INTRODUCTION

Cognitive-Motor Development and Dysfunction

Little difference exists between the development of cognitive and motor function in childhood and the relearning of cognitive and motor function post-trauma in adulthood. "Rehabilitation recapitulates phylogeny." In all cases, function must either be learned or re-learned. That learning developmentally is associated with the formation and integration of motor and cognitive milestones.

Rehabilitation Of Cognitive Disabilities:

The Rehabilitation of Cognitive Disabilities Charles J. Long, J.M. Williams, 2012-12-06 The rehabilitation of intellectual impairment resulting from brain injury has become a major professional activity of clinical neuropsychologists. In recent years, neuropsychology has developed from a professional role stressing assessment and diagnosis to one that now includes treatment and rehabilitation activities. Such trends are also manifested in two new research interests of neuropsychologists: the study of the generalizability of neuropsychological test findings to everyday abilities (often referred to as the ecological validity of tests) and outcome studies of cognitive retraining treatments. Discovering the relationships between traditional neuropsychological tests and everyday behavior is important because the referral questions posed to neuropsychologists have changed. Now the neuropsychologist is asked to comment on the patient's functional intellectual abilities as they relate to the everyday demands of home work and educational settings. Of course, the development of cognitive retraining theory and procedures allows neuropsychologists to intervene in the treatment of the cognitive problems that the neuropsychological evaluation has documented. Since these approaches are still in their formative stages, they have been the subject of clinical lore, great controversy, and little systematic research. This situation prompted one of our presenters to lament: Either you believe Cognitive Retraining is divinely inspired or the work of the devil. There is apparently little middle ground. Given this state of affairs, the program committee of the Mid South Conference on Human Neuropsychology decided to focus on the role of neuropsychologists in rehabilitation.

Handbook of Clinical Trials P. Brouwers, E. Mohr, 1991-01-01 Behavior is an aspect of clinical trials that has been somewhat neglected, and the problems associated with behavioral assessment and control in clinical trials are complex. These contributions deal with the selection and application of assessment techniques in different patient populations.

The Oxford Handbook of Adult Cognitive Disorders Michael L. Alosco, Robert A. Stern, 2019-05-07 The prevalence of adult cognitive disorders will dramatically rise over the next 25 years due to the aging population.
