Early Modern** Alan Stewart, 2018-05-04 The Oxford History of Life Writing Volume 2 Early Modern explores life writing in England between 1500 and 1700 and argues that this was a period which saw remarkable innovations in biography autobiography and diary keeping that laid the foundations for our modern life writing The challenges wrought by the upheavals and the sixteenth century English Reformation and seventeenth century Civil Wars moulded British and

early American life writing in unique and lasting ways While classical and medieval models continued to exercise considerable influence new forms began to challenge them The English Reformation banished the saints lives that dominated the writings of medieval Catholicism only to replace them with new lives of Protestant martyrs Novel forms of self accounting came into existence from the daily moral self accounting dictated by strands of Calvinism to the daily financial self accounting modelled on the new double entry book keeping This volume shows how the most ostensibly private journals were circulated to build godly communities how women found new modes of recording and understanding their disrupted lives how men started to compartmentalize their lives for public and private consumption The volume doesn't intend to present a strict chronological progression from the medieval to the modern nor to suggest the triumphant rise of the fact based historical biography Instead it portrays early modern England as a site of multiple sometimes conflicting possibilities for life writing all of which have something to teach us about how the period understood both the concept of a life and what it meant to write a life

**Early Modern Authorship and the Editorial Tradition** Aleida Auld, 2023-12-12 This volume adds a new dimension to authorship studies by linking the editorial tradition to the transformative reception of early modern authors and their works across time Aleida Auld argues that the editorial tradition provides privileged access to the reception of early modern literature informing our understanding of certain reconfigurations and sometimes helping to produce them between their time and our own At stake are reconfigurations of oeuvre and authorship the relationship

between the author and work the relationship between authors and the author's own role in establishing an editorial tradition Ultimately this study recognizes that the editorial tradition is a stabilizing force while asserting that it may also be a source of strange and provocative reconceptions of early modern authors and their works in the present day Scholars and students of early modern literature will benefit from this approach to editing as a form of reception that encompasses all the editorial decisions that are necessary to put forth a text *The Doctrine of Salvation in the Sermons of Richard Hooker* Cornelius C.
