conditions beyond their control and until an oppressive system is finally remade on the principles of justice and equality
