Bulletin of the Atomic Scientists ,1986-04 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world *Environmental Change and Security Project Report* ,1998 *Undercurrents of Ethnic Conflicts in Kenya* John O. Oucho, 2002-01-01 This book provides graphic and scholarly perspectives of ethnic conflict in Kenya where ethnocentrism has grown with time and where both ethnic and administrative units are coterminous As the country s Rift Valley attracted in migration since independence in 1963 it became the seedbed of a simmering ethnic strife that exploded in 1991-93 causing a flood of internally displaced people IDP and grinding agricultural activity and economic enterprise to a halt

Jack A. Goldstone, 1991-04-02 What can the great crises of the past teach us about contemporary revolutions Arguing from an exciting and original perspective Goldstone suggests that great revolutions were the product of ecological crises that occurred when inflexible political economic and social institutions were overwhelmed by the cumulative pressure of population growth on limited available resources Moreover he contends that the causes of the great revolutions of Europe the English and French revolutions were similar to those of the great rebellions of Asia which shattered dynasties in Ottoman Turkey China and Japan The author observes that revolutions and rebellions have more often produced a crushing state orthodoxy than liberal institutions leading to the conclusion that perhaps it is vain to expect revolution to bring democracy and economic progress Instead contends Goldstone the path to these goals must begin with respect for individual liberty rather than authoritarian movements of national liberation Arguing that the threat of revolution is still with us Goldstone urges us to heed the lessons of the past He sees in the United States a repetition of the behavior patterns that have led to internal decay and international decline in the past a situation calling for new leadership and careful attention to the balance between our consumption and our resources Meticulously researched forcefully argued and strikingly original *Revolutions and Rebellions in the Early Modern World* is a tour de force by a brilliant young scholar It is a book that will surely engender much discussion and debate

Immigration Phobia and the Security Dilemma Mikhail A. Alexseev, 2006 Immigration phobia is a paradoxical global phenomenon neither theories that link conflict to symbolic and realistic threats nor the contact hypothesis can systematically explain intense anti migrant alarmism and exclusionism toward marginally small migrant minorities Through a careful comparative study of immigration attitudes in the Russian Far East the EU and the United States this book is the first to demonstrate that concerns about national identity and economic interests associated with migration are themselves ignited by a unique perceptual logic of the security dilemma Regression analysis and case studies trace support for expulsion of migrants to human yearning for pre-emptive self defense under uncertainty Alarmism and hostility arise from ambiguities about immigration consequences and migrants motivations Framing migration as a national security problem is therefore logical but counterproductive The book instead recommends managing migration through economic incentives and new institutions at the global national and local level

Congrès International de la Population, Florence 1985, 5-12 Juin, 1985 *Environmental Security and Gender* Nicole Detraz, 2014-08-21 Over the past 20 years scholars policymakers and the media have increasingly recognized the links between both traditional and non traditional security issues and the changing condition of the global environment Concepts such as environmental security and resource conflict have been used to hint at these significant linkages While there has been a good deal of scholarly work conducted that seeks to identify the ways that actors link these concepts there has been little examination of the intersection between approaches to environmental security and gender This book explores this intersection to provide an insight into the gendered nature of both global environmental politics and security studies It examines how the issues of security and the environment are linked to theory and practice and the extent to which gender informs these discussions By adopting a feminist environmental security discourse this book provides crucial redefinitions of key concepts and offers new insights into the ways we understand security environment connections Case studies evaluate if and how environment and security discourses are being used to understand a range of environmental issues and how a feminist environmental security discourse contributes to our understanding of security environment connections This multidisciplinary volume draws on literature from the environmental sciences security studies and sociology to highlight the complex human insecurities that often accompany environmental change As conceptualizations of security continue to shift and broaden to include environmental issues and concerns it is imperative that gender informs the debate

Demography and the Global Business Environment Marcus, Alfred A., Islam, Mazhar, 2021-11-23 Alfred A Marcus and Mazhar Islam examine how demographic changes introduce new challenges for businesses with a focus on how the world today is divided between

disproportionately old and young nations Taking a broad international perspective the book illustrates how demography affects underlying conditions in nations presenting the risks and opportunities for businesses as well as a set of concrete obligations they owe to the nations in which they operate

Challenge of Japan Before World War II Nazli Choucri, Robert C. North, Susumu Yamakage, 2013-08-21 First published in 1993 This book examines the relationships between the economic political and strategic expansion of a country and its tendency towards conflict and war The authors use the example of Japan to demonstrate that it is uneven economic development and the search for basic resources and markets that often set the stage for war and international conflict Thus the pursuit of legitimate national goals for example the expansion of a nation s industrial base may put it into competitive potentially conflicting relationships with countries with similar objectives The names of the authors will attract all International Relations scholars who will know Choucri and North s Nations in Conflict and will have been awaiting the outcome of their fifteen years of research on Japan The book is also invaluable reading for advanced undergraduate and postgraduate students of Japan and other Asian area studies political economy and political science
