**Sides in Social Research** Martyn Hammersley, 2005-08-12 In the past it was generally taken for granted that the goal of social research was the production of objective knowledge and that this required a commitment to value neutrality In more recent times however both these ideals have come to be challenged and it is often argued that all research is inevitably political in its assumptions and effects In this major contribution to the debate Martyn Hammersley assesses the arguments from the classic and still influential contributions of C Wright Mills Howard Becker and Alvin Gouldner to the present day He concludes that the case for partisanship is not convincing and that an intelligent and sceptical commitment to the principles of objectivity and value neutrality must remain an essential feature of research Encyclopedia of Insurgency and

Counterinsurgency Spencer C. Tucker, 2013-10-29 A fascinating look at the insurgencies and counterinsurgencies throughout history with a concentration on the 20th and 21st centuries This encyclopedia examines insurgencies and the counterinsurgency efforts they prompt through history addressing military actions and the techniques and technologies employed in each conflict significant insurgency leaders and the leading theorists with emphasis on the small wars of the 20th century and most recent decades The clear concise entries provide a breadth of coverage that ranges from the Maccabean Revolt in 168 143 BCE and the Peasants Revolt in Germany in the 1500s to the American Revolutionary War and the ongoing insurgency in Syria Readers will gain a solid understanding of how insurgency warfare and counterinsurgency COIN strategy has played a key role in the U S conflicts in Afghanistan and Iraq in the early 21st century and grasp how this important military strategy has evolved during modern times *Between Daily Routine and Violent Protest* Ernst

Wolff, 2021-06-21 Most human action has a technical dimension This book examines four components of this technical dimension First in all actions various individual organizational or institutional agents combine actional capabilities with tools institutions infrastructure and other elements by means of which they act Second the deployment of capabilities and means is permeated by ethical aspirations and hesitations Third all domains of action are affected by these ethical dilemmas Fourth the dimensions of the technicity of action are typical of human life in general and not just a regional or culturally specific phenomenon In this study an interdisciplinary approach is adopted to encompass the broad anthropological scope of this

study and combine this bigger picture with detailed attention to the socio historical particularities of action as it plays out in different contexts Hermeneutics the philosophical inquiry into the human phenomena of meaning understanding and interpretation and social science as the study of all human affairs are the two main disciplinary orientations of this book This study clarifies the technical dimension of the entire spectrum of human action ranging from daily routine to the extreme of violent protest

*A Divided Republic* Emile Chabal, 2015-04-02 This book is an original and sophisticated historical interpretation of contemporary French political culture Until now there have been few attempts to understand the political consequences of the profound geopolitical intellectual and economic changes that France has undergone since the 1970s However Emile Chabal's detailed study shows how passionate debates over citizenship immigration colonial memory the reform of the state and the historiography of modern France have galvanised the French elite and created new spaces for discussion and disagreement Many of these debates have coalesced around two political languages republicanism and liberalism both of which structure the historical imagination and the symbolic vocabulary of French political actors The tension between these two political languages has become the central battleground of contemporary French politics It is around these two poles that politicians intellectuals and members of France's vast civil society have tried to negotiate the formidable challenges of ideological uncertainty and a renewed sense of global insecurity

### **Idealism beyond Borders**

Eleanor Davey, 2015-12-17 This is a major new account of how modern humanitarian action was shaped by transformations in the French intellectual and political landscape from the 1950s to the 1980s Eleanor Davey reveals how radical left third worldism was displaced by the *sans fronti riste* movement as the dominant way of approaching suffering in what was then called the third world Third worldism regarded these regions as the motor for international revolution but revolutionary zeal disintegrated as a number of its regimes took on violent and dictatorial forms Instead the radical humanitarianism of the *sans fronti riste* movement pioneered by M decins *Sans Fronti res* emerged as an alternative model for international aid Covering a period of major international upheavals and domestic change in France Davey demonstrates the importance of memories of the Second World War in political activism and humanitarian action and underlines the powerful legacies of Cold War politics for international affairs since the fall of the Iron Curtain

*Transmitting Culture* Régis Debray,2000 In a departure author Régis Debray redefines communication as the inescapable conditioning of civilization s meanings and messages by their technologies of transmission and lays the groundwork for a science of the transmission of cultural forms

