Regional Competition Peter W.J. Batey, Peter Friedrich, 2013-03-14 Many parts of the world are currently experiencing the outcome of processes of economic integration globalization and transformation Technological advances in telecommunications and in transport facilities have opened up new possibilities for contracts and exchanges among regions External effects among regions have increased in importance As a result competition among regions has intensified Except some pioneering work by regional scientists and scholars of public finance and economics the phenomenon of regional competition has yet to attract the attention it warrants despite its importance for policy making The present volume is intended to remedy this neglect by providing high level contributions to the three main topics of the book the theory of regional competition methods of analysis of regional competition and policies of regional competition **Innovation, Agglomeration and Regional Competition** Charlie Karlsson, B. and service adaptation on the regional success of MNCs as well as the interaction effects of regional orientation and inter regional distance are investigated The model is evaluated by means of the partial least squares PLS method on the basis of a survey based inquiry of the Fortune Global 500 firms with success indicator data for a period of nine years The findings highlight the importance of considering the different degrees of contextual influence in the design of regional strategies where low degrees of regional management autonomy and high levels of regional product service adaptation are found to be appropriate for MNCs to be regionally successful International Encyclopedia of Human Geography ,2019-11-29

been grouped under the three main themes of economic social and environmental issues The economics sections include chapters dealing with trade finance and regulatory frameworks while the social theme covers health migration population ageing as well as overall social wellbeing The environmental theme examines matters such as measuring environmental performance natural disasters the ocean economy and the validity of the Sustainable Development Goals One major issue is the definition of small states As this volume demonstrates generally speaking population is used to measure country size in the literature However it clearly emerges that there is no real consensus as to the population cut off point that distinguishes small states from large ones While the approaches taken by the authors vary in all cases the chapters draw practical policy implications for small states The book can therefore be considered as a wide ranging depositary of information on small states with the aim of deriving policy prescriptions and thus as an excellent resource for academics students and policymakers

Federal Presence in Nigeria. The 'Sung' and 'Unsung' Basis for Ethnic Grievance Festus O. Egwaikhide, Victor A. Isumonah, Olumide S. Ayodele, 2009 Minorities of the oil producing states are seriously disturbed by the inequity that is

apparent from the existing principles of revenue allocation in Nigeria. In taking issues with them and other southern advocates of new revenue allocation criteria, the dominant north's organic intellectuals have always relied on the obvious concentration of economic and commercial activities in southern Nigeria to refute the argument that the north is the greater beneficiary of Nigeria's wealth. Scholarly contribution to the ethno-regional debate on the equity of resource allocation has been anchored to the same popular platform, namely the criteria for inter-governmental revenue allocation. It is as if they absolutely embody the revelation about equity or inequity of resource allocation in Nigeria where the federal government has retained between 48.5 per cent and 56 per cent of the federation account, let alone revenues unpaid into this account. This study marks a departure from the orthodox focus on Nigeria's ethnic problems, including the contentious demand of the southern minorities for an increase in the weight assigned the principle of derivation, by examining federal expenditures to determine the distribution of federal presence and thus winners and losers, bearing in mind that the entire country is federal government's coverage.

Economic Law Reforms in the ASEAN Emerging Economies Terukazu Suruga, Phanhpakit Onphanhdala, Yuka Kaneko, 2023-05-30 This book reviews the periodic changes in the legal policies of the late-developing ASEAN countries, often known as the CLMV countries: Cambodia, Laos, Myanmar, and Vietnam, in their continuous path toward globalization after the collapse of the socialist bloc. The book also identifies the characteristics of the legal reforms in their present stage, guided by the common framework under the ASEAN Economic

Community AEC moving toward 2025 The first stage is illustrated by the ASEAN style utilization of foreign investments as reflected in all investment laws and policies of CLMV countries in the 1990s which featured entry control as sticks and investment incentives as carrots Those controls and incentives were the means to induce investors to assume various performance requirements to contribute to industrial policies The second stage witnessed a shift toward enhanced liberalization as an endeavor toward the WTO accession during the 2000s as seen in the integrated investment laws that appealed for the national treatment of foreign investors At the same time those investment laws emphasized the substantive provisions e g fair and equitable treatment and indirect expropriation and procedural protections e g provision of Investor State Dispute Resolution mechanisms as an appeal for stabilization of the investment climate The third stage of legal policy as evidenced by the recent amendments to the investment laws is newly focused on environmental and social considerations which seems to be an indispensable response to the increasing social protests against the negative impacts of investment promotion Simultaneously the means of administrative controls over investors established in the first stage are uniquely utilized for the realization of new goals

Governing Cities Through Regions Roger Keil, Pierre Hamel, Julie-Anne Boudreau, Stefan Kipfer, 2016-12-12 The region is back in town Galloping urbanization has pushed beyond historical notions of metropolitanism City regions have experienced in Edward Soja's terms an epochal shift in the nature of the city and the urbanization process marking the beginning of the end of the modern metropolis as we knew it Governing Cities Through Regions broadens and deepens our understanding of metropolitan governance through an innovative comparative project that engages with Anglo American French and German literatures on the subject of regional governance It expands the comparative angle from issues of economic competitiveness and social cohesion to topical and relevant fields such as housing and transportation and it expands comparative work on municipal governance to the regional scale With contributions from established and emerging international scholars of urban and regional governance the volume covers conceptual topics and case studies that contrast the experience of a range of Canadian metropolitan regions with a strong selection of European regions It starts from assumptions of limited conversion among regions across the Atlantic but is keenly aware of the remarkable differences in urban regions path dependencies in which the larger processes of globalization and neo liberalization are situated and materialized
