Human Progress Amid Resistance to Change Joseph E. Pluta,2011-04 In building their profession around carefully selected interpretations of the work of Adam Smith Alfred Marshall and others mainstream economists have embraced such concepts as the invisible hand equilibrium consumer rationality the marginal productivity theory the inevitability of diminishing returns and the fiction of pure competition In contrast the evolutionary economics of Thorstein Veblen and Clarence Ayres challenges all of these concept as unproven and capable of telling us little or nothing about the actual operation of the economy Using the evolutionary framework Human Progress Amid Resistance to Change argues that all cultures since prehistory have faced two opposing forces technology including human knowledge and institutions rooted in ceremonialism The former is dynamic forward looking accepting of change cumulative one discovery builds on another and the major cause of human progress The latter is static and consists of all customs traditions superstitions rituals ceremonies taboos and past binding religious beliefs that resist change The book illustrates in detail how these competing forces have interacted throughout the history of the human race and how mainstream economics fails to grasp the significance of their combined effects

Modern Political Economics Yanis Varoufakis, Joseph Halevi, Nicholas J. Theocarakis, 2012-03-29 Once in a while the world astonishes itself Anxious incredulity replaces intellectual torpor and a puzzled public strains its antennae in every possible direction desperately seeking explanations for the causes and nature of what just hit it 2008 was such a moment Not only did the financial system collapse and send the real economy into a tailspin but it also revealed the great gulf separating economics from a very real capitalism Modern Political Economics has a single aim To help readers make sense of how 2008 came about and what the post 2008 world has in store The book is divided into two parts The first part delves into every major economic theory from Aristotle to the present with a determination to discover clues of what went wrong in 2008 The main finding is that all economic theory is inherently flawed Any system of ideas whose purpose is to describe capitalism in mathematical or engineering terms leads to inevitable logical inconsistency an inherent error that stands between us and a decent grasp of capitalist reality The only scientific truth about capitalism is its radical indeterminacy a condition which makes it impossible to use science s tools e g calculus and statistics to second guess it The second part casts an attentive eye on the post war era on the breeding ground of the Crash of 2008 It distinguishes between two major post war phases The Global Plan 1947 1971 and the Global Minotaur 1971 2008 This dynamic new book delves into every major economic theory and maps out meticulously the trajectory that global capitalism followed from post war almost centrally planned stability to designed disintegration in the 1970s to an intentional magnification of unsustainable imbalances in the 1980s and finally to the most spectacular privatisation of money in the 1990s and beyond Modern Political
