Public Space and the Challenges of Urban Transformation in Europe Ali Madanipour, Sabine Knierbein, Aglaée Degros, 2013-11-20 European cities are changing rapidly in part due to the process of de industrialization European integration and economic globalization Within those cities public spaces are the meeting place of politics and culture social and individual territories instrumental and expressive concerns Public Space and the Challenges of Urban Transformation in Europe investigates how European city authorities understand and deal with their public spaces how this interacts with market forces social norms and cultural expectations whether and how this relates to the needs and experiences of their citizens exploring new strategies and innovative practices for strengthening public spaces and urban culture These questions are explored by looking at 13 case studies from across Europe written by active scholars in the area of public space and organized in three parts strategies plans and policies multiple roles of public space and everyday life in the city This book is essential reading for students and scholars interested in the design and development of public space The European case

studies provide interesting examples and comparisons of how cities deal with their public space and issues of space and society *Crafting Form-Based Codes* Korkut Onaran, 2018-10-09 This book is for the well meaning idealists city planners urban designers municipalities and developers who are frustrated working within the messy political environments of local democracies It provides practical tools for crafting form based rules that can facilitate effective communication and consensus building that are essential in today s many regulatory cultures It reviews some of the recent form based codes and focuses on a lot types approach to coding It applies this approach to designing for the climate it demonstrates that this approach can be used in deciphering the climatic responses of vernacular archetypes that have been evolved through generations and then coding them via simple coding tools This book s purpose is twofold a to provide a theoretical framework that clarifies why working within dynamic legal systems in local democracies is a necessity today for practitioners of urban planning and design and how crafting dynamic rules may facilitate effective communication which is crucial within these cultures and b to provide simple tools for crafting dynamic rules in form based codes that can not only facilitate form based consensus but also address issues of sustainability and response to the climatic properties **Politics of Urban Runoff**

Andrew Karvonen, 2011 After describing the evolution of urban runoff practices Karvonen analyzes the urban runoff activities in Austin and Seattle two cities known for their highly contested public debates over runoff issues and exemplary stormwater management practices Infinite Suburbia MIT Norman B. Leventhal Center for Advanced Urbanism, 2018-03-13 Infinite

Suburbia is the culmination of the MIT Norman B Leventhal Center for Advanced Urbanism s yearlong study of the future of suburban development Extensive research an exhibition and a conference at MIT s Media Lab this groundbreaking collection presents fifty two essays by seventy four authors from twenty different fields including but not limited to design architecture landscape planning history demographics social justice familial trends policy energy mobility health environment economics and applied and future technologies This exhaustive compilation is richly illustrated with a wealth of photography aerial drone shots drawings plans diagrams charts maps and archival materials making it the definitive statement on suburbia at the beginning of the twenty first century **Public Space** Matthew Carmona, Claudio de Magalhães, Leo

Hammond, 2008-06-03 In both the UK and the US there is a sense of dissatisfaction and pessimism about the state of urban environments particularly with the quality of everyday public spaces Explanations for this have emphasized the poor quality of design that characterizes many new public spaces spaces that are dominated by parking roads infrastructure introspective buildings a lack of enclosure and a poor sense of place and which in different ways for different groups are too often exclusionary Yet many well designed public spaces have also experienced decline and neglect as the services and activities upon which the continuing quality of those spaces have been subject to the same constraints and pressures for change as public services in general These issues touch upon the daily management of public space that is the coordination of the many different activities that constantly define and redefine the characteristics and quality of public space This book draws on

three empirical projects to examine the questions of public space management on an international stage They are set within a context of theoretical debates about public space its history contemporary patterns of use and changing nature in western society and about the new management approaches that are increasingly being adopted

The Palgrave Handbook of Bottom-Up Urbanism Mahyar Arefi, Conrad Kickert, 2018-06-27 Who shapes our cities In an age of increasing urban pluralism globalization and immigration decreasing public budgets and an ongoing crisis of authority among designers and planners the urban environment is shaped by a number of non traditional stakeholders The book surveys the kaleidoscope of views on the agency of urbanism providing an overview of the various scholarly debates and territories that pertain to bottom up efforts such as everyday urbanism DIY urbanism guerilla urbanism tactical urbanism and lean urbanism Uniquely this books seeks connections between the various movements by curating a range of views on the past present and future of bottom up urbanism The contributors also connect the recent trend of bottom up efforts in the West with urban informality in the Global South drawing parallels and finding contrast between social and institutional structures across the globe The book appeals to urbanists in the widest sense of the word those who shape study and improve our urban spaces

