Hartemink, Alex B. McBratney, Maria de Lourdes Mendonça-Santos, 2008-07-11 Significant technological advances have been few and far between in the past approximately one hundred years of soil survey activities Perhaps one of the most innovative techniques in the history of soil survey was the introduction of aerial photographs as base maps for land mapping which replaced the conventional base map laboriously prepared by planimeter and alidade Such a relatively simple idea by today's standards revolutionized soil surveys by vastly increasing the accuracy and efficiency Yet even this innovative approach did not gain universal acceptance immediately and was hampered by a lack of aerial coverage of the world funds to cover the costs and in some cases a reluctance by some soil mappers and cartographers to change Digital Soil Mapping DSM which is already being used and tested by groups of dedicated and innovative pedologists is perhaps the next great advancement in delivering soil survey information However like many new technologies it too has yet to gain universal acceptance and is hampered by ignorance on the part of some pedologists and other scientists DSM is a spatial soil information system created by numerical models that count for the spatial and temporal variations of soil properties based on soil formation and related environmental variables Lagacherie and McBratney 2007 **Regional Geology of Czechoslovakia** Ústřední ústav geologický (Czech Republic), 1966 **Selected Water Resources Abstracts**, 1990 **Ecosystem Services of Headwater Catchments** Josef Křeček, Martin Haigh, Thomas Hofer, Eero Kubin, Catrin Promper, 2017-07-12 This book addresses the evaluation of environmental impacts and services identified in headwaters of different eco zones around the world It presents 24 papers selected from contributions to recent meetings of the European Forestry Commission Working Party on the Management of Mountain Watersheds which is coordinated by the FAO Food and Agriculture Organization of the United Nations Through its biennial sessions and inter session activities the Working Party focuses on the continuous exchange of knowledge and experience
