Making Of The English Landscape

William G. Hoskins

Making Of The English Landscape:

The Making of the English Landscape William George Hoskins, 1970 Deals with the historical evolution of the English landscape as we know it It dispels the popular belief that the pattern of the land is a result of 18th century enclosures and attributes it instead to a much longer evolution **The Making of the English Landscape** W. G. Hoskins, 2013 The classic text of English landscape history ground breaking and hugely influential *The Making of the English Landscape*, 1957

"The" Making of the English Landscape William G. Hoskins, 1969 *The Invention of the English Landscape* Peter Borsay, Rosemary Sweet, 2023-07-27 Since at least the Reformation English men and women have been engaged in visiting exploring and portraying in words and images the landscape of their nation *The Invention of the English Landscape* examines these journeys and investigations to explore how the natural and historic English landscape was reconfigured to become a widely enjoyed cultural and leisure resource Peter Borsay considers the manifold forces behind this transformation such as the rise of consumer culture the media industrial and transport revolutions the Enlightenment Romanticism and the Gothic revival In doing so he reveals the development of a powerful bond between landscape and natural identity against the backdrop of social and political change from the early modern period to the start of the Second World War Borsay's interdisciplinary approach demonstrates how human understandings of the natural world shaped the geography of England and uncovers a wealth of valuable material from novels and poems to paintings that expose historical understandings of the landscape This innovative approach illuminates how the English countryside and historic buildings became cultural icons behind which the nation was rallied during war time and explores the emergence of a post war heritage industry that is now a definitive part of British cultural life **The English Landscape in the Twentieth Century** Trevor Rowley, 2006-01-01 Trevor Rowley's new study is a highly topical account of the changes that have taken place and that continue to take place on the country around us [The Making of the English Landscape](#) William G. White, 2012-09-06 The landscape of medieval England was the product of a multitude of hands While the power to shape the landscape inevitably lay with the Crown the nobility and the religious houses this study also highlights the contribution of the peasantry in the layout of rural settlements and ridge and furrow field works and the funding of parish churches by ordinary townsfolk The importance of population trends is emphasised as a major factor in shaping the medieval landscape the rising curve of the eleventh to thirteenth centuries imposing growing pressures on resources and the devastating impact of the Black Death leading to radical decline in the fourteenth century

Opening with a broad ranging analysis of political and economic trends in medieval England the book progresses thematically to assess the impact of farming rural settlement towns the Church and fortification using many original case studies The concluding chapter charts the end of the medieval landscape with the dissolution of the monasteries the replacement of castles by country houses the ongoing enclosure of fields and the growth of towns *Interpreting the Landscape* Michael Aston,2002-09-11 Most places in Britain have had a local history written about them Up until this century these histories have addressed more parochial issues such as the life of the manor rather than explaining the features and changes in the landscape in a factual manner Much of what is visible today in Britain s landscape is the result of a chain of social and natural processes and can be interpreted through fieldwork as well as from old maps and documents Michael Aston uses a wide range of source material to study the complex and dynamic history of the countryside illustrating his points with aerial photographs maps plans and charts He shows how to understand the surviving remains as well as offering his own explanations for how our landscape has evolved *British and Irish Archaeology* ,1994
