## **Regulating Religion Case Studies From Around The Globe:**

**Regulating Religion** James T. Richardson, 2004 Regulation of minority faiths varies greatly around the globe with some countries allowing them considerable freedom to exist recruit new members raise money and use public facilities Other societies are more closed to the presence of such groups either native or foreign The pattern of reactions to minority religious movements is not easily explained by reference to usual terms Knowledge of historical factors in the various countries coupled with a use of selected theories from sociology of religion and sociology of law can assist understanding of the situation in various countries Explicating these complex relationships is the challenge of this volume *Regulating Religion Case Studies from Around the Globe* presents through the inclusion of contributions by international scholars a global examination of how a number of contemporary societies are regulating religious groups It focuses on legal efforts to exert social control over such groups especially through court cases but also with selected major legislative attempts to regulate them As such this analysis falls within the broad area of the sociology of social control and more specifically legal social control a topic of great interest when studying how contemporary societies attempt to maintain social order The factual details about social and legal developments in societies where religion has been defined as problematic include Western and Eastern Europe Asia Oceania and the Americas *Regulating Religion* James T Richardson, 2003-12-01

**The Sociology of Shari'a: Case Studies from around the World** Adam Possamai, James T Richardson, Bryan S. Turner, 2014-12-04 This edited volume offers a collection of papers that present a comparative analysis of the development of Shari'a in countries with Muslim minorities such as America Australia Germany and Italy as well as countries with Muslim majorities such as Malaysia Bangladesh Turkey and Tunisia The Sociology of Shari'a provides a global analysis of these important legal transformations and analyzes the topic from a sociological perspective It explores examples of non Western countries that have a Muslim minority in their populations including South Africa China Singapore and the Philippines In addition the third part of the book includes case studies that explore some ground breaking theories on the sociology of Shari'a such as the application of Black Chambliss and Eisenstein's sociological perspectives

**Legal Cases, New Religious Movements, and Minority Faiths** James T. Richardson, François Bellanger, 2016-04-22 New religious movements NRMs and other minority faiths have regularly been the focus of legal cases around the world in recent decades This is the first book to focus on important aspects of the relationship of smaller faiths to the societies in which they function by using specific legal cases to examine social control efforts The legal cases involve group leaders a group's practices or alleged abuses against members and children in the group legal actions brought by former members or third parties attacks against such groups by outsiders including even governments and libel and slander actions brought by religious groups as they seek to defend themselves These cases are sometimes milestones in the relation between state authorities and religious groups Exploring cases in different parts of the world and assessing the events causing such cases and their consequences this book offers a practical

insight for understanding the relations of NRMs and other minority religions and the law from the perspective of legal cases. Chapters focus on legal, political and social implications. Including contributions from scholars, legal practitioners, actual or former members and authorities involved in such cases from various jurisdictions, this book presents an objective approach to understanding why so many legal actions have involved NRMs and other minority faiths in recent years in western societies and the consequences of those actions for the society and the religious group as well.

**The Oxford Handbook of New Religious Movements** James R. Lewis, Inga Bårdsen Tøllefsen, 2016. The Oxford Handbook of New Religious Movements both covers the current state of the field and breaks new ground. Its contributors drawn from both sociology and religious studies are leading figures in the study of NRMs.

**The Oxford Handbook of Church and State in the United States** Derek H. Davis, 2010-11-18. Study of church and state in the United States is incredibly complex. Scholars working in this area have backgrounds in law, religious studies, history, theology and politics among other fields. Historically they have focused on particular angles or dimensions of the church-state relationship because the field is so vast. The results have mostly been monographs that focus only on narrow cross sections of the field and the few works that do aim to give larger perspectives are reference works of factual compendia which offer little or no analysis. The Oxford Handbook of Church and State in the United States fills this gap, presenting an extensive multidimensional overview of the field. Twenty-one essays offer a scholarly look at the intricacies and past and current debates that frame the American system of church and state within five main areas: history, law, theology, philosophy, politics and sociology. These essays provide factual accounts but also address issues, problems, debates, controversies and where appropriate suggest resolutions. They also offer analysis of the range of interpretations of the subject offered by various American scholars. This Handbook is an invaluable resource for the study of church-state relations in the United States.

**Regulating Religion in Asia** Jaclyn L. Neo, Arif A. Jamal, Daniel P. S. Goh, 2019-03-28. Examines how law regulates religion and explores the influence of world religions on the legal systems in Asia, including how religion responds to such regulations. It looks at underlying norms influencing state regulation of religion and the challenges emerging from such regulation.

**Proselytization Revisited** Rosalind I. J. Hackett, 2014-12-05. The act of converting people to certain beliefs or values is highly controversial in today's postcolonial multicultural world. Proselytization has been viewed by some as an aggressive act of political domination. Proselytization Revisited offers a comprehensive overview of the many arguments for and against proselytization in different regions and contexts. Proselytization is examined in the context of rights talk, globalisation and culture wars. The volume brings together essays demonstrating the global significance of proselytization, ranging from Christians in India to Turkish Islamic Movements and the Wiccan use of modern media technologies. The cross-cultural and multidisciplinary nature of this collection of essays provides a fresh perspective and the book will be of value to readers interested in the dynamic interaction of beliefs, ideas and cultures.

