Regional Convention On Protection Of Human Rights:

International Handbook of Inter-religious Education Kath Engebretson, Marian de Souza, Gloria Durka, Liam Gearon, 2010-08-17 This Handbook is based on the conviction of its editors and contributing authors that understanding and acceptance of as well as collaboration between religions has essential educational value The development of this Handbook rests on the further assumption that interreligious education has an important role in elucidating the global demand for human rights justice and peace Interreligious education reveals that the creeds and holy books of the world's religions teach about spiritual systems that reject violence and the individualistic pursuit of economic and political gain and call their followers to compassion for every human being It also seeks to lead students to an awareness that the followers of religions across the world need to be and to grow in dialogical relationships of respect and understanding An essential aim of interreligious education is the promotion of understanding and engagement between people of different religions and therefore it has great potential to contribute to the common good of the global community Interreligious education has grown from the interfaith movement whose beginning is usually identified with the World Parliament of Religions held in Chicago in 1893 This was the first time in history that leaders of the eastern and western religions had come together for dialogue and to consider working together for global unity

Human Rights Eva Brems, 2001-05-15 2 2 In the CRC *The Future of the United Nations System* Chadwick F. Alger, 1998 What does the future hold for the UN In this book twenty two scholars from all continents contribute twelve chapters that cover prevention of violence creating economic and social structures that sustain human fulfilment sharing and protecting the commons and peace education The search for future potential based on experience in these twelve laboratories leads to sixty six recommendations for new institutions and programs on issues that include controlling weapons humanitarian intervention collaboration between UN peacekeepers and NGOs human rights economic policies advancement of women refugees ecological security communications and peace education These recommendations are brought together in a concluding chapter and summarized in the appendix Most of the recommendations do not require amendments to the UN Charter or to the treaties establishing the UN Specialized Agencies Instead their implementation would require creative efforts of Member States secretariats NGOs and dedicated individuals that are pointed toward attainment of multilateral capacity for coping with an array of global problems that increasingly threaten the quality of human life This is stimulating reading for anyone who wants to be challenged to think creatively about the potential for coping with a growing array of global problems

Japan and International Law, Past, Present and Future Nisuke Ando, 2023-12-11 This book is a record of the international symposium held at the Kyoto International Conference Hall to mark the centennial of the Japanese Association of

International Law The purpose of the symposium was to reflect on past Japanese practice to analyze current problems affecting Japan and to seek to clarify the future role of Japan in the global community in terms of international law After joining the international community in the middle of the nineteenth century Japan adopted a policy of wealth creation and armament in order to maintain its independence against the expanding Western States At the same time on the domestic scene Japan vigorously promoted the modernization Westernization of its political economic and social institutions Japan emerged as one of the victorious Principal Allied and Associated Powers in World War I and started asserting its place in the international order However in the aftermath of the Great Depression Japan failed to reach agreement with the international community eventually left the League of Nations invaded the Asian continent and met with complete military defeat in World War II In the subsequent years Japan toiled to rebuild its economy and to rejoin the world community but despite its miraculous economic recovery and expansion Japan remains ambivalent in its policy of contributing to the maintenance of international peace and security During these one and a half centuries the Japanese practice of international law has covered a wide range of fields From these various fields the symposium took up three specific topics War and Peace Economy and Human Rights because of their relevance to past Japanese practice and because future Japanese practice in these areas would be bound to affect international law in the coming century In addition the symposium discussed Japanese transactions in general with international law The period covered by the symposium has witnessed many drastic changes in the world and international law which used to be applied almost exclusively to relations among the Western States has now come to be applied universally The Association wished to emphasize that an analysis of Japanese practice should be of significance for anyone interested in promoting and consolidating the rule of law in the world community at large

Conventions, Treaties And Other Responses To Global Issues - Volume II Gabriela Maria Kutting,2009-08-25

Conventions Treaties and other Responses to Global Issues is a component of Encyclopedia of Institutional and Infrastructural Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias This theme Conventions Treaties and other Responses to Global Issues deals with the issue of international resource regimes These are formal responses by states to the threats posed by trans boundary pollution or the distribution of resources In the past thirty years the number of international environmental agreements has steadily risen to reach record numbers and these agreements have secured a firm place in the hierarchy of international affairs There is a loose assumption that this is a good thing and that this rise has resulted in a commensurable improvement in environmental protection and resource allocation But is this actually the case In fact is there a positive correlation at all Or are there negative correlations What are the connections between environmental diplomacy and environmental protection and how can environmental protection be achieved These are just a few of the questions that will be addressed in this theme whilst at the same time giving an overview of the most important international resource regimes and the most influential international organizations having an environmental impact The theme takes the following shape the first section introduces issues of international environmental law and its history showing that international law can take many different forms Here we explain what policy tools states have in drafting responses to global environmental issues The second section deals with the most prominent international environmental agreements and gives a state of the art overview of existing regimes The third and last section of this theme introduces the key actors in the international arena besides states such as international organizations and civil society actors such as pressure groups These two volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs

Democracy: the Rule of Law and Islam Eugene Cotran,Adel Omar Sherif,2023-10-16

Established at the School for Oriental and African Studies in London in 1990 the Centre for Islamic and Middle Eastern Law CIMEL promotes the study and understanding of Islamic law and modern Middle East legal systems Over the years the Centre has developed a vast network of practitioners and scholars who participate in seminars and conferences on highly topical legal issues in the Middle East By engaging this network CIMEL has created an important forum for discussion on these issues The CIMEL Book Series reflects these unique discussions on such topics as on the legal aspects of the peace process or the role of the courts in the preservation of human rights and also includes monographs on related topics by leading experts in the field

