Regulation Of Phytochemicals By Molecular Techniques:

Regulation of Phytochemicals by Molecular Techniques J.A. Saunders, B.F. Matthews, John Romeo, 2001-07-23 The papers assembled in this volume were originally presented at the joint meeting of the Phytochemical Society of North America and the Mid Atlantic Plant Molecular Biology Society in August 2000 The symposium from which these chapters were prepared was entitled Regulation of Phytochemicals by Molecular Techniques and was organised by James Saunders and Ben Matthews This joint meeting was timely because of recent landmark advances in molecular biology and genomics as well as the renewed interest in phytochemistry as a rich source of nutraceuticals drugs and alternatives to synthetic agriculture pesticides Progress in genome sequencing in plants such as Arabidopsis and rice has been remarkable as have expressed sequence tag EST projects in other plants including maize and soybean Recently private and public sector participants of the Human Genome Project announced that a rough draft of the human genome has been constructed These advances directly influence phytochemical investigations by providing both insight and tools for exploring and manipulating genomes The chapters cover a wide range of applications from molecular biology to phytochemistry and from basic studies on promoters and gene expression to pathway regulation and engineering with transformed plants A number of noteworthy aspects emerge from this volume applications of molecular biology to phytochemical practical problems are succeeding newly emerging molecular tools promise to open new doors to discovery and remarkable progress has already occurred in phytochemical pathway engineering

Chemical Ecology and Phytochemistry of Forest Ecosystems J.T.

Romeo, 2005-07-26 The Phytochemical Society of North America held its forty fourth annual meeting in Ottawa Ontario Canada from July 24-28 2004. This year's meeting was hosted by the University of Ottawa and the Canadian Forest Service Great Lakes Forestry Centre and was held jointly with the International Society of Chemical Ecology. All of the chapters in this volume are based on papers presented in the symposium entitled Chemical Ecology and Phytochemistry of Forest Ecosystems. The Symposium Committee Mamdouh Abou Zaid John T. Arnason Vincenzo deLuca Constance Nozzolillo and Bernard Philogene assembled an international group of phytochemists and chemical ecologists working primarily in northern forest ecosystems. It was a unique interdisciplinary forum of scientists working on the cutting edge in their respective fields. While most of these scientists defy the traditional labels we are accustomed to they brought to the symposium expertise in phytochemistry insect biochemistry molecular biology genomics and proteomics botany entomology microbiology mathematics and ecological modeling. A collection of papers presented at the 44th Annual meeting of the Phytochemical Society of North America. Representation from a unique interdisciplinary forum of scientists. Includes discussions on new genomics research in forest health.

Phytochemistry in the Genomics and Post-Genomics Eras John Romeo, R.A.

Dixon, 2002-06-20 This monograph series is commissioned by the Phytochemical Society of North America (PSNA). The volumes in this series contain articles on developing topics of interest to scientists students and individuals interested in recent developments in the biochemistry chemistry and molecular biology of plants. Volume 36 centers on the role of phytochemistry in the rapid developments in biology brought about by the application of large scale genomics approaches. Several functional genomic approaches discussed in this volume address plant gene function on a large scale. Plants are combinatorial chemists par excellence and understanding the principles that relate enzyme structure to function will open up unlimited possibilities for the rational design of new enzymes to generate novel biologically active natural products. Knowledge of the molecular genetics of plant natural product pathways will also facilitate the engineering of these pathways for plant improvement and human benefit. Phytochemistry truly has a great future in the genomics and post genomics eras.
