Regions Local Power Economic:

The Rise of the English Regions? Irene Hardill, Paul Benneworth, Mark Baker, Leslie Budd, 2006-10-03 This book analyzes devolution as it affects the English Regions working from the perspective of uneven development and drawing on the rich tradition of regional geography Currently London is the power centre ruling over the other English regions The first part of the book looks at how this regional structure has arisen and the theories that can be used to analyze it The contributors discuss the nature of regional problems and governance the institutions involved in regional governance and regional approaches to economic development The second part of the book devotes a chapter to each English region examining each region's unique characteristics and the opportunities created for it by devolution By looking carefully at the regions this part of the book sheds light on the question of whether Regional governance benefits the regions or simply rescales governance to introduce another layer of bureaucracy *WIND POWER DEPLOYMENT IN URBANISED REGIONS* Pia Nabielek, 2020

Delivering sustainable energy solutions has become a fundamental task of spatial planning This dissertation considers the field of tension between higher tier energy schemes and local level implementation practices by analysing regional planning policies regarding wind power from an institutional perspective Institutional challenges in spatial planning are closely related in particular to the flexibility and adaptability of those planning practices that are needed to supply acceptable locations Similar trends can be detected at a European level targeted energy values are combined with administratively defined spaces by putting the zoning of wind energy generation on regional spatial planning agendas The outlining of wind power zones is not merely a technical act that determines the territorial spread of wind turbines Rather it configures social organisational entities in which regionally varying sets of actors interact and in the best case join forces **Politics in the Russian**

Regions G. Gill, 2007-06-28 This volume analyzes the changing power relations in the Russian regions and in their relationship with the centre It considers Russian federalism and the changes that Putin has introduced and the distribution of power at the regional level The result is a rich survey of the state of federal relations in Russia Energy Economics

Yi-Ming Wei, Qiao-Mei Liang, Gang Wu, Hua Liao, 2019-09-23 This book sets out a systematic piece of research which attempts to assess the level of energy security in China investigate how national energy supply security might be improved and consider how energy trade risks might be reduced **Self-Sufficiency and Sustainable Cities and Regions** Eduardo

Medeiros, 2024-11-13 The concept of self sufficiency involves the notion of sustainable circular and carbon neutral cities This book examines how urban planning can lead to greater self sufficiency It sheds light on how urban and regional circular and self sufficiency development can effectively contribute towards the ultimate goals of the United Nations UN Agenda 2030 and the European Union EU Green Deal It not only embraces the scientific fields of regional and urban studies but also addresses environmental sustainability related and regional resilience aspects such as renewable energy production sustainable mobility and the circular economy This book offers a full toolkit of knowledge on how to effectively implement planning

approaches for circular and self sufficiency development at both urban and regional levels It begins by presenting a theoretical framework and debate on urban and regional planning approaches that can effectively make cities and regions circular and self sufficient in certain development domains such as producing intra city electric energy sustainable mobility and promoting a circular economy Further it advances a range of policy development proposals aiming at providing a comprehensive introduction to contemporary thinking about how cities and regions can design innovative planning and governance processes and where appropriate build capacity to implement systemic and integrated climate neutral policies building on existing place based territorial capital and experiences developed by local and regional networks The chapters are written by established authors in their respective domains This book will thoroughly prepare students and provide knowledge to academics researchers and policymakers in the fields of urban and regional planning development and studies environmental sustainability regional resilience human geography economic development and public EU UN policies *The Regions and the European Community* Robert Leonardi,1993 The contributions to this volume analyse the role of sub national institutions in the regional economic development process in the Community s less developed countries Greece Ireland Portugal Spain and Italy They are structured on the basis of individual country reports providing background to the debate on decentralization in each national context and the regional role in economic development The volume also contains an extensive analysis of the impact of European Community sectoral policies on the alleviation of regional disparities and an in depth analysis of the EC s Integrated Mediterranean Programmes on the basis of a systematic content analysis of the programmes and field research conducted on six IMP programmes in Greece Italy and France **Economics of Offshore Wind Power** Rahmatallah Poudineh,Craig Brown,Benjamin Foley,2017-11-13 The book provides an overview of the policy frameworks that have been employed to support offshore wind power and their efficacy in nurturing sustainable cost reductions across the industry A growing number of countries are increasingly receptive to the prospect of implementing policies to support the deployment of large scale renewable energy The promise of carbon free utility scale power generation from offshore wind farms has incentivised and nurtured offshore wind development However the high relative costs of deploying offshore wind compared to alternatives have a history of making it political divisive pursuit At the same time when many countries are just beginning to explore the possibility of developing an offshore wind industry many other countries are experiencing what can be described as policy fatigue over supporting offshore wind If cost reductions are not proven sustainable by the early 2020 s then government support for offshore wind may start to erode and even completely evaporate in several key offshore wind markets with global repercussions This book will provide the reader with a clear picture of the current status and future challenges of the offshore wind industry globally incorporating both a technical analysis of the cost drivers as well as a detailed analysis of policy design and economics of industry *Kings and Usurpers in the Seleukid Empire* Boris Chrubasik,2016 *Kings and Usurpers in the Seleukid Empire* The Men who would be King focuses on ideas of

kingship and power in the Seleukid empire the largest of the successor states of Alexander the Great Exploring the question of how a man becomes a king it specifically examines the role of usurpers in this particular kingdom those who attempted to become king and who were labelled as rebels by ancient authors after their demise by placing these individuals in their appropriate historical contexts through careful analysis of the literary numismatic and epigraphic material By writing about kings and rebels literary accounts make a clear statement about who had the right to rule and who did not and the Seleukid kings actively fostered their own images of this right throughout the third and second centuries BCE However what emerges from the documentary evidence is a revelatory picture of a political landscape in which kings and those who would be kings were in constant competition to persuade whole cities and armies that they were the only plausible monarch and of a right to rule that advanced and refuted on so many sides simply did not exist Through careful analysis this volume advances a new political history of the Seleukid empire that is predicated on social power redefining the role of the king as only one of several players within the social world and offering new approaches to the interpretation of the relationship between these individuals themselves and with the empire they sought to rule In doing so it both questions the current consensus on the Seleukid state arguing instead that despite its many strong rulers the empire was structurally weak and offers a new approach to writing political history of the ancient world