**'Cult Wars' in Historical Perspective** Eugene V. Gallagher, 2016-07-01. Cult Wars in Historical Perspective

provides a broad characterization of the shifting religious contours over the past several decades. Offering an assessment of several important topics in the study of new religions, this book explores developments in well-known groups such as the Unification movement, The Family International, Children of God, the International Society for Krishna Consciousness (ISKCON), and the Church of Scientology. Bringing together both insiders and outsiders from various academic disciplines and personal perspectives, this book takes account of the ways in which the cult question is defined and addressed in different countries. It offers a vivid depiction of how the cult wars or cult controversies of the late twentieth and early twenty-first centuries first took shape, the transformation of deeply entrenched positions on cults and sects as at least some members of new groups, cult watchers, and academics entered into serious and sustained conversations about topics of mutual concern, the shifting foci and concerns of the general public, law enforcement, and the courts, and academics in various countries, and the complex histories of individual groups in which many dramatic transformations have occurred despite their comparatively short life spans.

**Handbook of Forensic Sociology and Psychology** Stephen J. Morewitz, Mark L. Goldstein, 2013-08-20. The role of behavioral and social sciences in the courtroom setting has expanded exponentially in the past few decades. It is now widely recognized that scientists in these areas provide critical contextual information for legal decision making and that there is a reliable knowledge base for doing so. While there are many handbooks of forensic psychology, this is the first such volume to incorporate sociological findings, broadening the conceptual basis for examining cases in both the civil and criminal realms, including immigration issues, personal injury, child custody, and sexual harassment. This volume will examine the responsibilities of expert witnesses and consultants and how they may utilize principles, theories, and methods from both sociology and psychology. It will show these disciplines together can improve the identification and apprehension of criminals as well as enhance the administration of justice by clarifying profiles of criminal behavior, particularly in cases of serial killers, death threat makers, stalkers, and kidnappers. The volume is quite comprehensive, covering a range of medical, school, environmental, and business settings. Throughout, it links basic ideas to real applications and their impact on the justice system.

*The New Governance of Religious Diversity* Tariq Modood, Thomas Sealy, 2024-06-11. Religious diversity is a key feature of countries across the world today, but it also presents governments with very real challenges. Controversies around religious free speech, symbols, social values, and morals, and the role of faith leaders as critical voices are just a few of the issues that have given rise to fierce social, political, and scholarly debate. So how do states include and accommodate religious diversity, and should this change? What are the key difficulties facing states when it comes to governing religious diversity? Understanding this complex phenomenon means thinking through secularism, liberalism, multiculturalism, and nationalism in theory and practice. In this new book, Tariq Modood and Thomas Sealy draw on original research to present new ways of analysing the governance of religious diversity in different regions of the world. Identifying the key challenges at stake, they also argue for a new statement of multiculturalism in relation to the governance of religious diversity that of

multiculturalised secularism which represents a constructive and productive response to the reality of religiously plural societies      The Law and Religious Market Theory Jianlin Chen,2017-10-12 With comparative case studies from China Taiwan and Hong Kong Jianlin Chen s new work offers a fresh descriptive and normative perspective on law and religion This presentation of the original law and religious market theory employs an interdisciplinary approach that sheds light on this subject for scholars in legal and sociological disciplines It sets out the precise nature of religious competition envisaged by the current legal regimes in the three jurisdictions and analyses how certain restrictions on religious practices may facilitate normatively desirable market dynamics This updated and invaluable resource provides a new and insightful investigation into this fascinating area of law and religion in Greater China today      *A Sociology of Religious Freedom* Olga Breskaya,Giuseppe Giordan,James T. Richardson,2024-09-27 In recent years the relevance of religious freedom has spread well beyond academia becoming a reference point for international relations multi level policy development as well as interfaith negotiations Meanwhile scholarship on religious freedom has flourished on the boundaries of sociology law comparative politics history and theology This book presents a systematic sociological analysis of religious freedom bringing together classical sociological theories and empirical perspectives developed during the last three decades It addresses three major questions involved in any sociology of religious freedom First considering its complex and controversial nature how can religious freedom be defined Second what are the recurrent sociological conditions and relevant social perceptions that will foster an understanding of religious freedom in varying political legal and socioreligious contexts And third what are the mechanisms of social implementation of religious freedom that contribute to making it a fundamental value in a society Olga Breskaya Giuseppe Giordan and James T Richardson suggest that a sociological definition of religious freedom requires us to take into account historical philosophical legal religious and political considerations of a given society and that the social dimensions of religious freedom are as important as the legal ones      New Approaches to the Study of Religion Peter Antes,Armin W. Geertz,Randi Ruth Warne,2004      **The World's Religions** Peter B. Clarke,Peter Beyer,2009-05-07 This comprehensive volume focuses on the world s religions and the changes they have undergone as they become more global and diverse in form It explores the religions of the world not only in the regions with which they have been historically associated but also looks at the new cultural and religious contexts in which they are developing It considers the role of migration in the spread of religions by examining the issues raised for modern societies by the increasing interaction of different religions The volume also addresses such central questions as the dynamics of religious innovation which is evidenced in the rise and impact of new religious and new spirituality movements in every continent      *State Responses to Minority Religions* David M. Kirkham,2017-05-15 The response of states to demands for free exercise of religion or belief varies greatly across the world In some places religions come as close as imaginable to autonomous existences with little interference from government In other cases religion finds itself grinding out a meagre living if at all under the jealousy

