Making Political Geography John Agnew, Luca Muscarà, 2012-02-16

Dating from its inception in the late nineteenth century political geography as a field has been heavily influenced by global events of the time. Thus rather than trying to impose a single fashionable theory leading geographers John Agnew and Luca Muscarà consider the underlying role of changing geopolitical context as their framework for understanding the evolution of the discipline. The authors trace the development of key thinkers and theories during three distinct periods: 1875-1945, the Cold War, and the post-Cold War, emphasizing the ongoing struggle between theoretical monism and pluralism or one path to knowledge versus many. The world has undergone dramatic shifts since the book's first publication in 2002, and this thoroughly revised and updated second edition focuses especially on reinterpretations of the post-Cold War period. Agnew and Muscarà explore the renewed questioning of international borders, the emergence of the Middle East, and displacement of Europe as the center of global geopolitics, the rise of China and other new powers, the reappearance of environmental issues, and the development of critical geopolitics. With its deeply knowledgeable and balanced history and overview of the field, this concise work will be a valuable and flexible text for all courses in political geography.

Making War, Thinking History

Jeffrey Record, 2014-02-15. In examining the influence of historical analogies on decisions to use or not use force, military strategist Jeffrey Record assesses every major application of U.S. force from the Korean War to the NATO war on Serbia. Specifically, he looks at the influence of two analogies: the democracies' appeasement of Hitler at Munich and America's defeat in the Vietnam War. His book judges the utility of these two analogies on presidential decision making and finds considerable misuse of them in situations where force was optional. He points to the Johnson administration's application of the Munich analogy to the circumstances of Southeast Asia in 1965 as the most egregious example of their misuse but also cites the faulty reasoning by historical analogy that prevailed among critics of Reagan's policy in Central America and in Clinton's use of force in Haiti and the former Yugoslavia. The author's findings show generational experience to be a key influence on presidential decision making: Munich persuaded mid-twentieth-century presidents that force should be used early and decisively, while Vietnam cautioned later presidents against using force at all. Both analogies were at work for the Gulf War, with Munich urging a decision for war and Vietnam warning against a graduated and highly restricted use of force. Record also reminds us of the times when presidents have used analogies to mobilize public support for action they have already decided to take. Addressing both the process of presidential decision making and the wisdom of decisions made, this well-reasoned book offers timely lessons to a broad audience that includes political scientists, military historians, defense analysts, and policy makers, as well as those simply curious about history's influence.

State Power and Politics in the Making of the Modern Middle East

Lecturer in the Recent Economic History of the Middle East and Fellow Roger Owen, Roger Owen, 2002-04-12. Roger Owen has fully revised and updated his authoritative text to take into account the considerable

developments in the Middle East in the 1990s **Making the Stage** Ann C. Hall, 2020-11-30 MAKING THE STAGE is a collection of essays that examines the role of theatre drama and performance in contemporary culture a culture that is growing increasingly technological and isolated seemingly at odds with the very nature of theatre a collaborative and sometimes very primitive art form Through the course of these essays it is clear that theatre not only survives some of the challenges of the day but even defines discussions particularly political ones which are prohibited by an increasingly manipulated media The essays from a diverse group of theatre scholars examine the mechanics of theatre from space to sound to the use of technology the role of women in creating theatre the relationship between theatre and literary art forms the politics of theatre science and theatre and the role of performance art Through them all it is clear that theatre drama and performance continue to speak in significant ways **The Art of Policymaking** George E. Shambaugh IV, Paul J. Weinstein Jr., 2024-04-24 The Art of Policymaking is the only book designed to provide students and practitioners with a detailed explanation of the specific tools techniques and processes used to create policy in the U S as well as the tools they need to understand them The book includes practical advice on how to write memos prepare polling questions and navigate the clearance process Case studies show how actual policies were developed and how and why policies and processes differed across administrations And scenarios allow students to practice the tools and techniques they have learned by working through both domestic and foreign policy situations Written by two experts in the field with experience in both academia and government The Art of Policymaking is the perfect how to guide for students and professionals **The Making of a Conservative Environmentalist** Gordon K. Durnil, 2001-11-09 Durnil s attack on chlorine is one of the single boldest environmental policy ideas of the 1990 s The message is that if someone as conventional and as conservative as Mr Durnil can latch on to one of the great social transformations of the American century then so can every other Republican in the country New York Times Book Review This is a serious thoughtful book If they would read it the phoney conservatives now performing in the center ring in Congress might be shamed into mending their ways Village Voice Literary Supplement Here comes a thoughtful experienced conservative with impeccable Republican credentials a dedicated environmentalist with a different point of view A thoughtful readable mandate Ken Bode Moderator Washington Week in Review **MAKING SENSE OF DEVELOPMENT** Marjorie Garber, Jann Matlock, Rebecca L. Walkowitz, 2018-05-04 First Published in 2018 Routledge is an imprint of Taylor Francis an Informa company **Improving the Presumptive Disability Decision-Making Process for Veterans** Institute of Medicine, Board on Military and Veterans Health, Committee on Evaluation of the Presumptive Disability Decision-Making Process for Veterans, 2008-05-15 The United States has long recognized and honored the service and sacrifices of its military and veterans Veterans who have been injured by their service whether their injury appears during service or afterwards are owed appropriate health care and disability compensation For some medical conditions that develop after military service the scientific information needed to connect

