Regional Innovation Strategies The Challenge For Less Favoured Regions:

Regional Innovation Strategies Kevin Morgan, Claire Nauwelaers, 2004-06-02 Regional Innovation Strategies offers the first comprehensive analysis of the new wave of innovation oriented regional policies It draws conclusions from the European Regional Technology Plans and Regional Innovation Strategies both in old industrialised areas and in regions where development is slow and compares this with US and Canadian experiences Anticipating the enlargement of the EU Regional Innovation Strategies also assesses the growing interest in the subject within policy academic and practitioner circles in Central and Eastern European countries This book aims to provide information on the new regional innovation policies and gives the first assessment of this promising pool of regional experiences Regional Innovation Strategies Kevin Morgan, 1998-03 This text offers a comprehensive analysis of the late 1990s wave of innovation oriented regional policies The text draws conclusions from the Regional Technology and Regional Innovation Strategies in Europe and compares them with US and Canadian experiences Regional Innovation Strategies Kevin Morgan, Claire Nauwelaers, Regional Studies Association (Seaford, England), 1999 Regional Innovation Strategies offers the first comprehensive analysis of the new wave of innovation oriented regional policies It draws conclusions from the European Regional Technology Plans and Regional Innovation Strategies both in old industrialised areas and in regions where development is slow and compares this with US and Canadian experiences Anticipating the enlargement of the EU Regional Innovation Strategies also assesses the growing interest in the subject within policy academic and practitioner circles in Central and Eastern European countries This book aims to provide information on the new regional innovation policies and gives the first assessment of this promising pool of regional experiences **Regional Innovation Policy for Small+Medium Enterprises** Bjørn T. Asheim, Arne Isaksen, Claire Nauwelaers, Franz Tödtling, 2003-08-26 A must read for academics and regional planners alike who wish to understand the workings of a regional innovation system The authors have given a fresh comprehensive and sound analysis which offers an excellent framework for regional innovation policy design Mikel Landabaso European Commission Brussels Belgium This book provides an extensive evaluation of the numerous policy instruments used by regional governments in Europe to promote innovation activity in Small and Medium sized Enterprises SMEs The instruments are compared and benchmarked in order to identify good practice in an effort to bridge the gap between the theory of regional innovation and real world policy implementation New Regionalism in Australia Mardelene Grobbelaar, 2018-01-18 New Regionalism promoted as a new paradigm of development by the OECD suggests that globalization is bringing together new technologies management employees and communities to form new patterns of local governance However despite the growing influence of New Regionalism in regional development policy in the West and increasingly in Australia there has been little debate about the relevance and application of these ideas in Australia Bringing together contributions from academics practitioners and policy makers this book redresses this imbalance by examining the theoretical and empirical foundations of this powerful

