Regional Development in a Modern European Economy Robert Leonardi, Raffaella Nanetti, 1994 Since Tuscany was targeted as an Objective Two area to reverse industrial decline its development has made it a European Union success story This volume brings together for the first time in English a team of experts to examine the Tuscan Model of development and its link with European integration All aspects of the economy are examined from the textile industry to tourism It is shown that Tuscany has benefited from European integration and regional decentralisation with an expanding export market to other EU countries Crucially the principles and practice approach demonstrates how the model can be applied to other such regions and the book has applicability beyond the immediate scope of study Given the absolute necessity of a coherent industrial policy at European level this volume is an invaluable reference for students scholars and practitioners alike BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

Unraveled Elizabeth L. Krause, 2009-09-17 Deftly bridging literary conventions this compelling work exposes the cultural origins of a quiet revolution that occurred over the course of the twentieth century

Elizabeth Krause combines novelistic and ethnographic techniques to illuminate population dynamics that have raised alarm across Europe and the United States and manifested for example in Italy's extremely low birthrate. But what actually motivates people to have fewer children? Krause turns to the evocative story of one woman, Emilia Raugei, who was born in a Tuscan hill town in 1920 and worked as a straw weaver in a rapidly globalizing economy to better understand this question. Based on extensive fieldwork including in-depth conversations with Emilia herself, Krause draws on her rich and unconventional memories to create an engaging portrait of life in a rural village during Mussolini's rise to power. It is a tale of migration, love and loss, political turmoil and the struggle to make a living during hard times. Giving voice to a largely silent history that is at once local and global, *Unraveled: A Weaver's Tale of Life Gone Modern* will challenge us to find innovative approaches to understanding the transformative shift to a modern way of life. Politics in Europe M. Donald Hancock, Michelle Hale Williams, Marjorie Castle, Christopher J. Carman, David P. Conradt, Alan Convery, Robert Leonardi, Raffaella Y. Nanetti, Jan Teorell, Sofia Tipaldou, 2024-02-13 *Politics in Europe* introduces students to the power of the EU and seven political systems: the UK, France, Germany, Italy, Sweden, Russia, and Poland, while addressing key social and political issues including globalization, terrorism, immigration, gender, and religion. The Connected City Zachary P. Neal, 2012-08-06 *The Connected City* explores how thinking about networks helps make sense of modern cities: what they are, how they work, and where they are headed. Cities and urban life can be examined as networks, and these urban networks can be examined at many different levels. The book focuses on three levels of urban networks: micro, meso, and macro. These levels build upon one another and require distinctive analytical approaches that make it possible to consider different types of questions. At one extreme, micro urban networks focus on the networks that exist within cities, like the social relationships among neighbors that generate a sense of community and belonging. At the opposite extreme, macro urban networks focus on networks between cities, like the web of nonstop airline flights that make face-to-face business meetings possible. This book contains three major sections organized by the level of analysis and scale of network. Throughout these sections, when a new methodological concept is introduced, a separate method note provides a brief and accessible introduction to the practical issues of using networks in research. What makes this book unique is that it synthesizes the insights and tools of the multiple scales of urban networks and integrates the theory and method of network analysis.

The Social Context of Economic Change in Britain Terrence Casey, 2002 This book examines a period of dramatic economic change in Britain during the Thatcher era.

The Italian Urban System Piero Bonaverio, Giuseppe Dematteis, Fabio Sforzi, 2019-06-04 First published in 1999, this volume situates the Italian urban system within a European context, examining the best approach to integration. achieving social and economic cohesion and competitiveness as per the Treaty of Maastricht and the White Paper Growth Competitiveness Employment 1993 This book aids this endeavour through featuring contributions on cities as nodes of transport networks economic change the demographic transition the local milieu regional cohesion and global networks and how the system can integrate into European urban networks *Government and Politics of Italy* Robert Leonardi, 2017-09-12 The political history of Italy has been an undeniably turbulent one The country's political system has been repeatedly threatened by the historical existence of extremist parties on the left and right an economy which struggles to adapt the cleavage between a developed north and an underdeveloped south the challenge posed by terrorist groups and organized crime high public debt and governments that last on average only ten months Paradoxically however Italy continues to muddle through from one political crisis to another with one of the world's highest standards of living and quality of life What is the secret of Italian politics *The Coherence of EU Regional Policy* John Bachtler, Ivan Turok, 2013-12-16 This book brings together a rich selection of up to date practical experience of EU regional policy from across Europe It provides different perspectives on the design and operation of regional development strategies under the Structural Funds from people closely involved in studying managing or advising on the process at EU national and regional levels It therefore offers a more comprehensive and detailed understanding of the structural policies than has been available hitherto This will prove particularly useful to researchers practitioners and students interested in European regional policies and processes *Clusters, Networks and Innovation* Stefano Breschi, Franco Malerba, 2005-12-22 Examining the role of the much vaunted concepts of regional clusters in the prosperity and economic expansion of countries this work looks at the different experiences of industrial districts and high tech regions such as Silicon Valley Boston's biotech region and Hsinchu Taipei *Tight Knit* Elizabeth L. Krause, 2018-08-17 The coveted Made in Italy label calls to mind visions of nimble fingered Italian tailors lovingly sewing elegant high end clothing The phrase evokes a sense of authenticity heritage and rustic charm Yet as Elizabeth L. Krause uncovers in *Tight Knit* Chinese migrants are the ones sewing Made in Italy labels into low cost items for a thriving fast fashion industry all the while adding new patterns to the social fabric of Italy's iconic industry Krause offers a revelatory look into how families involved in the fashion industry are coping with globalization based on longterm research in Prato the historic hub of textile production in the heart of metropolitan Tuscany She brings to the fore the tensions over value money beauty family care and belonging that are reaching a boiling point as the country struggles to deal with the same migration pressures that are triggering backlash all over Europe and North America *Tight Knit* tells a fascinating story about the heterogeneity of contemporary capitalism that will interest social scientists immigration experts and anyone curious about how globalization is changing the most basic of human conditions making a living and making a life *A Handbook of Industrial Districts* Giacomo Becattini, Marco Bellandi, Lisa De Propris, 2014-05-14 *A Handbook of Industrial Districts* is a very well organized and structured collection of scientific works on the theory of industrial districts
