Smith,2005 Covers the traditional literature on the philosophy of the social sciences and the contemporary philosophical and methodological debates developing at the heart of the disciplinary and interdisciplinary groups in the social sciences It addresses the needs of researchers and academics who are grappling with the relationship between questions of knowledge

construction and the problems of social scientific method Restructuring Capitalism Rogene Buchholz, 2017-04-21 The main theme of this book is that within contemporary capitalist societies a materialist outlook informed by science has triumphed creating the lack of a spiritual dimension to give meaning and purpose to the activities that are necessary for a capitalist society to function effectively Capitalist societies are in trouble and need to be restructured to provide for the material needs of all the people who work within the system not just the one percent but because of the lack of a spiritual connection with each other and with nature this is not likely to happen It has been said that society and the organizations within treat one another as objects to be manipulated in the interests of promoting economic growth and treat nature as an object to be exploited for the same purpose This way of treating each other and nature is consistent with the way a capitalist system has worked in the past and was supposed to enable it to function efficiently to provide a fulfilling and enriched life for all its adherents through growth of the economy However as capitalist societies have become dysfunctional they will need a different kind of orientation to continue in existence Restructuring Capitalism Materialism and Spiritualism in Business argues that what is needed is a new sense of a spiritualization of the self and its relation to others and to the establishment of a spiritual connection with nature in order for capitalism to be restructured to work for everyone and for the society as a whole Cosmopolitan Imaginaries and International Disorder Aaron C McKeil, 2025-03-26 While the idea of a cosmopolitan order embracing all humankind is ancient after the Cold War it was widely believed to be an emerging future As global interdependence and interaction through new technologies increased literature of cosmopolitan globalization argued that these changes were setting the stage for a structural transformation of world politics Yet a revolt against globalism and increasingly divisive and unstable international order has dramatically contradicted this idea This presents a puzzle for International Relations theory Why have attempts to construct cosmopolitan order struggled to emerge in the modern global world Cosmopolitan Imaginaries and International Disorder argues that advocacy for cosmopolitan order reform in the modern world has struggled to recognize the political identities of states and populations and to legitimize its proposed political hierarchies As a result these efforts have been overwhelmed by states shoring up their power and remobilizing exclusionary nationalist identities especially when struggles are intensified in contexts of international instability and economic turmoil In developing a theory to explain these patterns of cosmopolitan politics this book offers insight into the limits and role of cosmopolitanism in a dividing international order after liberal globalism *Reinventing Ireland* Peadar Kirby, Luke Gibbons, Michael Cronin, 2002-04-20 Over the last decade the Irish economy has experienced a period of unprecedented growth which has earned it the title Celtic Tiger This success has been interpreted by academic commentators as marking a social and cultural transformation what some have called the reinvention of Ireland The essays in this book challenge the largely positive interpretation of Ireland's changing social order The authors identify the ways in which culture and society have been made subservient to the needs of the market in this new neoliberal Ireland They draw on

subversive strands in Irish history and offer a broader and more robust understanding of culture as a site of resistance to the dominant social order and as a political means to fashion an alternative future *The Futurist* ,1992 Department of the Interior and Related Agencies Appropriations for 1996: Secretary of Interior United States. Congress. House. Committee on Appropriations. Subcommittee on Department of the Interior and Related Agencies,1995 ONR Presents-- United States. Office of Naval Research,2000
