**Global Governance of Genetic Resources** Sebastian Oberthür, G. Kristin Rosendal, 2013-10-30 This book analyses the status and prospects of the global governance of Access Benefit Sharing ABS in the aftermath of 2010 s Nagoya Protocol to the Convention on Biological

Diversity CBD The CBD's initial 1992 framework of global ABS governance established the objective of sharing the benefits arising from the use of genetic resources fairly between countries and communities. Since then ABS has been a contested issue in international politics not least due to the failure of effective implementation of the original CBD framework. The Nagoya Protocol therefore aims to improve and enhance this framework. Compared to the slow rate of progress on climate change it has been considered a major achievement of global environmental governance but it has also been coined a masterpiece of ambiguity. This book analyses the role of a variety of actors in the emergence of the Nagoya Protocol and provides an up to date assessment of the core features of the architecture of global ABS governance. This book offers a central resource regarding ABS governance for those working on and interested in global environmental governance. This is achieved by focusing on two broad themes of the wider research agenda on global environmental governance namely architecture and agency. Furthermore individual chapter contributions relate and link ABS governance to other prominent debates in the field such as institutional complexes compliance market based approaches EU leadership the role of small states the role of non state actors and more. Partly due to its seeming technical complexity ABS governance has so far not been at the centre of attention of scholars and practitioners of global environmental governance. In this book care is taken to provide an accessible account of key functional features of the governance system which enables non specialists to gain a grasp on the main issues involved allowing the issue of ABS governance to move centre stage and be more fully recognised in discussions on global environmental governance.

Biodiversity Usha Tandon, Mohan Parasaran, Sidharth Luthra, 2017-11-02

Conservation of biodiversity is a fundamental concern towards securing a sustainable future. This volume argues that despite various domestic and international policies and legal frameworks on biodiversity conservation be it forest wildlife marine coastal etc their implementation suffers from many deficiencies. It explores the factors that hinder effective implementation of these policies and frameworks. It also analyses existing laws both international and domestic to identify inherent problems in the existing legal system. The book maintains that careful adherence to established procedures and protocols public awareness filling the lacuna in legal framework and a strong political will are sine qua non for effective conservation of biodiversity and sustainable development. The volume defends the protection of traditional knowledge and participation of indigenous communities along with reinforcements of intellectual property in this regard. It also commends the role played by the Indian judiciary especially the Supreme Court of India and India's National Green Tribunal for the preservation and enhancement of natural resources by applying established as also evolving principles of environmental law. This book will be useful to scholars and researchers of environmental studies development studies policy studies and law related to biodiversity and conservation.

**Transboundary Heritage and Intellectual Property Law** Patricia Covarrubia, 2022-11-30

Since the Intangible Heritage Convention was adopted by UNESCO in 2003 intangible cultural heritage has increasingly been an important subject of debate in international forums. As more countries implement the

Intangible Heritage Convention national policymakers and communities of practice have been exploring the use of intellectual property protection to achieve intangible cultural heritage safeguarding outcomes This book examines diverse cultural heritage case studies from Indigenous communities and local communities in developing and industrialised countries to offer an interdisciplinary examination of topics at the intersection between heritage and property which present cross border challenges Analysing a range of case studies which provide examples of traditional knowledge traditional cultural expressions and genetic resources by a mixture of practitioners and scholars from different fields the book addresses guidelines and legislation as well as recent developments about shared heritage to identify a progressive trend that improves the understanding of intangible cultural heritage Considering all forms of intellectual property including patents copyright design rights trade marks geographical indications and sui generis rights the book explores problems and challenges for intangible cultural heritage in crossborder situations as well as highlighting positive relationships and collaborations among communities across geographical boundaries Transboundary Heritage and Intellectual Property Law Safeguarding Intangible Cultural Heritage will be an important resource for practitioners scholars and students engaged in studying intangible cultural heritage intellectual property law heritage studies and anthropology Common Currents H. Jordan Diamond,Holly Doremus,Hee Cheol Yang,2022-07-18 The world s oceans play a vital role in everyday life from climate regulation to food provision and are widely recognized as a global commons But they also face daunting challenges in the form of climate change population growth escalating pollution and rapidly evolving technologies that speed the reach and pace of resource extractions Common Currents Examining How We Manage the Ocean Commons calls upon experts in international ocean law policy and science to explore the question to what extent and to what effect we currently manage the oceans as a global commons This volume captures some key issues questions and lessons to help enhance understanding of current practices and opportunities to grow collaborative management efforts **Marine Scientific Research and the Regulation of Modern Ocean Data Collection Activities under UNCLOS** Chuxiao Yu,2022-10-17 The scope of marine scientific research has long been debated due to a lack of definition of the term in the United Nations Convention on the Law of the Sea UNCLOS The introduction of new forms and methods of ocean data collection adds another layer of legal uncertainty in this field Marine Scientific Research and the Regulation of Modern Ocean Data Collection Activities Under UNCLOS thus strives to identify the possible limits of the existing legal framework mainly the UNCLOS marine scientific research regime and the ways in which the identified gaps can be bridged In the analysis Chuxiao Yu carries out two case studies one on access to marine genetic resources and the other on operational oceanographic activities
