Discussions included in this book: an introduction to smart contracts and their potential from a commercial and consumer law perspective to change the nature of transactions between parties; the impact that Blockchain has already had on financial services and the possible consumer risks and macro economic issues that may arise in the future; the challenges that are facing global securities regulators with the development of Initial Coin Offerings and the ongoing risks that they pose to the investing public; the risk of significant privacy breaches due to the online public nature of Blockchain and the future of Blockchain technology.