Urban Design Governance Matthew Carmona, João Bento, Tommaso Gabrieli, 2023-04-17 Urban Design Governance takes a deep dive into the governance of urban design around Europe It examines interventions in the means and processes of designing the built environment as devised by public authorities and other stakeholders across the continent In particular the focus is on the use of soft powers and allied financial mechanisms to influence design quality in the public interest In doing so the book traces the scope use and effectiveness of the range of informal non regulatory urban design governance tools that governments municipalities and others have at their disposal Developed from the Urban Maestro project a joint initiative of the United Nations Human Settlement programme UN Habitat UCL and the Brussels Bouwmeester Ma tre Architecte BMA Urban Design Governance offers the first panorama of informal urban design governance tools from across Europe and places the tools within a theoretical and analytical framework with the potential to be applied locally and internationally Last the book discusses and reveals the essential pre requisites for the effective governance of urban design Governments everywhere are increasingly seeing these sorts of tools as part of a necessary investment in delivering the high quality built environments that their residents businesses and investors demand This book shows how

City Rules Emily Talen, 2012-06-22 City Rules offers a challenge to students and professionals in urban planning design and policy to change the rules of city building using regulations to reinvigorate rather than stifle our communities Emily Talen demonstrates that regulations are a primary detriment to the creation of a desirable urban form While many contemporary codes encourage sprawl and even urban blight that hasn t always been the case and it shouldn t be in the future Talen provides a visually rich history showing how certain eras used rules to produce beautiful walkable and sustainable communities while others created just the opposite She makes complex regulations understandable demystifying city rules like zoning and illustrating how written codes translate into real

world consequences Most importantly Talen proposes changes to these rules that will actually enhance communities freedom to develop unique spaces

Design Governance Matthew Carmona, Claudio De Magalhães, Lucy Natarajan, 2016-12-19 Design Governance focuses on how we design the built environment where most of us live work and play and the role of government in that process To do so it draws on the experience of the Commission for Architecture and the Built Environment CABA a decade long globally unique experiment in the governance of design This book theorises design governance as an arm and aspiration of the state tells the story of CABA warts and all and what came before and after unpacks CABA's informal toolbox its methods and processes of design governance and reflects on the effectiveness and legitimacy of design as a tool of modern day government The result is a new set of concepts through which to understand the governance of design as a distinct and important sub field of urban design

The Informal American City Vinit Mukhija, Anastasia Loukaitou-Sideris, 2014-05-16 An examination of informal urban activities including street vending garage sales and unpermitted housing that explores their complexity and addresses related planning and regulatory issues Every day in American cities street vendors spread out their wares on sidewalks food trucks serve lunch from the curb and homeowners hold sales in their front yards examples of the wide range of informal activities that take place largely beyond the reach of government regulation This book examines the informal revolution in American urban life exploring a proliferating phenomenon often associated with developing countries rather than industrialized ones and often dismissed by planners and policy makers as marginal or even criminal The case studies and analysis in *The Informal City* challenge this narrow conception of informal urbanism The chapters look at informal urbanism across the country empirically and theoretically in cities that include Los Angeles Sacramento Seattle Portland Phoenix Kansas City Atlantic City and New York City They cover activities that range from unpermitted in-law apartments and ad hoc support for homeless citizens to urban agriculture street vending and day labor The contributors consider the nature and underlying logic of these activities argue for a spatial understanding of informality and its varied settings and discuss regulatory planning and community responses Contributors Jacob Avery Ginny Browne Matt Covert Margaret Crawford Will Dominie Renia Ehrenfeucht Jeffrey Hou Nabil Kamel Gregg Kettles Anastasia Loukaitou Sideris Kate Mayerson Alfonso Morales Vinit Mukhija Michael Rios Donald Shoup Abel Valenzuela Jr Mark Vallianatos Peter M Ward

Questioning Architectural Judgment Steven A. Moore, Barbara B. Wilson, 2013-07-24 The book shines light on the problem of judgment particularly in the realm of architectural technique and the codes that regulate it The struggle to define sustainability and thus judge architecture through such lenses is but one dimension of the contemporary problem of judgment By providing the reader with an inherently interdisciplinary study of a

particular discipline architecture it brings to the topic lenses that challenge the too frequently unexamined assumptions of the discipline By situating architecture within a broader cultural field and using case studies to dissect the issues discussed the book emphasizes that it is not simply a matter of designing better more efficient or more stringent codes to guide place making but a matter of reconstructing the boundaries of the systems to be coded The authors are winners of the EDRA Place Research Award 2014 for their work on the Green Alley Demonstration Project used in the book *Bathroom Battlegrounds* Alexander K. Davis, 2020-01-28 Today's debates about transgender inclusion and public restrooms may seem unmistakably contemporary but they have a surprisingly long and storied history in the United States one that concerns more than mere potty politics Alexander K Davis takes readers behind the scenes of two hundred years worth of conflicts over the existence separation and equity of gendered public restrooms documenting at each step how bathrooms have been entangled with bigger cultural matters the importance of the public good the reach of institutional inclusion the nature of gender difference and above all the myriad privileges of social status Chronicling the debut of nineteenth century comfort stations twentieth century mandates requiring equal but separate men's and women's rooms and twenty first century uproar over laws like North Carolina's bathroom bill Davis reveals how public restrooms are far from marginal or unimportant social spaces Instead they are and always have been consequential sites in which ideology institutions and inequality collide

