**Focus On: 100 Most Popular Television Series by Universal Television** Wikipedia contributors, [Vampires and the Making of the United States in the Twenty-First Century](#) Simon Bacon, 2025-05-30 [Vampires and the Making of the United States in the Twenty-First Century](#) offers a unique and multifaceted study of how vampires on screen have shaped America and how specific environments here have shaped their vampires. Examining the figure of the vampire within the framework of uniquely American environments both physical and immaterial, the book delves into the questions relating to American geography, identity, racial and ethnic tensions, American colonial past and its urban and environmental history. With contributions from a diverse and international team of authors, the collection follows the vampire across the geographical and ideological landscape of the US to consider what cultural and historical environments have gone towards creating the contemporary undead and why the post-Trump America of the twenty-first century is a truly vampiric one. This timely and truly innovative volume will resonate firmly with scholars and students of popular culture, film and media studies, horror, American studies and urban and environmental studies.

**Making Crime Television** Anita Lam, 2013-10-15 This book employs actor network theory in order to examine how representations of crime are produced for contemporary prime time television dramas. As a unique examination of the production of contemporary crime television dramas, particularly their writing process, *Making Crime Television: Producing Entertaining Representations of Crime for Television Broadcast* examines not only the semiotic relations between ideas about crime but the material conditions under which those meanings are formulated. Using ethnographic and interview data, Anita Lam considers how textual representations of crime are assembled by various people, including writers, directors, technical consultants and network executives, technologies, screenwriting software and whiteboards and texts, newspaper articles and rival crime dramas. The emerging analysis does not project but instead concretely examines what and how television writers and producers know about crime, law and policing. An adequate understanding of the representation of crime, it is maintained, cannot be limited to a content analysis that treats the representation as a final product. Rather, a television representation of crime must be seen as the result of a particular assemblage of logics: people, creative ideas, commercial interests, legal requirements and broadcasting networks. A fascinating investigation into the relationship between television production, crime and the law, this book is an accessible and well-researched resource for students and scholars of Law, Media and Criminology.
