**Politics in Georgia** Arnold Fleischmann,Carol Pierannunzi,2010-01-25 In keeping with the state s major demographic upheavals of recent decades Georgia politics is an interesting and sometimes volatile mix of tradition and change In contrast to the state s rural past most Georgians now live in cities or suburbs and more than 40 percent of the population was born outside the state However religion and race remain issues that politicians ignore at great peril and the state still fares poorly in measures of poverty education and voter turnout Politics in Georgia uses a comparative framework to examine four major topics the foundations of contemporary Georgia politics political participation major political

*Electoral Politics Is Not Enough* Peter F. Burns, 2012-02-16 Focusing on four medium sized northeastern cities with strong political traditions *Electoral Politics Is Not Enough* analyzes conditions under which white leaders respond to and understand minority interests Peter F Burns argues that conventional explanations including the size of the minority electorate the socioeconomic status of the citizenry and the percentage of minority elected officials do not account for variations in white leaders understanding of and receptiveness toward African American and Latino interests Drawing upon interviews with more than 200 white and minority local leaders and through analysis of local education and public safety policies he finds that unconventional channels namely neighborhood groups and community based organizations strongly influence the representation of minority interests

**Black Social Capital** Marion Orr, 1999 Deindustrialization white flight and

inner city poverty have spelled trouble for Baltimore schools Marion Orr now examines why school reform has been difficult to achieve there revealing the struggles of civic leaders and the limitations placed on Baltimore's African American community as each has tried to rescue a failing school system Examining the interplay between government and society Orr presents the first systematic analysis of social capital both within the African American community black social capital and outside it where social capital crosses racial lines Orr shows that while black social capital may have created solidarity against white domination in Baltimore it hampered African American leaders capacity to enlist the cooperation from white corporate elites and suburban residents needed for school reform Orr examines social capital at the neighborhood level in elite level interactions and in intergovernmental relations to argue that black social capital doesn't necessarily translate into the kind of intergroup coalition needed to bring about school reform He also includes an extensive historical survey of the black community showing how distrust engendered by past black experiences has hampered the formation of significant intergroup social capital The book features case studies of school reform activity including the first analysis of the politics surrounding Baltimore's decision to hire a private for profit firm to operate nine of its public schools These cases illuminate the paradoxical aspects of black social capital in citywide school reform while offering critical perspectives on current debates about privatization site based management and other reform alternatives Orr's book challenges those who argue that social capital alone can solve fundamentally political problems by purely social means and questions the efficacy of either privatization or black community power to reform urban schools **Black Social Capital** offers a cogent conceptual synthesis of social capital theory and urban regime theory that demonstrates the importance of government politics and leadership in converting social capital into a resource that can be mobilized for effective social change