Quality-of-Life Community Indicators for Parks, Recreation and Tourism Management Megha Budruk, Rhonda Phillips, 2010-11-25 While community quality of life indicators are gaining much needed attention in both scholarly work and practice their application in the areas of parks recreation and tourism management are not as well known The applicability of indicator systems for natural resource and natural resource area management within the parks and recreation arena is very high including urban parks and recreation programs and their influence on quality of life Tourism is also an area that needs much more work in terms of assessing impacts as well as developing indicators for gauging progress in the long term All three areas are an integrated discipline and most programs throughout the developed world are housed co jointly There are several researchers across the globe who are conducting innovative work in these areas The editors feel that a volume on the topic will spur additional interests as well as serve to lead the research efforts *Topics and Methods for Urban and Landscape Design* Roberta Ingaramo, Angioletta Voghera, 2017-03-27 This book combines urban planning and architectural tools in an attempt to overcome the limitations of sectoral measures In this perspective it offers a forum for the debate of different approaches used by schools of planning and architecture It explores strategies by drawing from the potential contributions of cognitive models for decisions the role of utopian thinking and retrofitting actions and their interconnectedness the role of cultural legacy for urban and landscape design the design perspectives about public spaces and the role of architecture design and urban and regional planning for landscape quality The book also discusses on design as a process of decision making that operates as an act of empathy that aligns with human and ecological values emotional

Understanding Cities Alexander Cuthbert, 2011-06-06 Understanding Cities is richly textured complex and challenging It creates the vital link between urban design theory and praxis and opens the required methodological gateway to a new and unified field of urban design Using spatial political economy as his most important reference point Alexander Cuthbert both interrogates and challenges mainstream urban design and provides an alternative and viable comprehensive framework for a new synthesis He rejects the idea of yet another theory in urban design and chooses instead to construct the necessary intellectual and conceptual scaffolding for what he terms The New Urban Design Building both on Michel de Certeau's concept of heterology thinking about thinking and on the framework of his previous books Designing Cities and The Form of Cities Cuthbert uses his prior adopted framework history philosophy politics culture gender environment aesthetics typologies and pragmatics to create three integrated texts Overall the trilogy allows a new field of urban design to emerge Pre existing and new knowledge are integrated across all three volumes of which Understanding Cities is the culminating text

Environmental Regulations and Housing Costs Arthur C. Nelson, John Randolph, James M. McElfish, Joseph M. Schilling, Jonathan Logan, LLC Newport Partners, 2012-06-22 Many communities across the nation still lack affordable housing And many officials continue to claim that affordable housing is an oxymoron Building inexpensively is impossible they say because there are too many regulations Required environmental impact statements and habitat protection laws they contend drive up the costs of construction But is this actually true In a comprehensive study of the question the authors of this eye opening book separate fact from myth With admirable clarity they describe the policy debate from its beginning review the economic theory trace the evolution of development regulation and summarize the major research on the topic In addition they offer their own research accompanied by a case study of two strikingly different Washington D C suburbs They also include results of focus groups conducted in Dallas Denver and Tucson The authors find that environmental regulatory costs as a share of total costs and processes are about the same now as they were thirty years ago even though there are far more regulations today They find too that environmental regulations may actually create benefits that could improve the value of housing Although they

conclude that regulations do not appear to drive up housing costs more now than in the past they do offer recommendations of ways in which the processes associated with regulations including review procedures could be improved and could result in cost savings Intended primarily for professionals who are involved in or impacted by regulations from public officials planners and engineers to housing developers and community activists this book will provide useful insights and data to anyone who wants to know if and how American housing can actually be made affordable *Mobilizing Food Vending* Ginette Wessel, 2024-12-17 *Mobilizing Food Vending* investigates the gourmet food truck movement in the United States and provides a clearer understanding of the social and economic factors that shape vendor autonomy and industry growth The book features case studies in a variety of American cities and uses top down and bottom up urban theory to frame a discussion of food trucks rights displacement and resiliency Using ethnographic and archival research collected from industry experts the book examines vendors operational strategies their regulatory challenges when navigating the city and their economic cultural and political roles in shaping urban space *Mobilizing Food Vending* argues that food truck vendors are critical actors that support local economies and contribute to the public realm while shaping regulatory policy from the bottom up This book will appeal to urban scholars studying the contemporary neoliberal city the public realm and communication technology and mobility as well as to urban planners seeking to understand how vendors shape city plans and policies
