Making Of Citizens Young People News And Politics:

The Making of Citizens David Buckingham, 2002-01-04 New book from well known author in media education and editor of Media Education and Culture series formerly UCL now Routledge Examines how television news and popular programmes have affected young people's views of issues such as politics and citizenship

Young Citizens and New Media Peter Dahlgren, 2013-10-11 This book integrates four distinct topics young people citizenship new media and learning processes When taken together these four topics merge to define an arena of social and research attention that has become compelling in recent years The general international concern expressed of declining democratic engagement and the role of citizenship today becomes all the more acute when it turns to younger people At the same time there is growing attention being paid to the potential of new media especially internet and mobile telephony to play a role in facilitating newer forms of political participation It is clear that many of the present manifestations of new politics in the extra parliamentary domain not only make sophisticated use of such media but are indeed highly dependent on them With an impressive array of contributors this book will appeal to those interested in a number of spheres including media and cultural studies political science pedagogy and sociology

Television News, Politics and Young People M. Wayne, J. Petley, C. Murray, L. Henderson, 2010-04-09 Why are young people alienated from television news This book argues that contemporary trends indicating deepening disconnection from news about public life reflect both problems in the way television news covers politics the single biggest item on the news and problems with the nature of politics itself under neo liberal capitalism

Young People, Media and Politics in the Digital Age Vera Slavtcheva-Petkova, 2023-10-27 The book explores the relationship among young people politics and the media It presents a novel multidimensional analytical framework The Circle Line Media Model which accounts for the importance of a range of processes actors and social structures in the political socialisation process By defining political socialisation as a lifelong interactive process that develops civic cultures collective identities and citizenship underpinned by social structures nationality and generational order the author draws attention to its manifestation in acts of political participation and interactions with authoritative actors such as school teachers family the media and friends peers The volume's longitudinal study on young people Europe and the media spanning 13 years of research in two very different countries also makes recommendations for more effectively engaging young people with politics and political media based on Generation Z's own views about current deficiencies in their relationship with news media Shedding new light on the changing nature of young people's engagement with politics this book will be of interest to researchers lecturers professors and upper level undergraduate and postgraduate students in the fields of media studies communication and journalism studies as well as politics and sociology

Activating the Citizen J. DeBardeleben, J. Pammatt, 2009-08-12 The decline of citizen involvement affects two key elements of democratic government elections and political parties Activating the Citizen examines the reasons underlying citizen withdrawal and explores and assesses innovative approaches on both sides of the

Atlantic to try to counter these phenomena *Young People and the Future of News* Lynn Schofield Clark, Regina Marchi, 2017-09-21 This book examines youth media practices on social media introducing the concept of connective journalism as a precursor to collective political action **News Parody and Political Satire Across the Globe** Geoffrey Baym, Jeffrey P. Jones, 2013-09-13 In recent years the US fake news program The Daily Show with Jon Stewart has become a surprisingly important source of information conversation and commentary about public affairs Perhaps more surprisingly so called fake news is now a truly global phenomenon with various forms of news parody and political satire programming appearing throughout the world This collection of innovative chapters takes a close and critical look at global news parody from a wide range of countries including the USA and the UK Italy and France Hungary and Romania Israel and Palestine Iran and India Australia Germany and Denmark Traversing a range of national cultures political systems and programming forms News Parody and Political Satire Across the Globe offers insight into the central and perhaps controversial role that news parody has come to play in the world and explores the multiple forces that enable and constrain its performance It will help readers to better understand the intersections of journalism politics and comedy as they take shape across the globe in a variety of political and media systems This book was originally published as a special issue of the journal Popular Communication *The Making of Citizens* David Buckingham, 2000 Young people in western societies have become increasingly alienated from politics with a steady decline in voting and in membership of political parties as well as increasing dissatisfaction with mainstream political institutions Young people today are less interested in the political environment than any other generation since World War II This text explores the reasons why is the phenomenon symptomatic of a more general decline in the public sphere and in notions of civil virtue and responsibility Or does commercial popular culture play a role in the rising tide of cynicism and political apathy in the young On the other hand postmodernist critics have seen these changes as an instance of the failure of mainstream journalism to remain sensitive to the changing needs and dispositions of the young **International Handbook of Children, Media and Culture** Kirsten Drotner, Sonia Livingstone, 2008-02-19 This essential volume brings together the work of internationally renowned researchers each experts in their field in order to capture the diversity of children and young people s media cultures around the world Why are the media such a crucial part of children s daily lives Are they becoming more important more influential and in what ways Or does a historical perspective reveal how past media have long framed children s cultural horizons or perhaps how families however constituted have long shaped the ways children relate to media In addressing such questions the contributors present detailed empirical cases to uncover how children weave together diverse forms and technologies to create a rich symbolic tapestry which in turn shapes their social relationships At the same time many concerns even public panics arise regarding children s engagement with media leading the contributors also to inquire into the risky or problematic aspects of today s highly mediated world Deliberately selected to represent as many parts of the globe as

