Long Waves Of Regional Development:

Long Waves of Regional Development Michael Marshall, 1985 **Long Waves of Growth, Hegemonic Power, and Climate Change in the World Economy** Phillip Anthony O'Hara, 2025-10-02 This book investigates eras of major geopolitical and socioeconomic power development relative demise and potential renewal for four major political economies. It concentrates on the Dutch Golden Age of the late 1500s and 1600s, British hegemony of the 1800s, Pax Americana of the 1900s, and Chinese potential hegemony of the 2000s, as well as long wave patterns of change over successive centuries to the present and to some degree into the future. Dutch, British, US, and Chinese economies are situated within patterns of long-term successive rise and fall and fall and rise of economic growth, hegemony, and climate change in the world political economy, including linkages between core, periphery, and semi-periphery. Patterns of multiple crises tend to appear in between hegemonic periods, and climate change often undergoes complex dynamics through time while currently climate anomalies are emerging during mostly long wave downswings and polycrises in the world economy. Contemporary themes of the book include the ongoing competition for world domination between the US and China, the conflict over Ukraine, Taiwan, that some think may generate world war 3, the climate change crisis that continues to plague the world, and whether the world and its major economies are likely to undergo a Golden Age into the future. Chapter 7 of this book on US hegemony and long waves includes extracts of material that won the Myrdal Prize for Book of the Year Prize from EAEPE, as well as Journal Article of the Year from Curtin Business School. Ideas from parts of Chapter 9 emanate from a volume that won Book of the Year Award from CBS. A climate change paper that won Journal Article of the Year Awards from EAEPE and CBS informed ideas that are used in several parts of this book. The book outlines key stylized facts from the analysis and presents hypotheses for further investigation on the relationship between long-term growth, hegemony, and climate change. The book uses the work of Kondratiev, Schumpeter, and company, themes in economic history, modern political economy schools, and the principles of political economy contingency paradigm to reformulate long wave hegemony and climate change hypotheses and empirics.

Local and Regional Development Andy Pike, Andrés Rodríguez-Pose, John Tomaney, Andrés Rodríguez-Pose, 2006-11-22 Local and regional development is an increasingly global issue. For localities and regions, the challenge of enhancing prosperity, improving wellbeing, and increasing living standards has become acute. For localities and regions formerly considered discrete parts of the developed and developing worlds, amid concern over the definitions and sustainability of development, a spectre has emerged of deepened unevenness and sharpened inequalities in the development prospects for particular social groups and territories. Local and Regional Development engages and addresses the key questions: what are the principles and values that shape definitions and strategies of local and regional development? What are the conceptual and theoretical frameworks capable of understanding and interpreting local and regional development? What are the main policy interventions and instruments? How do localities and regions attempt to effect development in practice? What kinds of

local and regional development should we be pursuing This book addresses the fundamental issues of what kind of local and regional development and for whom frameworks of understanding and instruments and policies It outlines what a holistic progressive and sustainable local and regional development might constitute before reflecting on its limits and political renewal With the growing international importance of local and regional development this book is an essential student purchase illustrated throughout with maps figures and case studies from Asia Europe and Central and North America

Long Waves Or Catastrophes in Regional Development Peter Nijkamp,1982 *Long Waves Or Catastrophes in Regional Development* Peter Nijkamp,1982 *Regional Development and Decentralization Policy in South Korea* Ludwig Schätzl,Karin Wessel,Yong-Woo Lee,1997 This book investigates the interdependent relations between economic development regional development and spatial economic policy in newly industrialized countries using South Korea as a case study The analysis concentrates on three aspects a long term economic restructuring starting with labour intensive production followed by capital intensive and finally human capital and technology intensive production b the effects of the economic transformation process on regional development and c the significance of spatial economic policy for sectoral and regional economic restructuring

Global Challenge and Local Response Walter B. Stöhr,1990 The volume grew out of research undertaken as a part of the UN University s European Perspectives Project It addresses the consequences of the failure of large scale industrial enterprise and the inability of central government policies to cope with the results of economic restructuring in a series of comparative case studies showing how local communities throughout Europe East and West rural and industrial have responded to economic dislocation and decline and how these local initiatives have become the basis for economic regeneration Annotation copyrighted by Book News Inc Portland OR *The Long-Wave Debate* Tibor Vasko,2013-03-09 The proceedings reflect the state of the art of long term fluctuations in economic growth as well as discussing promising areas of research in this field The unique combination of participants from East and West including the People s Republic of China is a guarantee for wide coverage and unusual insights The problems treated range from the identification of long term fluctuations in developing and developed countries in both East and West to their relationship to important economic variables profit prices money supply Particular attention is focused on structural changes and the role of technological development in the light of the long term fluctuation concept It is interesting to follow the treatment of this issue by scientists with different orientations The role of financial and monetary variables is also analyzed by leading researchers in the field

New Firms and Regional Development in Europe David Keeble,Egbert Wever,2016-07-15 When originally published in 1986 this book was one of the first to deal solely with the urban and regional incidence and development implications of new firm formation in particular EU countries It reviews the extent of and reasons for geographical variation in numbers of new firms examines the nature of such firms and assesses the regional impact and policy implications in various EC countries *Long Waves Od Regional Development* Michael Marshall,1987 **Frontiers**

in Regional Development Y. Gradus, Harvey Lithwick, 1996 In fifteen insightful new essays noted scholars in geography economics and public policy provide a comparative examination of the problems and prospects for development in frontier areas Blending theory with case studies the essays challenge the widely held notion that peripheral areas are marginal or backward

America's Johannesburg Bobby M. Wilson, 2019-12-01 In some ways no American city symbolizes the black struggle for civil rights more than Birmingham Alabama During the 1950s and 1960s Birmingham gained national and international attention as a center of activity and unrest during the civil rights movement Racially motivated bombings of the houses of black families who moved into new neighborhoods or who were politically active during this era were so prevalent that Birmingham earned the nickname Bombingham In this critical analysis of why Birmingham became such a national flashpoint Bobby M Wilson argues that Alabama's path to industrialism differed significantly from that of states in the North and Midwest True to its antebellum roots no other industrial city in the United States depended as much on the exploitation of black labor so early in its urban development as Birmingham A persuasive exploration of the links between Alabama's slaveholding order and the subsequent industrialization of the state America's Johannesburg demonstrates that arguments based on classical economics fail to take into account the ways in which racial issues influenced the rise of industrial capitalism

Kondratieff Waves, Warfare and World Security Tessa Lennox, 2006 Considerable progress has been made in understanding the underlying mechanisms driving the long wave behaviour of the world socioeconomic development A controversial mechanism discussed is the close relationship between K waves and the outbreak of major wars