the health conditions to the circumstances of service may be incomplete When information is incomplete Congress or the Department of Veterans Affairs VA may need to make a presumption of service connection so that a group of veterans can be appropriately compensated The missing information may be about the specific exposures of the veterans or there may be incomplete scientific evidence as to whether an exposure during service causes the health condition of concern For example when the exposures of military personnel in Vietnam to Agent Orange could not be clearly documented a presumption was established that all those who set foot on Vietnam soil were exposed to Agent Orange The Institute of Medicine IOM Committee was charged with reviewing and describing how presumptions have been made in the past and if needed to make recommendations for an improved scientific framework that could be used in the future for determining if a presumption should be made The Committee was asked to consider and describe the processes of all participants in the current presumptive disability decision making process for veterans The Committee was not asked to offer an opinion about past presumptive decisions or to suggest specific future presumptions The Committee heard from a range of groups that figure into this decision making process including past and present staffers from Congress the VA the IOM veterans service organizations and individual veterans The Department of Defense DoD briefed the Committee about its current activities and plans to better track the exposures and health conditions of military personnel The Committee further documented the current process by developing case studies around exposures and health conditions for which presumptions had been made Improving the Presumptive Disability Decision Making Process for Veterans explains recommendations made by the committee general methods by which scientists as well as government and other organizations evaluate scientific evidence in order to determine if a specific exposure causes a health condition

Understanding Foreign Policy Decision Making Alex Mintz, Karl DeRouen Jr, 2010-02-22 *Understanding Foreign Policy Decision Making* presents a psychological approach to foreign policy decision making This approach focuses on the decision process dynamics and outcome The book includes a wealth of extended real world case studies and examples that are woven into the text The cases and examples which are written in an accessible style include decisions made by leaders of the United States Israel New Zealand Cuba Iceland United Kingdom and others In addition to coverage of the rational model of decision making levels of analysis of foreign policy decision making and types of decisions the book includes extensive material on alternatives to the rational choice model the marketing and framing of decisions cognitive biases and domestic cultural and international influences on decision making in international affairs Existing textbooks do not present such an approach to foreign policy decision making international relations American foreign policy and comparative foreign policy

Emotional Choices Robin Markwica, 2018-03-06 Why do states often refuse to yield to military threats from a more

powerful actor such as the United States. Why do they frequently prefer war to compliance? International Relations scholars generally employ the rational choice logic of consequences or the constructivist logic of appropriateness to explain this puzzling behavior. Max Weber, however, suggested a third logic of choice in his magnum opus *Economy and Society*: human decision making can also be motivated by emotions. Drawing on Weber and more recent scholarship in sociology and psychology, Robin Markwica introduces the logic of affect or emotional choice theory into the field of International Relations. The logic of affect posits that actors' behavior is shaped by the dynamic interplay among their norms, identities, and five key emotions: fear, anger, hope, pride, and humiliation. Markwica puts forward a series of propositions that specify the affective conditions under which leaders are likely to accept or reject a coercer's demands. To infer emotions and to examine their influence on decision making, he develops a methodological strategy combining sentiment analysis and an interpretive form of process tracing. He then applies the logic of affect to Nikita Khrushchev's behavior during the Cuban missile crisis in 1962 and Saddam Hussein's decision making in the Gulf conflict in 1990, offering a novel explanation for why U.S. coercive diplomacy succeeded in one case but not in the other. *United States Congressional Serial Set Catalog*, 1989. *The Army Lawyer*, 2009. *Dynamics of Arab Foreign Policy-Making in the Twenty-First Century*. Hassan Hamdan Al-Alkim, 2012-04-16.

The Arab world's strategic location and its considerable material and human potential should allow it to play a major role in world affairs. However, in addition to sharing language, culture, and history, Arab states also face common challenges: authoritarian regimes, ethnic and social cleavages, economic underdevelopment, and the need for security from the West. Hassan Hamdan al Alkim examines the dynamics of Arab foreign policy making in the twenty-first century, taking account of the current political developments in the Arab world since January 2011. Through an insightful analysis of pivotal issues such as the Middle East Peace Process, the food and water crisis, and Saudi Arabia's foreign policy, Alkim brings us closer to a nuanced understanding of contemporary Arab politics and its role in world affairs. This balanced and discerning study is essential reading for policy makers, academics, and students of Middle Eastern politics. *Journal of the House of Representatives of the United States*. United States. Congress. House, 2000. Some vols include supplemental journals of such proceedings of the sessions as during the time they were depending were ordered to be kept secret and respecting which the injunction of secrecy was afterwards taken off by the order of the House. **Making Sense of Media and Politics**. Gadi Wolfsfeld, 2011-06-23. Politics is above all a contest, and the news media are the central arena for viewing that competition. One of the central concerns of political communication has to do with the myriad ways in which politics has an impact on the news media and the equally diverse ways in which the media influences politics. Both of these aspects in turn weigh heavily on the effects such political communication has on mass citizens. In *Making Sense of Media and Politics*, Gadi Wolfsfeld introduces readers to the most important concepts that serve as a framework for examining the interrelationship of media and politics: political power can usually be translated into power over the news media when authorities lose control over the

political environment they also lose control over the news there is no such thing as objective journalism nor can there be the media are dedicated more than anything else to telling a good story the most important effects of the news media on citizens tend to be unintentional and unnoticed By identifying these five key principles of political communication the author examines those who package and send political messages those who transform political messages into news and the effect all this has on citizens The result is a brief engaging guide to help make sense of the wider world of media and politics and an essential companion to more in depths studies of the field

How Do Leaders Make Decisions? Alex Mintz,Dmitry (Dima) Adamsky,2019-12-02 Understanding how leaders make foreign policy and national security decisions is of paramount importance for the policy community and academia This book explores how leaders such as Trump Obama Netanyahu and others make decisions using the Applied Decision Analysis ADA method Proceedings of the 78th National Convention of the American Legion American Legion.
