J. Flamm, T. Luisi, 2012-12-06 The ever increasing public demand and the setting up of national and international legislation on safety assessment of potentially dangerous plants require that a correspondingly increased effort be devoted by regulatory bodies and industrial organisations to collect reliability data in order to produce safety analyses Reliability data are also needed to assess availability of plants and services and to improve quality of production processes in particular to meet the needs of plant operators and or designers regarding maintenance planning production availability etc The need for an educational effort in the field of data acquisition and processing has been stressed within the framework of EuReDataA an association of organisations operating reliability data banks This association aims to promote data exchange and pooling of data between organisations and to encourage the adoption of compatible standards and basic definitions for a consistent exchange of reliability data Such basic definitions are considered to be essential in order to improve data quality To cover issues directly linked to the above areas ample space is devoted to the definition of failure events common cause and human error data feedback of operational and disturbance data event data analysis lifetime distributions cumulative distribution functions density functions Bayesian inference methods multivariate analysis fuzzy sets and possibility theory etc

Reliability Data Banks A. G. Cannon, 2012-12-06 *Knowledge Management in Fuzzy Databases* Olga Pons, Maria A. Vila, 2013-11-11 1 When I was asked by the editors of this book to write a foreword I was seized by panic Obviously neither I am an expert in Knowledge Representation in Fuzzy Databases nor I could have been beforehand unaware that the book s contributors would be some of the most outstanding researchers in the field However Amparo Vila s gentle insistence

gradually broke down my initial resistance and panic then gave way to worry Which paving stones did I have at my disposal for making an entrance to the book After thinking about it for some time I concluded that it would be pretentious on my part to focus on the subjects which are dealt with directly in the contributions presented and that it would instead be better to confine myself to making some general reflections on knowledge representation given by imprecise information using fuzzy sets reflections which have been suggested to me by some words in the following articles such as graded notions fuzzy objects uncertainty fuzzy implications fuzzy inference empty intersection etc
