**OECD Regional Outlook 2019 Leveraging Megatrends for Cities and Rural Areas** OECD,2019-03-19 Large and persistent inequalities in regional economic performance within countries exist throughout the OECD The 2019 Regional Outlook discusses the underlying causes of economic disparities across regions and highlights the need for place based policies to address them The report makes the

**Divided Cities** Richard Scholar,2006-01-26 Cities at their best are cradles of diversity opportunity and citizenship Why then do so many cities today seem scarred by divisions separating the powerful and privileged from the victims of deprivation and injustice What is it like to live on the wrong side of the divide in Paris London New York Sao Paolo and other cities all over the world In this book based on the internationally renowned Oxford Amnesty Lectures eight leading urban thinkers argue about why divisions arise in cities and about what could and should be done to bring those divisions to an end The book features essays by Patrick Declerck Stuart Hall David Harvey Richard Rogers Patricia Williams and James Wolfensohn with commentaries from Peter Hall Michael Likosky and others The many contemporary issues that the book addresses include the impact of globalization and migration on the urban environment the consequences of the war on terror for those living in cities the new development paradigm being adopted by international institutions in the developing world the need for a genuine urban renaissance in Britain and elsewhere and the suffering of the homeless These controversial and sometimes conflicting essays linked by Richard Scholar s incisive introduction aim to encourage and inform debate about the challenges to human rights in our increasingly urban world

**City Power** Richard C. Schragger,2016 Reigning theories of urban power suggest that in a world dominated by footloose transnational capital cities have little capacity to effect social change In City Power Richard Schragger challenges this conventional wisdom arguing that cities can and should pursue aims other than making themselves attractive to global capital Using the municipal living wage movement as an example Schragger explains why cities are well positioned to address issues like income equality and how our institutions can be designed to allow them to do so

**Healthy Cities** Namir Khan,Willem H. Vanderburg,2001 Modern cities can be designed to constitute a more supportive environment for a great many activities provide a more livable habitat and reduce the burden imposed on the biosphere They can be made healthier in terms of the definition by World Health Organization and more sustainable by means of new and emerging preventive approaches Healthy Cities focuses on those preventive approaches that can make cities healthier and more sustainable This book as well as the two companion volumes Sustainable Energy and Sustainable Production is the result of a twelve year research project carried out at the Center for Technology and Social Development at the University of Toronto The research findings led to the development of a new conceptual framework and strategy aimed at converting technological and economic growth into development that would gradually become more sustainable

**Restarting the Future** Jonathan Haskel,Stian Westlake,2022-03-22 From the acclaimed authors of Capitalism without Capital radical ideas

for restoring prosperity in today's intangible economy. The past two decades have witnessed sluggish economic growth, mounting inequality, dysfunctional competition, and a host of other ills that have left people wondering what has happened to the future they were promised. *Restarting the Future* reveals how these problems arise from a failure to develop the institutions demanded by an economy now reliant on intangible capital such as ideas, relationships, brands, and knowledge. In this groundbreaking and provocative book, Jonathan Haskel and Stian Westlake argue that the great economic disappointment of the century is the result of an incomplete transition from an economy based on physical capital and show how the vital institutions that underpin our economy remain geared to an outmoded way of doing business. The growth of intangible investment has slowed significantly in recent years, making the world poorer, less fair, and more vulnerable to existential threats. Haskel and Westlake present exciting new ideas to help us catch up with the intangible revolution, offering a road map for how to finance businesses, improve our cities, fund more science and research, reform monetary policy, and reshape intellectual property rules for the better. Drawing on Haskel and Westlake's experience at the forefront of finance and economic policymaking, *Restarting the Future* sets out a host of radical but practical solutions that can lead us into the future.

**Disposable Cities** Garth Andrew Myers, 2017-03-02. Based on in-depth fieldwork in three cities: Dar es Salaam, Zanzibar, and Lusaka, this book provides a critical analysis of the United Nations Sustainable Cities Program in Africa (SCP). Focusing on the SCP's policies for solid waste management, which was identified as the top priority problem by the SCP, the book examines the success of these pilot schemes and the SCP's record in building new relationships between people and government. It argues that the SCP has operated in a political vacuum without recognition of the long and problematic histories and cultural politics of urban environmental governance in Eastern and Southern Africa. This book brings these cultural and political histories to the fore in its examination of the contemporary dynamics. In doing so, it not only provides an insightful analysis of the policies and outcomes for the SCP but also puts forward a historically grounded critique of neoliberalism, good governance, and sustainable development discourses.
