British Foreign Policy in the Second World War Ernest Llewellyn Woodward,1962 U-boats of the Second World War: Their Longest Voyages Jak P. Mallmann Showell,2014-03-24 Ocean going U boats each one not much longer than four European articulated lorries with up to sixty men inside them sailed the far off seas to reap havoc in hot inhospitable waters The air forces and navies from Britain the United States and other colonial countries followed to make this a daring and death threatening venture The facts of what the U boats achieved against massive odds have been told before but U Boats of the Second World War Their Longest Voyages is different It concentrates more on how it was done How the men survived how they lived and died and how they still found time to carry out their orders The book is based on masses of previously unpublished documents from the German U boat Museum many of them written during or shortly after the war by men who survived this bitter conflict This is the story of how specially built long range ocean going U boats started out one step ahead of the Allied navies and air power how they fell one step behind and how they finally vanished into the depths of the biggest and deepest oceans This is a remarkable story of endurance courage and comradeship that terrified the world for the most critical period of the Second World War The author Jak P Mallmann Showell is the son of a U boat diesel mechanic who disappeared in those warm waters two months before the author was born *Making Makers* Michael P. M. Finch,2024-05-07 Making Makers presents a comprehensive history of a seminal work of scholarship which has exerted a persistent attraction for scholars of war and strategy Makers of Modern Strategy It reveals the processes by which scholars conceived and devised the book considering both successful and failed attempts to make and remake the work across the twentieth century and illuminating its impact and legacy It explains how and why these influential volumes took their particular forms unearths the broader intellectual processes that shaped them and reflects on the academic parameters of the study of war in the twentieth century In presenting a complete genesis of the Makers project in the context of intellectual trends and historical contingency this book reflects on a more complex and nuanced appraisal of the development of scholarship on war In so doing it also offers contributions to the intellectual biographies of key figures in the history of war in the twentieth century such as Edward Mead Earle Peter Paret Gordon Craig and Theodore Ropp Making Makers contributes to an intellectual history of military history and contextualises the place of history and historians in strategic and security studies It is not only a history of the book but a history of the networks of scholars involved in its creation their careers and lines of patronage crossing international boundaries from Europe to the USA to Asia and Australia It is an investigation of ideas individuals and groups of work completed and scholarship produced as well as contingency and opportunities missed  
1939 ,1973 **The Great War and the Making of the Modern World** Jeremy Black,2011-03-17 This new work demonstrates how the outcome of the First World War has formed the modern world we live in today The First World War was the Great War for its leading participants In revisiting the events of 1914 1918 a century on Jeremy Black considers how

we now look at the impact of the conflict across the globe and how it came to be World War I in our consciousness For millions both soldiers and civilians the conflict proved fatal The suffering and loss of the war provides much of its resonance and significance but this book seeks to throw light beyond this not least in asking how it ended in victory and defeat Casting aside the conventional narrative Jeremy Black returns to a vast range of original sources and investigates not only the key events of the war but its consequences in restructuring the old order As its significance has changed with time and not only with the loss of first hand testimony Black considers the struggle not only in its historical context but through its memorialisation today

*Making Connections* Margaret Walsh,2017-05-15 This book argues that legal persuasion results from making and breaking mental connections To support this argument it follows a cognitive science roadmap while the authors road test the directions through rhetorical analysis By taking a rhetorical approach to persuasion the authors are able to integrate research from cognitive science with classical and contemporary rhetorical theory and then to apply both to the taking apart and the putting together of effective legal arguments The combination of rhetorical analysis and cognitive science yields a new way of seeing and understanding legal persuasion one that promises theoretical and practical gains The work has three main functions First it brings together the leading models of persuasion from cognitive science and rhetorical theory blurring boundaries and leverage connections between the often separate spheres of science and rhetoric Second it illustrates this persuasive synthesis by working through concrete examples of persuasion from real life legal contexts In this way the book demonstrates the advantages of a deeper and more nuanced understanding of persuasion Third the volume assesses and explains why how and when certain persuasive methods and techniques are more effective than others The book is designed

to appeal to scholars in law rhetoric persuasion science and psychology to students learning the practice of law and to judges and practicing lawyers who engage in persuasion