and growing school of thought locating the debate firmly in the Australian context With an opening chapter by Kevin Morgan Cardiff University who has been at the heart of the New Regionalism debate the book provides important insights into the theory and practice of New Regionalism in this vibrant region Innovation and Social Learning M. Gertler,D. Wolfe,2002-05-22 How well suited are the institutions of a region nation or international regime to the task of coping with the dramatic changes currently underway in the global economy This volume examines this issue **The Creative Class Goes Global** Charlotta Mellander,Richard Florida,Bjørn T. Asheim,Meric Gertler,2013-11-07 The whole landscape of research in urban studies was revolutionized by the publication of Richard Florida s *The Rise of the Creative Class* in 2002 and his subsequent book entitled *The Flight of the Creative Class* has helped to maintain a decade long explosion of interest in the field While these two books examine the creative class in the context of the United States research has emerged which investigates the creative class worldwide This book brings together detailed studies of the creative class in cities across the globe examining the impact of the creative class on growth and development The countries covered include the United Kingdom the Netherlands Germany Australia China Japan and Canada in addition to the United States Taken together the contributions deepen our understanding of the creative class and the various factors that affect regional development highlighting the similarities and differences between the creative class and economic development across countries This book will be of great interest to scholars of economic geography regional economics urban sociology and cultural policy as well as policy makers involved in urban development *The Empirical and Institutional Dimensions of Smart Specialisation* Philip McCann, Frank van Oort, John Goddard, 2016-11-25 Smart specialisation is the new policy approach to the development of regional innovation systems across Europe and it involves fostering innovative and entrepreneurial initiatives which are well tailored to the local context The different technologies skills profiles business activities institutions and sectors which reflect a region s economic strengths and potential are to be fostered and encouraged to diversify in ways which also exploit the region s linkages with broader global value chains Yet the ideas contained in the smart specialisation agenda have until now been primarily conceptual in nature *The Empirical and Institutional Dimensions of Smart Specialisation* draws together some of the leading regional economists and scientists in Europe to analyse how smart specialisation is working in practice This book investigates different dimensions of the agenda as it is developing across parts of Europe from both quantitative and qualitative perspectives The quantitative analysis examines the nature of the diversification processes undertaken by regions and the interplay between the chosen local regional development priorities and the wider global value chain impacts of these choices Meanwhile the qualitative analysis examines the institutional opportunities and challenges facing policy makers and the key elements most likely to provide the underpinnings of a workable set of policy settings The book is aimed both at academic researchers interested in the interface between economic geography and regional innovation systems as well as at policy makers making public policy decisions related to regional development at the local city regional or national

levels *Leadership and the City* Markku Sotarauta, 2015-11-06 The 21st century has been dominated by an almost compulsive race to find new pathways for city development As cities seek to regenerate via the knowledge based economy now more than ever dynamic leadership is required order to navigate new and complex challenges while building community This book is about generative leadership in knowledge city development Leadership and the City is rooted in a conviction that the leadership in a city is crucial in order for it to adjust strategically to major transformations and thus secure a good future for its inhabitants The book opens a fresh view of leadership by focusing on generative leaders and their modes of leading instead of spatial categorisations governance structures and or policy contents and processes It investigates generative leadership by elaborating the modes of leadership power and strategies in influence networks The key points are highlighted with several empirical cases These include Akron and Rochester USA Munich Germany Leeds UK Barcelona Spain as well as Helsinki Tampere and Seinäjoki Finland This book will be of interest to researchers and practitioners concerned with Leadership Urban Studies and Strategic Management Manufacturing in the New Urban Economy Willem van Winden, Leo van den Berg, Luis Carvalho, Erwin van Tuijl, 2010-10-04 This book looks at the changing link between manufacturing and knowledge based activities in urban regions drawing on insights from organization studies and regional economics and looking at case studies in Europe South America and Asia **The University and the City** John Goddard, Paul Vallance, 2013-02-11 Universities are being seen as key urban institutions by researchers and policy makers around the world They are global players with significant local direct and indirect impacts on employment the built environment business innovation and the wider society The University and the City explores these impacts and in the process seeks to expose the extent to which universities are just in the city or part of the city and actively contributing to its development The precise expression of the emerging relationship between universities and cities is highly contingent on national and local circumstances The book is therefore grounded in original research into the experience of the UK and selected English provincial cities with a focus on the role of universities in addressing the challenges of environmental sustainability health and cultural development These case studies are set in the context of reviews of the international evidence on the links between universities and the urban economy their role in place making and in the local community The book reveals the need to build a stronger bridge between policy and practice in the fields of urban development and higher education underpinned by sound theory if the full potential of universities as urban institutions is to be realised Those working in the field of development therefore need to acquire a better understanding of universities and those in higher education of urban development The insights from both sides contained in The University and the City provide a platform on which to build well founded university and city partnerships across the world **Urban Transformations** Nicholas Wise, Julie Clark, 2017-06-14 Economic restructuring and demographic change have in recent years placed much strain on urban areas with the effects falling disproportionately on neighbourhoods that were previously underpinned by industry and

