**Regulating Intimacy** Jean-Louis Cohen, 2009-01-10 The regulation of intimate relationships has been a key battleground in the culture wars of the past three decades In this bold and innovative book Jean Cohen presents a new approach to regulating intimacy that promises to defuse the tensions that have long sparked conflict among legislators jurists activists and scholars Disputes have typically arisen over questions that apparently set the demands of personal autonomy justice and responsibility against each other Can law stay out of the bedroom without shielding oppression and abuse Can we protect the pursuit of personal happiness while requiring people to behave responsibly toward others Can regulation acknowledge a variety of intimate relationships without privileging any Must regulating intimacy involve a clash between privacy and equality Cohen argues that these questions have been impossible to resolve because most legislators activists and scholars have drawn on an anachronistic conception of privacy one founded on the idea that privacy involves secrecy and entails a sphere free from legal regulation In response Cohen draws on Habermas and other European thinkers to present a robust constructivist defense of privacy one based on the idea that norms and rights are legally constructed Cohen roots her arguments in debates over three particularly contentious issues reproductive rights sexual orientation and sexual harassment She shows how a new legal framework reflexive law allows us to build on constructivist insights to approach these debates free from the liberal and welfarist paradigms that usually structure our legal thought This new legal paradigm finally allows us to dissolve the tensions among autonomy equality and community that have beset us A synthesis of feminist theory political theory constitutional jurisprudence and cutting edge research in the sociology of law this powerful work will reshape not only legal and political debates but how we think about the intimate

relationships at the core of our own lives

Regulating the Crypto Economy Iris H-Y Chiu, 2021-10-21 This book focuses on the building of a crypto economy as an alternative economic space and discusses how the crypto economy should be governed The crypto economy is examined in its productive and financialised aspects in order to distil the need for governance in this economic space The author argues that it is imperative for regulatory policy to develop the economic governance of the blockchain based business model in order to facilitate

economic mobilisation and wealth creation The regulatory framework should cater for a new and unique enterprise organisational law and the fund raising and financing of blockchain based development projects Such a regulatory framework is crucially enabling in nature and consistent with the tenets of regulatory capitalism Further the book acknowledges the rising importance of private monetary orders in the crypto economy and native payment systems that do not rely on conventional institutions for value transfer A regulatory blueprint is proposed for governing such monetary orders as commons governance The rise of Decentralised Finance and other financial innovations in the crypto economy are also discussed and the book suggests a framework for regulatory consideration in this dynamic landscape in order to meet a balance of public interest objectives and private interests By setting out a reform agenda in relation to economic and financial governance in the crypto economy this forward looking work argues for the extension of regulatory capitalism to this perceived wild west of an alternative economic space It advances the message that an innovative regulatory agenda is needed to account for the economically disruptive and technologically transformative developments brought about by the crypto economy

**Reforming Corporate Retail Investor Protection** Diane Bugeja, 2019-12-12 The spate of mis selling episodes that have plagued the financial services industries in recent years has caused widespread detriment to investors Notwithstanding numerous regulatory interventions curtailing the incidence of poor investment advice remains a challenge for regulators particularly because these measures are taken in a fire fighting fashion without adequate consideration being given to the root causes of mis selling Against this backdrop this book focuses on the sale of complex investment products to corporate retail investors by drawing upon the widespread mis selling of interest rate hedging products IRHP in the UK and beyond It brings to the fore the relatively understudied field concerning the different degrees of investor protection mechanisms applicable to individual retail investors as opposed to corporate retail investors by taking stock of past regulatory reforms and forthcoming regulatory initiatives as well as more importantly the conclusions reached by the judiciary in IRHP mis selling claims The conclusions are particularly interesting corporate retail investors are in a vulnerable position when compared to individual retail investors The former are exposed to a heightened risk of mis selling meaning that regulatory intervention should be targeted accordingly The recommendations made as a result of these findings are further supported by insights emerging from behavioural law and economic theories This book is aimed at researchers lawyers and students with an interest in the financial regulation field who are keen to explore potential regulatory reforms to the investment services regime that address the root causes of mis selling and restore a level playing field amongst all retail investors

**Regulation in India: Design, Capacity, Performance** Devesh Kapur, Madhav Khosla, 2019-04-04 The rise of the regulatory state has been a major feature of modern constitutional democracies India the world's largest democracy is no exception to this trend This book is the first major study of regulation in India It considers how the development of regulation in India has altered the nature and functions of the state how it is reshaping the relationship between business and the state

how it has called for the refashioning of established legal principles and how it has raised new questions about the relationship between technical expertise and the rule of law The chapters cover topics ranging from the foundations of the Indian regulatory state to the form of regulation across different sectors to regulation in practice Together the chapters reveal the challenges promise and limitations offered by contemporary regulatory practices and they capture the close if sometimes fraught relationship that regulation must inevitably share with the political economy and constitutional schema within which it operates

*The Legitimacy and Responsiveness of Industry Rule-making* Karen Lee, 2018-09-06 Rule making is no longer an activity undertaken exclusively by public actors Private actors are increasingly allowed by legislatures and regulatory bodies to take part in and in some cases assume responsibility for the formation of legally binding rules for example in the US UK Australia and the EU Departing from traditional forms of rule making by involving private actors may enhance the ability of regulatory systems to achieve social goals as regulatory scholars argue However because private actors are permitted to act in their own best interests their involvement also raises doubts about the legitimacy of the underlying rule making processes and the rules that are formulated The principal aim of this book is to highlight that the tension between the responsiveness that leading international regulatory scholars advocate in order to improve regulatory effectiveness and the law and its formal substantive procedural and institutional values is not as great as may first appear Drawing on three in depth case studies of the experience of the Australian telecommunications industry with self regulatory rule making a form of rule making that bears the hallmarks of responsive regulation democratic experimentalism smart regulation and other strategies of proceduralization it is argued that industry rule making can as a matter of practice be responsive and legitimate at the same time In doing so the book formulates and applies criteria against which industry rule making should be evaluated and identifies a number of indicia that point to when industry rule making is likely to be simultaneously legitimate and responsive

Improving the Regulation and Management of Low-Activity Radioactive Wastes National Research Council, Division on Earth and Life Studies, Nuclear and Radiation Studies Board, Committee on Improving Practices for Regulating and Managing Low-Activity Radioactive Waste, 2006-05-24 The largest volumes of radioactive wastes in the United States contain only small amounts of radioactive material These low activity wastes LAW come from hospitals utilities research institutions and defense installations where nuclear material is used Millions of cubic feet of LAW also arise every year from non nuclear enterprises such as mining and water treatment While LAW present much less of a radiation hazard than spent nuclear fuel or high level radioactive wastes they can cause health risks if controlled improperly Improving the Regulation and Management of Low Activity Radioactive Wastes asserts

that LAW should be regulated and managed according to the degree of risk they pose for treatment storage and disposal. Current regulations are based primarily on the type of industry that produced the waste, the waste's origin, rather than its risk. In this report, a risk-informed approach for regulating and managing all types of LAW in the United States is proposed. Implemented in a gradual or stepwise fashion, this approach combines scientific risk assessment with public values and perceptions. It focuses on the hazardous properties of the waste in question and how they compare with other waste materials. The approach is based on established principles for risk-informed decision making, current risk-informed initiatives by waste regulators in the United States and abroad, solutions available under current regulatory authorities and remedies through new legislation when necessary.
