Religion Nationalism In Soviet East European Politics:

Religion and Nationalism in Soviet and East European Politics Sabrina P. Ramet, 1989 Religious organizations in many countries of the communist world have served as agents for the preservation defense and reinforcement of nationalist feelings and in playing this role have frequently been a source of frustration to the Communist Party elites Although the relationship between governments and religious groups varies according to the particular country and group in question the mosaic of these relationships constitutes a revealing picture of the political reform shaping the lives of Soviet and East European citizens

Church, State, and Democracy in Expanding Europe Lavinia Stan, Lucian Turcescu, 2011-08-29 Lavinia Stan and Lucian Turcescu examine the relationship between religion and politics in ten former communist Eastern European countries Contrary to widespread theories of increasing secularization Stan and Turcescu argue that in most of these countries the populations have shown themselves to remain religious even as they embrace

modernization and democratization Church state relations in the new EU member states can be seen in political representation for church leaders governmental subsidies registration of religions by the state and religious instruction in public schools Stan and Turcescu outline three major models the Czech church state separation model in which religion is private and the government secular the pluralist model of Hungary Bulgaria and Latvia which views society as a group of complementary but autonomous spheres for example education the family and religion each of which is worthy of recognition and support from the state and the dominant religion model that exists in Poland Romania Estonia and Lithuania in which the government maintains informal ties to the religious majority Church State and Democracy in Expanding Europe offers critical tools for understanding church state relations in an increasingly modern and democratic Eastern Europe **Religion,**

Democracy and Democratization John Anderson, 2013-09-13 A new exploration of the troubled relationship between religion and democracy focusing in on two key questions how has religion engaged with the democratization processes that have taken place over the last thirty years how can it contribute towards democracy in the future These questions are tackled with clarity and rigour Select chapters explore the ways in which religious ideas have been used to undermine authoritarian regimes and how religious institutions have provided the basis for resistance to such regimes The reader is This book was previously published as a special issue of the leading journal Democratization **Modes of Religiosity in Eastern**

Christianity Vlad Naumescu, 2007 This volume offers original insights into the religious transformations taking place in postsocialist western Ukraine Applying a cognitive theory based on two modes of religiosity the doctrinal and the imagistic author Vlad Naumescu reveals the mechanisms of reproduction and change that make the local eastern Christian tradition a living tradition of faith He combines rich ethnographic materials with historical and theological sources to depict a religion in equilibrium between the two modes maintaining revelation at the core of its doctrinal corpus He argues that religion is a potential source for social change that empowers people to act upon reality and transform it With his innovative exploration of the dynamics of an eastern Christian tradition Naumescu makes a major contribution to the emerging anthropology of Christianity as well as to studies of postsocialism **Post-Soviet Political Order** Barnett Rubin, Jack Snyder, 2002-11-01

Post Soviet Political Order asks what is shaping the institutional pattern of the post Soviet political order what the new order will be like what patterns of conflict are emerging and what can be done about stabilising the region In considering these questions the contributors converge on four common themes the institutional legacy of empire the social processes unleashed by imperial collapse patterns of bargaining within and between states to resolve conflicts arising out of the imperial collapse the impact of the wider international setting on the pattern of post imperial politics Focusing on the former Soviet Union and Eastern European countries the contributors show how strong state institutions are essential if conflict and political instability are to be avoided **Transnational Actors in Central and East European Transitions** Mitchell