possible and with a commitment to recognizing both the similarities and differences in children and young people's lives from China to Denmark from Canada to India from Japan to Iceland from the authors offer a rich contextualization of children's engagement with their particular media and communication environment while also pursuing cross-cutting themes in terms of comparative and global trends. Each chapter provides a clear orientation for new readers to the main debates and core issues addressed combined with a depth of analysis and argumentation to stimulate the thinking of advanced students and established scholars. Since children and young people are a focus of study across different disciplines the volume is thoroughly multi-disciplinary. Yet since children and young people are all too easily neglected by these same disciplines this volume hopes to accord their interests and concerns they surely merit. Cultural Citizenship and Popular Culture Joke Hermes, 2023-09-27 Written in an accessible and engaging style this book uses a series of case studies to show how popular media are important to us as a source of pleasure and entertainment but also in communicating about the world with others. Social media platforms have changed how we talk about what we like and dislike in our popular media use. Cultural citizenship shows how these discussions speak to belonging to what we feel our rights and responsibilities are in today's polarized world. Cultural Citizenship and Popular Culture is based on audience-led research and does not privilege textual analysis as a starting point for taking popular media use's measure. Instead it offers research tools to listen to others. This book offers scholars and students of media and creative industries a means to understand their professional position as one in which they engage with rather than assume to know what users of popular cultural texts and products think and feel.

Media Education Goes to School Allison Butler, 2010 Media Education Goes to School examines the struggles involved in integrating media education across the curriculum at a small urban school. Based on quasi-ethnographic research specifically semi-formal individual and group interviews with twenty-one participants and participant observation the text focuses on how students understand and make meaning of media education in their schools and what they know about urban education and urban school reform. The book argues against the neoliberal ethos that continuously harms urban youth and the rhetoric of new school reform that replicates not heals subjected social positions. Media education is a necessity in secondary schooling but it cannot be thoroughly integrated into schools until significant structural changes are made in education. This book positions the site of change through the struggles students express with their own experience of education. **Citizenship and Moral Education** Mark Halstead, Mark Pike, 2006-08-21 Moral and citizenship education are again at the forefront of educational attention with the recent governmental announcements about revisions to the National Curriculum frameworks to 2000 and beyond. This book addresses some of the central issues in moral and citizenship education facing teachers today.

embedding practical considerations in a theoretical context and reviewing teaching learning and assessment strategies It draws extensively on research but is written in a clear accessible style Citizenship and Moral Education examines the key concepts and provides an up to date overview of policy particularly addressing theoretical issues aims and approaches in relation to moral and citizenship education in a pluralist society the contributions of the curriculum extra curricular activities and the school ethos to citizenship and moral education in school teaching strategies materials pupil assessment and school evaluation The book also focuses on key professional and personal issues for teachers in undertaking moral citizenship education
