Regions Around The World:

Regions Around the World Phillip Bacon, 1970 *The Multidimensionality of Regions in World Politics* Paul J. Kohlenberg, Nadine Godehardt, 2020-09-02 This book examines what counts regarding the role and conceptualization of regions in world politics. It presents a fresh look at which narratives awake, persist, fall dormant or re-emerge amidst diverse interlocking processes of environmental, technological and global political changes. It puts forward a thorough and multidimensional conceptualization of regions as embedded in changing overlapping environments and requires more attention to regions shifting materiality, temporality and technological underpinnings. Combining the approaches, questions and analyses of Critical IR and Political Geography, it calls for a renewed emphasis on the puzzle of how the contextual environment of regions may become more or less multidimensional or how some aspects of a region's contextual environment may be mutually constitutive in non-intuitive ways. Ultimately, it sheds light on the politics of regions and the regional scale in international politics in order to overcome the often underlying territorial fixity of territory and space within IR approaches. This book will be of key interest to scholars and students of international relations, international political sociology, political geography, regionalism, geopolitics and area studies.

Geography of the World's Major Regions John Cole, 2003-09-02 Presents a global view of today's most pressing issues through an analysis of the twelve major regions of the world. Economic and political restructuring, agriculture, industry, catastrophe, human conflict are just some of the issues covered.

A World of Regions Peter J. Katzenstein, 2015-11-16 Observing the dramatic shift in world politics since the end of the Cold War, Peter J. Katzenstein argues that regions have become critical to contemporary world politics. This view is in stark contrast to those who focus on the purportedly stubborn persistence of the nation-state or the inevitable march of globalization. In detailed studies of technology and foreign investment, domestic and international security and cultural diplomacy and popular culture, Katzenstein examines the changing regional dynamics of Europe and Asia, which are linked to the United States through Germany and Japan. Regions, Katzenstein contends, are interacting closely with an American imperium that combines territorial and non-territorial powers. Katzenstein argues that globalization and internationalization create open or porous regions. Regions may provide solutions to the contradictions between states and markets, security and insecurity, nationalism and cosmopolitanism. Embedded in the American imperium, regions are now central to world politics.