Alexander Orenstein, Stephen Bloom, Nicole Lindstrom, 2008-07-06 When Vladimir Putin claimed outside forces were at work

during the Ukrainian Orange Revolution of 2004 it was not just a case of paranoia In this uprising against election fraud protesters had been trained in political organization and nonviolent resistance by a Western financed democracy building coalition Putin s accusations were more than just a call to xenophobic impulses they were a testament to the pervasive influence of transnational actors in the shaping of postcommunist countries Despite this the role of transnational actors has been downplayed or dismissed by many theorists Realists maintain that only powerful states assert major influence while others argue that transnational actors affect only rhetoric not policy outcomes The editors of this volume contend that transnational actors have exerted a powerful influence in postcommunist transitions They demonstrate that transitions to democracy capitalism and nation statehood which scholars thought were likely to undermine one another were facilitated by the integration of Central and East European states into an international system of complex interdependence Transnational actors turn out to be the dark matter that held the various aspects of the transition together Transnational actors include international governmental and nongovernmental organizations corporations banks foundations religious groups and activist networks among others The European Union is the most visible transnational actor in the region but there are many others including the OSCE NATO Council of Europe the Catholic Church and the Soros Foundation Transnational Actors in Central and East European Transitions assembles leading scholars to debate the role and impact of transnational actors and presents a promising new research program for the study of this rapidly transforming region Soviet and Kosher Anna Shternshis,2006-05-21 Kosher pork an oxymoron Anna Shternshis s fascinating study traces the creation of a Soviet Jewish identity that disassociated Jewishness from Judaism The cultural transformation of Soviet Jews between 1917 and 1941 was one of the most ambitious experiments in social engineering of the past century During this period Russian Jews went from relative isolation to being highly integrated into the new Soviet culture and society while retaining a strong ethnic and cultural identity This identity took shape during the 1920s and 1930s when the government attempted to create a new Jewish culture national in form and socialist in content Soviet and Kosher is the first study of key Yiddish documents that brought these Soviet messages to Jews notably the Red Haggadah a Soviet parody of the traditional Passover manual songs about Lenin and Stalin scripts from regional theaters Socialist Realist fiction and magazines for children and adults More than 200 interviews conducted by the author in Russia Germany and the United States testify to the reception of these cultural products and provide a unique portrait of the cultural life of the average Soviet Jew Islam and Colonialism Will Myer,2003-08-27 Tracing the development of western thought about Central Asia this book argues that for historical and political reasons Central Asia was seen as being in a colonial relationship with Russia Consequently an anti colonial revolution in Asia was seen as the greatest threat to the USSR The book questions the suitability of the colonial model for understanding the region s recent political history and challenges many of the assumptions which underlay the adoption of such a model and examines how this one interpretation came to dominate western discourse to the virtual exclusion of all

others **The Bosnian Muslims** Francine Friedman, 2018-10-08 Although their plight now dominates television news worldwide the Bosnian Muslims were until recently virtually unknown outside of Yugoslavia This meticulously researched comprehensive book traces the turbulent history of the Bosnian Muslims and shows how their mixed secular and religious identity has shaped the conflict in which they are now so tragically embroiled Although their plight now dominates television news worldwide the Bosnian Muslims were until recently virtually unknown outside of Yugoslavia Who are these people Why are they the focus of their former neighbors rage What role did they play in Yugoslavia before they became the victims of ethnic cleansing Why has Bosnia Hercegovina once a model of ethnic tolerance and multicultural harmony suddenly exploded into ethnic violence Focusing on these questions Friedman provides a comprehensive study of this national group whose plight has riveted governments the press and the public alike With a name reflecting both their religious and their national identity the Bosnian Muslims are unique in Europe as indigenous Slavic Muslims Descendants of schismatic Christians from the Middle Ages they converted to Islam after the Ottoman conquest of Bosnia The book follows them as they went from victims of crusades during the Middle Ages to members of the ruling elite within the Ottoman Empire from rulers back to subjects under Austria Hungary and later subjects again this time under the Serbs in the interwar Yugoslav Kingdom and the Communists after World War II The Bosnian Muslims have survived through it all even thriving during certain periods most notably when they were recognized by Tito as a nation Meticulously tracing their turbulent history and assessing the issues surrounding Bosnian Muslim nationhood in Yugoslavia Friedman shows us how the mixed secular and religious identity of the Bosnian Muslims has shaped the conflict in which they are now so tragically embroiled **Religious Nationalism in**