Shakespeare and the Second World War Irene Rima Makaryk, Marissa McHugh, 2012-01-01 Shakespeare's works occupy a prismatic and complex position in world culture they straddle both the high and the low the national and the foreign literature and theatre The Second World War presents a fascinating case study of this phenomenon most if not all of its combatants have laid claim to Shakespeare and have called upon his work to convey their society's self image In wartime such claims frequently brought to the fore a crisis of cultural identity and of competing ownership of this universal author Despite this the role of Shakespeare during the Second World War has not yet been examined or documented in any depth Shakespeare and the Second World War provides the first sustained international collaborative

incursion into this terrain The essays demonstrate how the wide variety of ways in which Shakespeare has been recycled reviewed and reinterpreted from 1939 1945 are both illuminated by and continue to illuminate the War today **The**

**Second World War in the Air** Merfyn Bourne, 2013 This book is a complete narrative history of the Second World War in the air which starts by describing the early days of flight in order to put military air power in context when World War Two began It then moves on to a step by step coverage of the air combat in each theatre of war Offering a comprehensive history that includes the lesser known campaigns such as the fighting in Burma Italy and East Africa as well as the air offensive in Western Europe and the struggle in the Pacific it also re examines the RAF bombing of German cities and the moral issues raised This is the first history of the air war to give full and proportionate coverage to the war in Russia which until now has been largely ignored The Second World War in the Air is a comprehensive review of the air war It s meticulously researched readable and remains in touch with what the fighting meant for individuals in the various combatant nations **Grandeur**

**And Misery** Anthony Adamthwaite, 2014-03-04 A central question in European history is how did a great power pre eminent in 1918 lie defeated by the same enemy less than 20 years later Until recently the explanation has been sought in fundamental weaknesses that could only leave the French of 1940 hamstrung and demoralized Recent studies have challenged that view and now for the first time the revisionist approach is displayed in a single volume both summarizing the research of others and drawing on the author s own work in the archives The book is about as far from dry as dust diplomatic history as it s possible to get Its very readable and the author manages to show with the telling anecdote that even a serious subject has its comic side that for instance the French High Command kept forces stationed in the Alps for seven years because no one in the foreign service had thought to pass on news about a secret treaty between Italy and France in 1902 or that after a particularly stressful meeting Andrew Bonar Law the British prime minister mouth to Poincar the French president through the closed carriage window of his train and you go to hell all the while smiling and exuding affability Such episodes are not the substance of the book but they oil its progress **Allied Communication to the Public During the**

**Second World War** Simon Eliot, Marc Wiggam, 2019-11-14 In the Second World War the home fronts of many countries became as important as the battle fronts As governments tried to win and hold the trust of domestic and international audiences communication became central to their efforts This volume offers cutting edge research by leading and emerging scholars on how information was used distributed and received during the war With a transnational approach encompassing Germany Iberia the Arab world and India it demonstrates that the Second World War was as much a war of ideas and influence as one of machines and battles Simon Eliot Marc Wiggam and the contributors address the main communication problems faced by Allied governments including how to balance the free exchange of information with the demands of national security and wartime alliances how to frame war aims differently for belligerent neutral and imperial audiences and how to represent effectively a variety of communities in wartime propaganda In doing so they reveal the contested and

transnational character of the ways in which information was conveyed during the Second World War Allied Communication during the Second World War offers innovative and nuanced perspectives on the thin border between information and propaganda during this global war and will be vital reading for World War II and media historians alike Germany and the Second World War, 1990 This is the second in the comprehensive ten volume Germany and the Second World War The five volumes so far published in German take the story to the end of 1941 and have achieved international acclaim as a major contribution to historical study Under the auspices of the Militargeschichtliches Forschungsamt Research Institute for Military History a team of renowned historians has combined a full synthesis of existing material with the latest research to produce what will be the definitive history of the Second World War This volume surveys the first year of the war deliberately begun by Nazi Germany The authors examine the train of interconnected political and military events and set military operations against the background of Hitler's war policy and general aims both immediate and long term The authors show that the conflict took a course quite different from that which Hitler had intended but nevertheless resulted in a series of conquests for the Third Reich
