Maria's Comet Deborah Hopkinson, 2013-07-23 Maria longs to be an astronomer wish that burns as brightly as a star But girls in the nineteenth century don't grow up to be scientists especially those who are needed at home Each night when her papa sweeps the sky with his telescope Maria sweeps the floor below imagining all the strange worlds he can travel to from the rooftop of their Nantucket home Then one night Maria finally gets her chance to look through her papa's telescope For the first time she beholds the night sky stretching endlessly above her and her dream of exploring the comets and constellations seems close enough to touch

Loosely based on the childhood of Maria pronounced ma RYE ah Mitchell America's first woman astronomer and illuminated by Deborah Lanino's star swept illustrations here is an exquisitely told story of a girl who yearns for adventure beyond her limited circumstances and sets out to follow her heart

Maria x Maria Kaoru Kawakata, Mizuki slowly found out about her past with Tomiya but before she confront the matter to her she saw something heartbreaking in the infirmary Attacked with the disappointment Mizuki ran away from Seryo Meanwhile Tomiya was staring at the back of Seryo who ran for Mizuki this is the beginning of our revenge

Maria Mitchell and the Sexing of Science Renée L. Bergland, 2008 New England blossomed in the nineteenth century producing a crop of distinctively American writers along with distinguished philosophers and jurists abolitionists and scholars A few of the female stars of this era Emily Dickinson Margaret Fuller and Susan B Anthony for instance are still appreciated but there are a number of intellectual women whose crucial roles in the philosophical social and scientific debates that roiled the era have not been fully examined Among them is the astronomer

Maria Mitchell She was raised in isolated but cosmopolitan Nantucket a place brimming with enthusiasm for intellectual culture and hosting the luminaries of the day from Ralph Waldo Emerson to Sojourner Truth Like many island girls she was encouraged to study the stars Given the relative dearth of women scientists today most of us assume that science has always been a masculine domain But as Renee Bergland reminds us science and humanities were not seen as separate spheres in the nineteenth century indeed before the Civil War women flourished in science and mathematics disciplines that were considered less politically threatening and less profitable than the humanities Mitchell apprenticed with her father an amateur astronomer taught herself the higher math of the day and for years regularly swept the clear Nantucket night sky with the telescope in her rooftop observatory In 1847 thanks to these diligent sweeps Mitchell discovered a comet and was catapulted to international fame Within a few years she was one of America's first professional astronomers as computer of Venus a sort of human calculator for the U S Navy's Nautical Almanac she calculated the planet's changing position After an intellectual tour of Europe that included a winter in Rome with Sophia and Nathaniel Hawthorne Mitchell was invited to join the founding faculty at Vassar College where she spent her later years mentoring the next generation of women astronomers Tragically opportunities for her students dried up over the next few decades as the increasingly male scientific establishment began to close ranks Mitchell protested this cultural shift in vain The woman who has peculiar gifts has a definite line marked out for her she wrote and the call from God to do his work in the field of scientific investigation may be as imperative as that which calls the missionary into the moral field or the mother into the family The question whether women have the capacity for original investigation in science is simply idle until equal opportunity is given them In this compulsively readable biography Renee Bergland chronicles the ideological academic and economic changes that led to the original sexing of science now so familiar that most of us have never known it any other way The best thing in its line since Dava Sobel's *Longitude* Maria Mitchell and the Sexing of Science tells a great if too little known story of an intellectual woman in 19th century New England And it is beautifully told I simply could not put it down Anyone who cares about women's education in America should read this compelling and indispensable book Robert D Richardson author of *Henry Thoreau A Life of the Mind* Emerson The Mind on Fire and William James In the Maelstrom of American Modernism Renee Bergland recounts the story of Maria Mitchell's life and work in glorious and careful detail One feels and hears the sounds of Mitchell's native Nantucket her adopted Vassar and comes to understand how one of the gentler sex advanced astronomy in her day Londa Schiebinger author of *Has Feminism Changed Science* [Sisterhood Is Global](#) Robin Morgan, 2016-03-08 A powerful and essential anthology that sheds light on the status of women throughout the world Hailed by Alice Walker as one of the most important human documents of the century this collection of groundbreaking essays examines the global status of women's experiences from oppression to persecution Originally published in 1984 the compilation features pieces written by a diverse set of powerful women journalists politicians grassroots activists and scholars from seventy countries Author Robin Morgan a

champion of women's rights herself expertly weaves these inspiring essays into one comprehensive feminist text. These compelling herstories contain thoroughly researched statistics on the status of women throughout the world. Each chapter focuses on a different country and includes data on education, government, marriage, motherhood, prostitution, rape, sexual harassment, and sexual preference. *Sisterhood Is Global* transcends political systems and geographical boundaries to unite women and their experiences in a way that remains unequalled even decades after its first publication.

Legend has it that males in the Seryo household are bound to be luckless when it comes to women. Masaki Seryo, a 15-year-old high school student, is a testament to this. As he hopes to leave his nagging, female-dominated family behind and moves to the dorms, he falls into an even more baffling situation involving the same thing he's attempted to escape: women.

A Companion to Javier Marías David K. Herzberger, 2011

This book provides the most comprehensive study to date of the full range of Marías's writing, including discussion and analysis of his literary and intellectual formation, his development as a novelist and short story writer, and his unique perspective offered in nearly twenty-five years of newspaper columns on topics ranging from religion to football. Above all, Marías is examined as a writer of fictions. As a translator of several canonical works from English to Spanish, Marías came to appreciate the preciseness of words as well as their ambiguity, their capacity to represent as well as their propensity to distort. The author examines Marías's constant awareness of how language can be used to construct stories as the foundation for engaging the world as well as for imagining it. The nature of Marías's storytelling and the way in which he imagines form the principal focus of this Companion. Publisher description.

No Girls in the Clubhouse Marilyn Cohen, 2009-04-22

Even though teenaged girl Jackie Mitchell once struck out Babe Ruth and Lou Gehrig, women are still striking out on the hardball diamond. This book builds on recently published histories of women as amateur and professional players, umpires, sports commentators, and fans to analyze the cultural and historical contexts for excluding females from America's pastime. Drawing on anthropological and feminist perspectives, the book examines the ways that constructions of women's bodies and normative social roles have pushed them toward softball instead of baseball. Sportswriter accounts, Title IX sex discrimination suits, and interviews with players explore the obstacles and the social isolation of females who join all-male baseball teams while also discussing policies that inhibit the practice.

Hollywood and Catholic Women Kathryn Schleich,2012-03 In this second edition of her exploration of Catholic women in film and television author Kathryn Schleich presents an in depth feminist point of view while addressing important questions about the role of women in both the Church and Hollywood Throughout Schleich s extensive research she noticed that themes of fear mistrust and even hatred of women were prevalent While examining such deeply ingrained attitudes it soon became evident to Schleich that Catholic women still have a long way to go in Hollywood As she carefully explores the sexual tension between Sister Benedict and Father O Malley in *The Bells of St Mary s* the brutal murder of Theresa Dunn in *Looking for Mr Goodbar* and the stereotype shattering Grace Hanadarko of *Saving Grace* Schleich offers an insightful portrayal of women s oppression within the Catholic Church and explores whether Catholic women are better off today This study encourages contemplation of the place of Catholic women within the ever changing spheres of cinema and television ultimately encouraging movement toward the goal of achieving equal status for women in all realms of life