Modern Europe Philip W. Barker, 2008-08-20 This volume examines the enduring nature of religious nationalism in modern Europe Through a series of in depth case studies covering Ireland England Poland and Greece the author argues that religious frontiers or geographic lines of division between different and unique religions are central to the formation of religiously based national identities Typically as states develop economically and politically religion plays a lesser role in both individual lives and national identity However at religious frontiers religion becomes useful for differentiating and mobilizing groups of people This is particularly true when the religious frontier also represents a threat or conflict Although religion may not be the root of conflict in these instances the conflict takes on religious tones because of its ability to unite an otherwise diverse population Religion takes precedence over language culture or other national building blocks because the other can best be distinguished in religious terms The in depth case studies allow for a deep historical understanding of the processes which converge to create a modern religious nation Greatly expanding our current understanding of the conditions in which religious nationalism develops this important book has implications for our understanding of religion and politics secularization European politics and foreign policy **Political Transformation and Changing Identities in Central and Eastern Europe** Andrew M. Blasko, Diana Januaskiene, 2008 The Catholic Church in Polish History Sabrina P.

Ramet,2017-06-22 The book chronicles the evolution of the church's political power throughout Poland's unique history. Beginning in the tenth century, the study first details how Catholicism overcame early challenges in Poland from converting the early polytheists to pushing back the Protestant Reformation half a millennium later. It continues into the dawn of the modern age, including the division of Poland between Prussia, Russia, and Austria between 1772 and 1795, the interwar years, the National Socialist occupation of World War Two, and the communist and post-war communist eras during which the Church only half correctly presented itself as a steadfast protector of Poles with clergy members who either stood up to foreign authorities or collaborated with those same Nazi and Communist leaders. This study ends with a consideration of how the Church has taken advantage of the fall of communism to push its own social agenda at times against the wishes of most Poles. Censorship Derek Jones,2001-12-01 First published in 2002, Routledge is an imprint of Taylor & Francis, an information company.

The Formation of the Uzbek Nation-state Anita Sengupta,2003-01-01 The Formation of the Uzbek Nation State is a detailed and insightful examination of the process of nation-state formation in the Central Asian region in the post-October revolution period, based on a case study of Uzbekistan. Author Anita Sengupta examines the role of language and religion in the formation of the Uzbek nation-state and demonstrates the continuous transition involved in such a process.

Art, Religion and Resistance in (Post-)Communist Romania Maria Alina Asavei,2020-10-22 This book illuminates the interconnections between politics and religion through the lens of artistic production, exploring how art inspired by religion functioned as a form of resistance directed against both Romanian national communism (1960-1989) and latterly consumerist society and its global market. It investigates the critical tactical and subversive employments of religious motifs and themes in contemporary art pieces that confront the religious affair in post-communist Romania. In doing so, it addresses a key gap in previous scholarship which has paid little attention to the relationship between religious art and political resistance in communist Central and South East Europe.

Governing Religious Diversity in Global Comparative Perspective Tariq Modood,Thomas Sealy,2023-09-06 This book presents comparative analyses of different modes of the governance of religious diversity and state-religion connections and relations in twenty-three countries in five world regions: Western Europe, Southern and South Eastern Europe, Central and Eastern Europe, the MENA region, and South and Southeast Asia. Debates and controversies around the governance of religious diversity have become important features of the social and political landscape in different regions and countries across the world. The historical influences and legacies and the contemporary circumstances provoking these debates vary between contexts, and there have been a range of state and scholarly responses to how and why particular understandings and arrangements of state-religion relations should be preferred over others. The analyses of country cases and regions presented in this volume are based on extensive reviews of secondary literature of legal and policy landscapes and, in some cases, on interviews. This book will be a great resource for academics, researchers, and advanced students interested in the sociology of religion, religious studies, politics, and

migration studies The contributions in this volume arise out of the Horizon2020 funded GREASE project It was originally published as a special issue of Religion State and Society