Russia's Regions and Comparative Subnational Politics

William Mark Reisinger, 2013 Subnational political units are growing in influence in national and international affairs drawing increasing scholarly attention to politics beyond national capitals In this book leading Russian and Western political scientists contribute to debates in comparative politics by examining Russia's subnational politics Beginning with a chapter that reviews major debates in theory and method this book continues to examine Russia's 83 regions exploring a wide range of topics including the nature and stability of authoritarian regimes federal politics political parties ethnic conflict governance and inequality in a comparative perspective Providing both qualitative and quantitative data from 20 years of original research the book draws on elite interaction public opinion and the role of institutions regionally in the post Soviet years The regions vary on a number of theoretically interesting dimensions while their federal membership provides control for other dimensions that are challenging for globally comparative studies The authors demonstrate the utility of subnational analyses and show how regional research can help answer a variety of political questions providing evidence from Russia that can be used by specialists on other large countries or world regions in cross national scholarship Situated within broader theoretical and methodological political science debates this book will be of interest to students and scholars of Russian politics comparative politics regionalism and subnational politics

Net Loss Nathan Newman, 2015-12-16 How has the Internet been changing our lives and how did these changes come about Nathan Newman seeks the answers to these questions by studying the emergence of the Internet economy in Silicon Valley and the transformation of power relations it has brought about in our new information age *Net Loss* is his effort to understand why technological innovation and growth have been accompanied by increasing economic inequality and a sense of political powerlessness among large sectors of the population Newman first tells the story of the federal government's crucial role in the early development of the Internet with the promotion of open computer standards and collaborative business practices that became the driving force of the Silicon Valley model He then examines the complex dynamic of the process whereby regional economies have been changing as business alliances built around industries like the Internet replace the broader public investments that fueled regional growth in the past A radical restructuring of once regionally focused industries like banking electric utilities and telephone companies is under way with changes in federal regulation helping to undermine regional planning and the power of local community actors The rise of global Internet commerce itself contributes to weakening the tax base of local governments even as these governments increasingly use networked technology to market themselves and their citizens to global business usually at the expense of all but their most elite residents More optimistically Newman sees an emerging countertrend of global use of the Internet by grassroots organizations such as those in the antiglobalization movements that may help to transcend this local powerlessness

Federalism and the Dictatorship of Power in Russia Mikhail Stoliarov, 2003-08-27 Stoliarov presents an analysis of the historical traditions and distinctive features of modern Russian federalism He reviews the state of affairs in today's Russia as it strives to become a federal democracy securing the rights and liberties of its citizens By tracing two contrasting ideas federalism and *derzhavnost* dictatorship of power in the legacy of the Russian state and in relations between the modern federal government and the regions he demonstrates the need for balance in the delimitation of power The election in 2000 of Vladimir Putin as President raised doubts about the future of federalism among politicians and citizens but Stoliarov believes that the development of federalism is the only way forward for this multi ethnic and multi religious society He shows that the strengthening of vertical power and dictatorship of the law despite their patriotic appeal are likely to have a negative effect on the building of democracy and federalism in Russia

Regions in Recession and Resurgence Michael Chisholm, 2015-03-27 The world economy has undergone rapid evolution in recent decades along with changes in the importance of industries and their organization and sharp changes in the fortunes of regions There are differences of opinion regarding the mainsprings of change and development and the role of governments in fostering national output In order to show the relevance of these changes to regional economies the book focuses on the different schools of economic thought from the neo classical through Keynesian to Marxist radical ideas and monetarist supply side thinking providing a brief description of their structure in non spatial terms The way these theories map into contrasting ideas regarding the mechanisms of regional economic growth is then explained The book concentrates on developed economies and explicitly seeks to confront theory with fact fact with theory Bringing together non spatial economic theory regional growth theory and relevant empirical data this book is intended for students in geography and regional economics but will also be of interest for those studying politics and government

Regional Integration and Governance Reshuffling in the Making of China's City-Regions Xianchun Zhang, 2023-08-07 This book for the first time thoroughly investigates the extent of economic and institutional integrations and the underlying governance reshuffling process of China's city regionalism By using the Shenzhen Dongguan Huizhou sub region SDH in southern China as an empirical case this book provides convincing evidence that China's city regionalism is essentially a state orchestrated and institution based process Perspectives from market industry infrastructure and multi level governance MLG have been provided to systematically examine China's city regionalism This book has essentially made a definitive contribution to China's regional governance

Methodologically it shows how China's city regionalism can be examined through a problem solving and case by case paradigm through building a bridge between an empirical slogan and an inclusive theoretical term for institutional integration and through MLG and its integrative approaches in China. Exhilarating findings are presented using extensive tables, graphs and maps along with the integration of quantitative and qualitative methods. Undergraduates, graduates and researchers who are interested in China's city regionalism and regional governance would be the readership of the book and officers from different levels of government as well as policymakers will find the book inspiring.