**Postcolonial Studies** Benita Parry,2004-07-31 This powerful selection of essays proposes practices of reading and

criticism to make the field of postcolonial studies more fully attentive to historical circumstances and socio material conditions Benita Parry points to directions and dead ends in the discipline she has helped to shape with a first series of essays vigorously challenging colonial discourse theory and postcolonialism as we have known them She then turns to literature with a series of detailed readings that not only demonstrate her theoretical position at work but also give new dimensions to widely studied texts by Rudyard Kipling Joseph Conrad H G Wells and E M Forster Parry argues throughout that the material impulses of colonialism its appropriation of physical resources exploitation of human labour and institutional repression have too long been allowed to recede from view

**French Writers and the Politics of Complicity** Richard J. Golsan, 2006-02 Focusing on the political commitments of three French writers who collaborated with the Vichy Regime and Nazi Germany during World War II and on those of three leading French intellectuals of the 1990s whose misplaced political idealism led them to support xenophobic authoritarian regimes and dangerous historical revisionisms Richard J Golsan reexamines the notion of political commitment or engagement in two difficult periods in modern French history Discussing the fiction essays and journalism of Henry de Montherlant Jean Giono and Alphonse de Chateaubriant Golsan explores the complexity of artistic and intellectual collaboration during the German Occupation He demonstrates that in this context complicity with political evil often derived from nonpolitical motives including sexual orientation antimodern aesthetics and dangerously skewed religious beliefs Turning to the post cold war era of the 1990s Golsan examines the philosopher Alain Finkielkraut s support for Croatian independence the mediologist Rgis Debray s pro Serb stance during the bombing of Kosovo and the historian St phane Courtois s revisionist comparison of Nazi and Communist crimes during the 1997 debate surrounding the publication of The Black Book of Communism In these three cases laudable motives and misguided historical comparisons with Vichy Nazism and the Occupation period that marked the political and intellectual discourses of France in the 1990s resulted paradoxically in antidemocratic engagements profoundly at odds with the original motivations behind these intellectuals commitments In each of these case studies political complicity derives from a combination of passions and ideals whether positive or negative emotional or intellectual as well as a desire to make the present conform to a particular and generally skewed vision of the past The full implications of these involvements are neither fully grasped nor understood by their authors either through lack of objectivity rationality or imagination or through willful ignorance The results are always unfortunate and often disastrous Considered together these six intellectuals serve as sobering reminders that political commitments are never as simple or straightforward as they seem and that admirable motives for political involvement can have dangerous and destructive consequences in historical practice

*Facing Postmodernity* Max Silverman, 2012-10-12 Facing Postmodernity explains French cultural theory by grounding it in the politics of the issues facing France today such as the breaking of the city racism the crisis of culture new citizenship It discusses some of the major responses to postmodernity by contemporary French thinkers both the very well known Lyotard

Levinas Derrida and those who will be less familiar to a non French audience In doing so it addresses the questions central to the postmodern debate whatever country it takes place in questions of history of representation identity and community

Becoming the Tupamaros Lindsey Churchill, 2021-04-30 In Becoming the Tupamaros Lindsey Churchill explores an alternative narrative of US Latin American relations by challenging long held assumptions about the nature of revolutionary movements like the Uruguayan Tupamaros group A violent and innovative organization the Tupamaros demonstrated that Latin American guerrilla groups during the Cold War did more than take sides in a battle of Soviet and US ideologies Rather they digested information and techniques without discrimination creating a homegrown and unique form of revolution Churchill examines the relationship between state repression and revolutionary resistance the transnational connections between the Uruguayan Tupamaro revolutionaries and leftist groups in the US and issues of gender and sexuality within these movements Angela Davis and Eldridge Cleaver for example became symbols of resistance in both the United States and Uruguay and while much of the Uruguayan left and many other revolutionary groups in Latin America focused on motherhood as inspiring women s politics the Tupamaros disdained traditional constructions of femininity for female combatants Ultimately Becoming the Tupamaros revises our understanding of what makes a Movement truly revolutionary

