Cosmos, Values, and Consciousness in Latin American Digital Culture Angelica J. Huizar,2020-05-19 This book understands digital cultural production of electronic literatures and digital art by looking at electronic and digital works that produce subjective positionality clouded knowledges of quantum theories and metaphysical patterns grounded in a cultural ideology This book underlines a conceptual framework for understanding how digital media impacts reading approaching and even interpreting social reality The qualitative analyses interpret the current zeitgeist and the works selected speak of the diverse sometimes regionalized and often multi ethnic reality of the Latin American experience The analyses elaborate on how artists reflect both the world they live in and a universal consciousness These artists are not simply digitalizing literature and these works are more than techy creations rather they make us think of other directions and connections

Elderflora Jared Farmer,2022-10-18 The epic story of the planet s oldest trees and the making of the modern world Humans have always revered long lived trees But as historian Jared Farmer reveals in Elderflora our veneration took a modern turn in the eighteenth century when naturalists embarked on a quest to locate and precisely date the oldest living things on earth The new science of tree time prompted travelers to visit ancient specimens and conservationists to protect sacred groves Exploitation accompanied sanctification as old growth forests succumbed to imperial expansion and the

industrial revolution Taking us from Lebanon to New Zealand to California Farmer surveys the complex history of the world's oldest trees including voices of Indigenous peoples religious figures and contemporary scientists who study elderflora in crisis In a changing climate a long future is still possible Farmer shows but only if we give care to young things that might grow old Winner of the 2023 Jacques Barzun Prize in Cultural History **El retorno de lo sagrado** . Riutort,2021-09-09 Este volumen quiere reflejar el retorno de lo sagrado que se está dando en esta época postmoderna después de siglos de creciente secularización Los diferentes artísticos que lo componen son muestras de las multiformes maneras en que el acontecer de lo sagrado puede tener lugar en el mundo Algunos textos son reflejo de experiencias directas en las religiones tratadas otros son aproximaciones desde fuera pero desde la atracción hacia lo religioso otros reflexiones filosóficas desde dentro de la tradición y otros son estudios históricos de fenómenos donde se da este retorno de lo sagrado Todos estos estudios muestran cómo la dimensión religiosa vuelve de manera renovada y revitalizada llena de espiritualidad y creatividad diferente a la religiosidad premoderna **Memories of 1968** Ingo Cornils,Sarah Waters,2010 Some years figure more

Flaherty,2016-08-16 In 1968 Mexico prepared to host the Olympic games amid growing civil unrest The spectacular sports facilities and urban redevelopment projects built by the government in Mexico City mirrored the country's rapid but uneven modernization In the same year a street savvy democratization movement led by students emerged in the city Throughout the summer the 68 Movement staged protests underscoring a widespread sense of political disenfranchisement Just ten days before the Olympics began nearly three hundred student protestors were massacred by the military in a plaza at the core of a new public housing complex In spite of institutional denial and censorship the 1968 massacre remains a touchstone in contemporary Mexican culture thanks to the public memory work of survivors and Mexico's leftist intelligentsia In this highly original study of the afterlives of the 68 Movement George F Flaherty explores how urban spaces material but also literary photographic and cinematic became an archive of 1968 providing a framework for de facto modes of justice for years to come *In Search of Julián Carrillo and*

Sonido 13 Alejandro L. Madrid,2015-08-04 In the 1920s the Mexican composer Julián Carrillo 1875-1965 developed a microtonal system called El Sonido 13 The 13th Sound Although his pioneering role as one of the first proponents of microtonality within the Western art music tradition elevated Carrillo to iconic status among European avant garde circles in the 1960s and 1970s his music and legacy have remained largely overlooked by music scholars critics and performers Confronting this paucity of scholarship on Carrillo and his music Alejandro L Madrid goes above and beyond filling in the historical record Combining archival and ethnographic research with musical analysis and cultural theory Madrid argues that Carrillo and Sonido 13 are best understood as a cultural complex a network of moments spaces and articulations in which

Carrillo and his music continuously re acquire significance and meaning Thus Madrid explores Carrillo s music and ideas not only in relation to the historical moments of their inception but also in relation to the various cultural projects that kept them alive and re signified them through the beginning of the twenty first century Eschewing traditionally linear historical frameworks In Search of Juli n Carrillo and Sonido 13 employs an innovative transhistorical narrative in which past present and future are explored dialogically in order to understand the politics of performance and self representation behind Carrillo and Sonido 13 In Search of Juli n Carrillo and Sonido 13 transforms the traditional genre of the composer study treating it not as a celebration of masters and masterworks but as a pointed postcolonial intervention that offers invaluable insight into the politics of cultural exchange experimentalism marginality and cultural capital in twentieth century Mexico