manufacturing This has presented policy makers and city planners with a binary choice to resist change and stagnate or to change and attempt to keep up with the pace of global demand This edited book tells the story of how urban transformation impacts on people s lives and everyday interactions to question where and to whom benefit accrues from these changes Urban Transformations offers insight into both risk and reward as local communities and public authorities creatively address the challenge of building vital and sustainable urban environments The authors in this edited collection argue that understanding the specifics of community space and place is crucial to delivering insights into how where when why and for whom urban areas might successfully transform The chapters investigate urban change using a range of approaches and case studies from the four corners of the Earth from the United States to Iran from the United Kingdom to Canada The varying scales at which governance or regeneration initiatives operate the nature and composition of urban communities and the local or global interests of different private sector actors all raise questions for urban policy and practice It is important to not only consider the drivers of regeneration but its beneficiaries need to be identified This edited volume addresses and elaborates on critical issues facing urban transformation and renewal as a basis for future discussion on strategies for successful urban transformation

The London Olympics and Urban Development Gavin Poynter, Valerie Viehoff, Yang Li, 2015-07-24 As London sought to use the Olympics to achieve an ambitious programme of urban renewal in the relatively socially deprived East London it attracted global attention and sparked debate This book provides an in depth study of the transformation of East London as a result of the 2012 Summer Olympic and Paralympic Games Government and event organisers use legacies of urban renewal to justify hosting the world s leading sports mega event this book examines and evaluates those legacies The London Olympics and Urban Development the mega event city is composed of new research conducted by academics and policy makers It combines case study analysis with conceptual insight into the role of a sports mega events in transforming the city It critically assesses the narrative of legacy as a framework for legitimizing urban changes and examines the use of this framework as a means of evaluating the outcomes achieved This book is about that process of renewal with a focus on the period following the 2012 Games and the diverse social political and cultural implications of London s use of the narrative of legacy

Shrinking Cities Harry W. Richardson, Chang Woon Nam, 2014-03-14 This book examines a rapidly emerging new topic in urban settlement patterns the role of shrinking cities Much coverage is given to declining fertility rates ageing populations and economic restructuring as the factors behind shrinking cities but there is also reference to resource depletion the demise of single company towns and the micro location of environmental hazards The contributions show that shrinkage can occur at any scale from neighbourhood to macro region and they consider whether shrinkage of metropolitan areas as a whole may be a future trend Also addressed in this volume is the question of whether urban shrinkage policies are necessary or effective The book comprises four parts world or regional issues with reference to the European Union and Latin America national case studies the United States India China Korea

Taiwan Germany Romania and Estonia city case studies Detroit Buffalo Cleveland Naples Belfast and Halle and broad issues such as the environmental consequences of shrinking cities This book will be of interest to scholars and practitioners working in the fields of urban studies economic geography and public policy *Strategies for Shaping Territorial Competitiveness* Jesús M. Valdaliso, James R. Wilson, 2015-04-10 This book focuses on the main challenges that cities regions and other territories at sub national level face when it comes to designing and implementing a territorial strategy for economic development and competitiveness There is a widespread recognition that territories need to construct strategies that focus on shaping sustainable competitive advantages To do this they draw upon their own unique resources and capabilities alongside intelligence on existing technological and market trends However there is still a notorious lack of both theoretical and empirical research on this issue The first part of this book develops a theoretical framework for understanding and analysing territorial strategy This framework asks three questions of territorial strategy what for what and how looking closely at the key relationship between strategy and policy The second part is dedicated to exploring this framework in practice through application to a series of unique cases from around the world at different territorial levels from regions such as the Basque Country Navarre and Murcia in Spain Okanagan British Columbia in Canada Wales in the United Kingdom and the cross border region of the resund in Denmark Sweden as well as the city of Rafaela in Argentina Each case offers something different and enables the framework to be thoroughly tested generating concluding reflections that add real value for scholars and policy makers interested in and working in the field of territorial strategy This volume is intended for the academic community the policy community government leaders policy makers policy researchers and consultants and university students and teachers at different levels interested in the areas of territorial competitiveness regional development competitiveness policies and processes of territorial strategy *Territorial Development, Cohesion and Spatial Planning* Neil Adams, Giancarlo Cotella, Richard Nunes, 2012-08-06 This book examines some of the evolving challenges faced by EU regional policy in light of enlargement and to assess some of the approaches and trends in terms of territorial development policy and practice that are emerging out of this process Focusing on the experiences on Central and Eastern Europe these chapters reflect on the diversity of approaches to spatial planning and the the politics of policy formation and multi level governance operations from local to trans national agendas Promoting increased awareness and understanding of these issues is the main purpose of the book as well as harnessing the extensive capacity and knowledge within these countries that can greatly enrich the discourse within an enlarged epistemic community of European spatial planning academics practitioners and policy makers The recently acquired CEE dimension provides a unique opportunity to examine the evolution of existing epistemic communities as well as to explore the potential emergence of new ones **Cities in Crisis** Jörg Knieling, Frank Othengrafen, 2015-09-16 In recent years European societies and territories have witnessed the spatial impacts of a severe financial and socio economic crisis This book builds on the current debate concerning how cities and