**Fear of a Black Nation** David Austin, 2023-04-18 In the 1960s Montreal was a hotbed of radical politics that attracted Black and Caribbean figures such as C L R James Walter Rodney Mariam Makeba Stokely Carmichael Rocky Jones and douard Glissant It was also a place where the ideas of Frantz Fanon Aim C saire and Malcolm X circulated alongside those of Karl Marx Jean Paul Sartre and Simone de Beauvoir During this period of global upheaval and heightened Canadian and Quebec nationalism Montreal became a central site of Black and Caribbean radical politics Situating Canada within the Black radical tradition and its Caribbean radical counterpart Fear of a Black Nation paints a history of Montreal and the Black activists who lived sojourned in or visited the city and agitated for change Drawing on Saidiya Hartman s conception of slavery s afterlife and what David Austin describes as biosexuality a deeply embedded fear of Black self organization and interracial solidarity Fear of a Black Nation argues that the policing and surveillance of Black lives today is tied to the racial including sexual codes and practices and the discipline and punishment associated with slavery As meditation on Black radical politics and state security surveillance and repression Fear of a Black Nation combines theoretical and philosophical inquiry with literary oral and archival sources to reflect on Black political organizing In reflecting on Black self organization and historic events such as the Congress of Black Writers and the Sir George Williams Affair the book ultimately poses the question what can past freedom struggles teach us about the struggle for freedom today Featuring two new interviews with the author and a new preface this expanded second edition enriches the political and theoretical conversation on Black organising and movement building in Canada and internationally As the Black Lives Matter and abolition movements today popularize calls to disarm and defund the police and to abolish prisons Fear of a Black Nation provides an invaluable

reflection on the policing of Black activism and a compelling political analysis of social movements and freedom struggles that is more relevant now than ever

**A Critical Sense** Peter Osborne, 2013-04-15 A Critical Sense brings together in a single volume the leading figures of contemporary radical theory Moving freely between philosophy politics and cultural studies it offers a fascinating overview of the lines of thought of today's intellectual left Marxism feminism psychoanalysis and critical theory literary studies deconstruction pragmatism postcolonial and queer theory are discussed in a series of interviews from the journal Radical Philosophy Those interviewed are Judith Butler Cornelius Castoriadis Drucilla Cornell Axel Honneth Istvan Meszaros Edward Said Renata Salecl Gayatri Chakravorty Spivak Cornel West Slavoj Žižek For those unfamiliar with the often daunting work of some of today's most important thinkers A Critical Sense will offer an ideal introduction for those already acquainted with the writings of the theorists interviewed here the collection will throw new and often surprising light on familiar ground

**Jacques Derrida and the Institution of French Philosophy** Vivienne Orchard, 2017-12-02 Jacques Derrida 1930-2004 was unquestionably one of the most celebrated and reviled French thinkers of the last thirty years Outside France his influence in comparative literature circles through deconstruction and other ideas has been so profound that his personal role as a leader of contemporary French philosophy has been almost overlooked Perhaps because there is no equivalent in English speaking countries to the timetabling of philosophy in the French education system writers on Derrida outside France have not fully appreciated the importance of this political and cultural struggle In this ground breaking book Orchard examines a hard fought debate of great importance not only to Derrida himself but also to France's idea of what studying philosophy might mean after the student uprisings of 1968

**Intellectuals and Politics in Post-War France** D. Drake, 2001-11-11 What did French intellectuals have to say about Gaullism the Cold War colonialism the women's movement and the events of May 68 David Drake examines the political commitment of intellectuals in France from Sartre and Camus to Bernard Henri Lévy and Bourdieu In this accessible study he explores why there was a radical reassessment of the intellectual's role in the mid 1970s 80s and how a new generation engaged with Islam racism the Balkan Wars and the strikes of 1995

**Guy Hocquenghem: Theorising the Gay Nation** Bill Marshall, 1996 An innovative and welcome contribution to a history of gay politics and of the life style strand in a more general left politics Marshall's success in covering so much of a large corpus in a small volume is remarkable Radical Philosophy Marshall also has a firm grasp of Hocquenghem's philosophical background but his understanding of his brilliant slippery subject does not prevent him from subjecting some of Hocquenghem's more extreme positions to a strong if subtle moral questioning

Edmund White *Mass Media* James B. Martin, 2002 Mass media has become an integral part of the human experience News travels around the world in a split second affecting people in other countries in untold ways Although being on top of the news may be good at least for news junkies mass media also transmits values or the lack thereof condenses complex events and thoughts to simplified sound bites and often ignores the essence of an event or story The
