Dr. TALWAR SABANNA,2018-07-21 Migration from one area to another in search of improved livelihood is a key feature of human history While some regions and sectors fall behind in their capacity to support populations other move ahead and people migrate to access these emerging opportunities Industrialization widens the gap between rural and urban areas including a shift of the workforce towards industrializing areas There is extensive debate on the factors that causes population to shift from those that emphasize individual rationality and household behavior to those that cite the structural logic of capitalist development *Empowering Women in Work in Developing Countries* Maarten van Klaveren,K.

Tijdens,2012-11-13 Presents the outcomes of a major 14 country project aimed at empowering girls and young women Provides a discussion of their choices in life comparing factors such as family background health education employment opportunities and the use of and access to the internet *International Remittance Payments and the Global Economy*

Bharati Basu,James T. Bang,2014-08-07 International Remittance Payments are described mainly as money sent by immigrants to their families and friends in their home countries These payments provide an important source of income that is mostly used to provide for a variety of basic needs of the non migrating members of immigrant families and thus remittance payments can be considered as a tool to reduce the poverty level of the labor sending countries However remittances are also used for asset accumulation by some families and for some countries they constitute a good part of foreign funds coming into the country In spite of their increasing volume over the last few decades a lot of things about remittances are not known and studies estimate that about half of these money transfers are not even recorded Since these payments are shown to reduce poverty and help economic progress in the remittance receiving countries a better knowledge about remittances would help the debates surrounding immigration remittances and their relation to the global economy This book provides an overview of remittances in different parts of the world over the last thirty years It looks at the labor sending and labor receiving countries separately The text examines the trends uses motivations behind sending remittances cost of sending them and how they are affected by the nature and the development level of different institutional factors The

remittance flows are growing over time and they are used mostly for reducing the uncertainty of life in the less developed parts of the world. However, motivation for sending remittances could be improved and thus remittances could be more conducive to economic development if 1) the relation between the remittance decision and the migration decision is better understood and 2) the costs of international money transfers are reduced. More studies about those issues would benefit the international community. Efforts should be made in all fronts to encourage such international flow of funds not only to have a redistribution of income all over the world but also to synchronize the efforts towards global economic development and a better integration of the world economy. This book is aimed at researchers, policy practitioners and post graduates studying International Economics or International Economic Relations or Political Science or Economic Development. Immigration and Regional Integration in a Globalizing World Christopher C. White, 2015-10-08. In *Immigration and Regional Integration in a Globalizing World* Christopher White makes an important contribution to the immigration debate by investigating the relationship between two of the most important forces shaping the current international system: international migration and regional integration. The ability to manage the movement of people across national borders is considered one of the primary responsibilities of the nation state but international migration always involves more than one country. The world has become increasingly globalized and international migration has followed suit. The vast majority of states have come to realize that successful and effective migration policies involve cooperation and coordination with other states, sometimes by choice and sometimes by necessity. However, these efforts both regionally and globally are often highly contentious and result in conflict internally and externally. Managing migration and integration are key concerns for governments in nearly every region of the world and will take on even greater importance as globalization and technological advances shrink distances and bring us closer together. White uses an evidence-based approach to understanding immigration and economic integration to debunk the migration myth that sees a strong connection between these two factors. Contrary to prevailing assumptions, the main argument is that there is no substantial relationship between international migration and regional integration despite the political rhetoric that generates enormous fear and anxiety surrounding these issues. Instead of conflating them, countries can consider the benefits of integration policies without worrying about migration and can consider migration policies without concern for integration. This book is for anyone concerned about the issue of immigration and its relationship to trade liberalization and regional integration. *Chains of Gold* Marcelo J. Borges, 2009. Why did migrants from southern Portugal choose Argentina instead of following the traditional path to Brazil? Starting with this question, this book explores how at the turn of the twentieth century rural Europeans developed distinctive circuits of transatlantic labor migration linked to diverse immigrant communities in the Americas. It looks at transoceanic moves in the larger context of migration systems, examining their connections and the crucial role of social networks in migrants' geographic mobility and adaptation. Combining regional and local perspectives on both sides of the Atlantic, *Chains of Gold* provides a vivid account of the trajectories of migrant men.

and women as they moved from rural Portugal to contrasting places of settlement in the Argentine pampas and Patagonia

South-south Migration and Remittances Dilip Ratha,William Shaw,2007 South South Migration and Remittances reports on preliminary results from an ongoing effort to improve data on bilateral migration stocks It sets out some working hypotheses on the determinants and socioeconomic implications of South South migration Contrary to popular perception that migration is mostly a South North phenomenon South South migration is large Available data from national censuses suggest that nearly half of the migrants from developing countries reside in other developing countries Almost 80 percent of South South migration takes place between countries with contiguous borders Estimates of South South remittances range from 9 to 30 percent of developing countries remittance receipts in 2005 Although the impact of South South migration on the income of migrants and natives is smaller than for South North migration small increases in income can have substantial welfare implications for the poor The costs of South South remittances are even higher than those of North South remittances These findings suggest that policymakers should pay attention to the complex challenges that developing countries face not only as countries of origin but also as countries of destination
