NAFTA has been described by one expert as being a partial customs union It is in any case a special kind of free trade area because it consists of two highly developed economies and one large third world economy In this book the contributors examine the specific interests of the three member countries Canada Mexico and the United States in the creation of NAFTA They also assess the influence of this trade area on their economics Looking to the future doubts are expressed about the feasibility of using NAFTA a hope expressed by the USA as a stepping stone in the creation of a Free Trade Area of the Americas Instead the contributors see the consolidation of MERCOSUR in Latin America and the creation of a new Trans Atlantic Market as proposed by Sir Leon Brittan as more likely developments

*Spatial Economic Science* Aura Reggiani,2012-12-06

With the dawn of the twenty first century comes the awareness that current rapid political economic social and technological transformations will affect our of living by producing new forms of information communications common way market work style and leisure In this context human behaviour will certainly change its fixed parameters It is likely that the relationships between internal structures and external influences between individual components and collective behaviour as well as between multi scale networks and interrelated dynamics will show spatio temporal patterns which will be difficult to predict by means of our usual tools As a consequence academic research is increasingly being required to play an active role in addressing new ways of understanding and forecasting the sets of interacting structures ranging from the technical to the organizational and from the social to the economic and political levels while at the same time incorporating concerns about the new economy environment society information and technology It is now evident that social science especially spatial and economic scienc needs innovative paths together with continuous cross fertilization among the many disciplines involved In order to investigate these intriguing perspectives we seem to have embarked on an era of methodological reflections rather than developing strong theoretical foundations This volume aims to provide an overview of these new insights and frontiers for theoretical methodological studies and research applications in the space economy