Non-Governmental Organisations and International Law Prahlad Rai,2024-08-27

This book explores how non governmental organizations NGOs with their

sphere of influence within the State and beyond enrich the international community by working on critical areas affecting people's lives and expectations to facilitate a more humanising international law. It provides ideas, highlights issues and identifies actors' actions and the scope of NGOs in international law. It charts possibilities and limitations of NGOs within the legal framework of a State and its evolution over the years. The book highlights how NGOs having obtained consultative status from the UN Economic and Social Council have now extended their access and area of influence to international actors like inter-governmental organisations, international courts and tribunals. It provides an overview of NGOs' performance and the important role they play in the making of human rights protection of environment and business ethics. The book is primarily doctrinal containing case studies of important NGOs. The purview is an inquiry, analysis and overview of literature of NGOs in international law from a wide range of sources. The book will help shape the debate over power and functions of NGOs in the background of new loci of NGOs' work. It is useful for students, research scholars, the NGO community, corporations, CSR departments and concerned governmental agencies. Additionally, being interdisciplinary in nature, it caters to the demands of politics, sociology, management, public policy and social work apart from law.

UGC NET Law (Paper-II) Study Notes (Vol.-1) , Pakistan and International Law Ahmad Ghouri, 2025-10-23

Pakistan and International Law: Dynamics of Identity and State Practice offers a pioneering exploration of Pakistan's evolving relationship with international law. Framed through the lens of state identity, this volume critically examines how Pakistan as a post-colonial and Muslim majority state has engaged with, adapted to, and influenced international legal norms across diverse domains from the United Nations system to individual rights and environmental protection, interstate arbitration, right to development, security, water, taxation and more. The book features contributions from leading scholars and practitioners combining doctrinal analysis with critical perspectives rooted in Third World Approaches to International Law. It provides in-depth commentary on Pakistan's legislative, judicial and diplomatic practices offering a rare state-specific study that fills a significant gap in international legal scholarship. Readers will gain a nuanced understanding of Pakistan's legal landscape and its broader implications for global justice, legal pluralism, transnational legal discourses in international law and the future of international law. It offers valuable insights into how international law operates in diverse cultural and political contexts and how state identity shapes and is shaped by global legal norms. The work will be of interest to academics, legal practitioners, policymakers and students of international law, post-colonial legal studies, Islamic state practices and South Asian geopolitics.

Indonesia: Regional Conflicts and State Terror Mieke Kooistra, 2001-08-01

Indonesia is a state torn by vicious and prolonged conflicts which over recent years have claimed tens of thousands of lives and left nearly a million people displaced. Diverse as they are, these conflicts are sustained and exacerbated by a set of common factors including the role of the state's army, the extreme development gap between the island of Java and most of the outer regions, the effect of the government's policy of transmigrasi (forced migration) and its

political manipulation of religion This Report gives the historical background to the current conflicts starting with an overview of the recent history of Indonesia It then focuses on two of the main conflicts in Aceh and Maluku highlighting the factors that provoke and prolong the bloodshed The Report ends with a look at the current reforms and a discussion of the many issues facing Indonesia today The Report also offers a set of recommendations aimed at supporting peaceful solutions and respect for the human rights of all the population

The Foundations of International Investment Law Zachary Douglas, Joost Pauwelyn, Jorge E. Viñuales, 2014-05-01 International investment law is one of the fastest growing areas of international law It has led to the signing of thousands of agreements mostly in the form of investment contracts and bilateral investment treaties Also in the last two decades there has been an exponential growth in the number of disputes being resolved by investment arbitration tribunals Yet the legal principles at the basis of international investment law and arbitration remain in a state of flux Perhaps the best illustration of this phenomenon is the wide disagreement among investment tribunals on some of the core concepts underpinning the regime such as investment property regulatory powers scope of jurisdiction applicable law or the interactions with other areas of international law The purpose of this book is to revisit these conceptual foundations in order to shed light on the practice of international investment law It is an attempt to bridge the growing gap between the theory and the practice of this thriving area of international law The first part of the book focuses on the infrastructure of the investment regime or more specifically on the structural arrangements that have been developed to manage foreign investment transactions and the potential disputes arising from them The second part of the book identifies the common conceptual bases of an array of seemingly unconnected practical problems in order to clarify the main stakes and offer balanced solutions The third part addresses the main sources of regime stress as well as the main legal mechanisms available to manage such challenges to the operation of the regime Overall the book offers a thorough investigation of the conflicting theoretical positions underlying international investment law testing their worth by reference to concrete issues that have arisen in the jurisprudence It demonstrates that many of the most important practical questions arising in practice can be addressed by a carefully dosed resort to theory

International Law Anders Henriksen, 2023 International Law presents a student focused approach to the subject clearly written with non native English speaking students in mind a range of learning features highlight the areas of debate and encourage students to engage critically with key disputes Provides comprehensive and concise coverage of the central issues in public international law making this an ideal textbook for students taking short introductory courses at European law schools Takes a critical perspective on various aspects of international law introducing the controversies and areas of debate without assuming students prior knowledge of the topics discussed Supportive learning features including central issues boxes chapter summaries recommended reading and discussion questions highlight the essential points and encourage students to engage critically with the legal disputes