watchful eye of the state This book provides a legal and normative overview of the variety of responses to minority religions available to states Exploring case studies ranging from Islamic regions such as Indonesia Pakistan and the wider Middle East to Western Europe Eastern Europe China Russia Canada and the Baltics contributors include international scholars and experts in law sociology religious studies and political science This book offers invaluable perspectives on how minority religions are currently being received reviewed challenged or ignored in different parts of the world **Routledge**

**Handbook on the Governance of Religious Diversity** Anna Triandafyllidou,Tina Magazzini,2020-12-30 This book critically reviews state religion models and the ways in which different countries manage religious diversity illuminating different responses to the challenges encountered in accommodating both majorities and minorities The country cases encompass eight world regions and 23 countries offering a wealth of research material suitable to support comparative research Each case is analysed in depth looking at historical trends current practices policies legal norms and institutions By looking into state religion relations and governance of religious diversity in regions beyond Europe we gain insights into predominantly Muslim countries Egypt Morocco Tunisia Turkey Indonesia Malaysia countries with pronounced historical religious diversity India and Lebanon and into a predominantly migrant pluralist nation Australia These insights can provide a basis for re thinking European models and learning from experiences of governing religious diversity in other socio economic and geopolitical contexts Key analytical and comparative reflections inform the introduction and concluding chapters This volume offers a research and study companion to better understand the connection between state religion relations and the governance of religious diversity in order to inform both policy and research efforts in accommodating religious diversity Given its accessible language and further readings provided in each chapter the volume is ideally suited for undergraduate and graduate students It will also be a valuable resource for researchers working in the wider field of ethnic migration religion and citizenship studies **Religion and Space** Lily Kong,Orlando Woods,2016-02-11 This is the first study to bring space into conversation with religious competition conflict and violence in the contemporary world Lily Kong and Orlando Woods argue that because space is both a medium and an outcome of religious activity it is integral to understanding processes of religious competition conflict and violence The book explores how religious groups make claims to both religious and secular spaces and examines how such claims are managed negotiated and contested by the state and by other secular and religious agencies It also examines how globalisation has given rise to new forms of religious competition and how religious groups strengthen themselves through the development of social resilience as well as contribute to resilient societies Throughout the book case studies from around the world are used to examine how religious competition and conflict intersect with space The case studies include topical issues such as competing claims to the Temple Mount Haram el Sharif in Jerusalem opposition to the Ground Zero mosque in New York City and the regulation of religious conversion in India and Sri Lanka By helping readers develop new perspectives on how religion works in and through space **Religion and Space**

Competition Conflict and Violence in the Contemporary World is an innovative contribution to the study of religion

**Beyond Brainwashing** Rebecca Moore, 2018-05-17 This Element reviews the state of the question regarding theories of cultic violence. It introduces definitions and vocabulary and presents relevant historical examples of religious violence. It then discusses the 1960s and 1970s, the period immediately before the Jonestown tragedy. Considerations of the post-Jonestown 1978 and then post-Waco 1993 literature follow. After 9/11/2001, some of the themes identified in previous decades reappear. The Element concludes by examining the current problem of repression and harassment directed at religious believers. Legal discrimination by governments as well as persecution of religious minorities by non-state actors has challenged earlier fears about cultic violence.

*Trúc Lâm Buddhism in Vietnam* Laura Thuy-Loan Nguyen, 2021-01-13 In the thirteenth century, King Monk Tr n Nh n T ng founded the Tr c L m Thi n Chan Zen sect. During the Golden Age in Vietnamese Buddhist history, the sect flourished under three patriarchs with renowned Thi n masters. Unfortunately, the Tr c L m sect faded over the following centuries, and Thi n Buddhism in Vietnam for the most part disappeared. In the late twentieth century, a growing new religious movement led by Th ch Thanh T a Pure Land monk called for a restoration of Tr c L m Thi n Buddhism. Who is Th ch Thanh T? How and why did he choose to revive this particular sect and its emancipation practices? Tr c L m currently boasts hundreds of monasteries and thousands of monks and nuns in Vietnam and beyond, but how have the forces of modernity influenced its original traditions? Through existing literature and extensive onsite fieldwork, this book analyzes the history and revival of a forgotten Buddhist sect and examines the movement's reform.