urban regions and their citizens deal with the consequences of the recent financial and socio economic crisis Cities in Crisis examines the political and administrative implications of austerity measures applied in southern European cities These include cuts in local public spending and the processes of privatization of local public assets as well as issues related to the re scaling recentralization or decentralization of competencies Attention is paid to the rise of new austerity regimes the question of their legitimacy and their spatial manifestations and in particular to the social consequences of austerity The contributions to this book lay the foundation for recommendations on how to improve and consolidate qualified governance arrangements in order to better address rapid economic and social changes Such recommendations are applicable to cities and urban regions both within and outside of Europe It identifies possible approaches tools and partnerships to tackle the effects of the crisis and to prepare European cities for future challenges

Higher Education and the Creative Economy Roberta Comunian, Abigail Gilmore, 2016-03-10 Since the DCMS Creative Industries Mapping Document highlighted the key role played by creative activities in the UK economy and society the creative industries agenda has expanded across Europe and internationally They have the support of local authorities regional development agencies research councils arts and cultural agencies and other sector organisations Within this framework higher education institutions have also engaged in the creative agenda but have struggled to define their role in this growing sphere of activities Higher Education and the Creative Economy critically engages with the complex interconnections between higher education geography cultural policy and the creative economy This book is organised into four sections which articulate the range of dynamics that can emerge between higher education and the creative economy partnership and collaboration across Higher Education institutions and the creative and cultural industries the development of creative human capital connections between arts schools and local art scenes and links with broader policy directions and work Chapter 9 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 3 0 license

Migration in the 21st Century Thomas N. Maloney, Kim Korinek, 2010-10-04 International migration is a central theme of social science research This book promotes cross disciplinary discussion examining the challenges and opportunities created by global migration at the start of the 21st century

Code and the City Rob Kitchin, Sung-Yueh Perng, 2016-04-20 Software has become essential to the functioning of cities It is deeply embedded into the systems and infrastructure of the built environment and is entrenched in the management and governance of urban societies Software enabled technologies and services enhance the ways in which we understand and plan cities It even has an effect on how we manage urban services and utilities Code and the City explores the extent and depth of the ways in which software mediates how people work consume communication travel and play The reach of these systems is set to become even more pervasive through efforts to create smart cities cities that employ ICTs to underpin and drive their economy and governance Yet despite the roll out of software enabled systems across all aspects of city life the relationship between code and the city has

barely been explored from a critical social science perspective This collection of essays seeks to fill that gap and offers an interdisciplinary examination of the relationship between software and contemporary urbanism This book will be of interest to those researching or studying smart cities and urban infrastructure
