Fortune Magazine called him the ultimate entrepreneur. When MGMT MEMO was originally published, most DEC employees couldn't read it. Labelled For Internal Communication Only, it was only sent to managers with the understanding that they would communicate the messages to their employees. Now, twenty years after the demise of the company, when there is no longer a need for confidentiality, these documents can help us to remember and relive the challenges, the triumphs, and the camaraderie of that time. Over the course of eleven years, this publication evolved from a collection of short news items to lengthy discussions of the many reorganizations and the reasons behind them, as well as Ken's thoughts on management and corporate culture, his hopes, and his advice. It served as a tool for him to deliver messages that he considered important and timely. The articles reflect the dynamics of rapid growth in a fast-changing, high-tech environment, the stress of the ever-urgent need to develop one new product after another and related services for an ever-expanding range of uses, the need to come up with new ways to connect product to product and people to people, with new kinds of organization and new theories of how to motivate and manage large numbers of people. They repeatedly attempt to redefine the company as the employee population doubled in size. They recount the struggle to invent not just new products but also new kinds of new products and to find ways to effectively use those same products to develop the next generation of products and to market them and to help an expanding range of customers who needed our products and services to build their businesses and to create new businesses and invent new kinds of business. How was it possible to manage such an entity in hyper-growth mode to accurately prophesize changing customer needs and tastes and come up with new products and services that they would need and to be prepared to manufacture products in the volumes required and to recruit and

train the people necessary for all that and to do all of this in sync so the money and the resources were available when and where they were needed How could such an entity such a storm of creative activity hold together and continue to grow How was it possible to manage it to deal with one unprecedented challenge after another How was it possible to foster a core of values a sense of corporate culture and identity *Proceedings* ,1990      **Bibliographic Guide to Education 1994** New York Public Library,New York Public Library Staff,1995 This guide lists materials catalogued by Columbia University Teachers College during 1994 with additional entries from the New York Public Library for selected publications in the field All aspects of education are covered including American elementary and secondary education higher adult education early childhood education history and philosophy of education international and comparative education administration education of the culturally disadvantaged and physically challenged education of minorities education of women and administrative reports of departments of education in the US and abroad The listing is intended as a supplement to the Dictionary Catalogue of the Teachers College Library Columbia University G K Hall 1970      **Designing Cross-Functional Business Processes** Bernard Johann,1995-04-13 Bernard Johann offers a comprehensive set of practical tools to lead novice and veteran practitioners alike through the complexities of business process design presenting a step by step approach that demonstrates how team members and others can integrate and streamline efforts among functional departments to create responsive business processes      **Designing Work Groups, Jobs, and Work Flow** Toni Hupp,Craig Polak,Odin Westgaard,1995-04-27 Designing Work Groups Jobs and Work Flow offers an integrated approach to using the most powerful tools of reengineering to design single work units that are productive responsive and build participant ownership and commitment Toni Hupp and her coauthors present a tool kit with many checklists reusable worksheets flowcharts and other resources for analyzing and designing the daily work flow group structure and job responsibilities of intact work groups They provide the step by step procedures for capturing who does what when why and how and offer guidelines for improving critical work processes
