Luis Barragan Set The Quiet Revolution:

Luis Barragán: the Quiet Revolution Federica Zanco, 2001 Luis Barragan was one of the most extraordinary figures in international architecture between the 1930s and the 1970s His work offers a unique interpretation of international modern architecture from the perspective of the Mexican landscape

Collage and Architecture Jennifer A.E. Shields, 2014-01-03 Collage and Architecture is the first book to cover collage as a tool for design in architecture making it a valuable resource for students and practitioners Author Jennifer Shields uses the artworks and built projects of leading artists and architects such as Le Corbusier Daniel Libeskind and Teddy Cruz to illustrate the diversity of collage techniques The six case study projects from Mexico Argentina Sweden Norway the United States and Spain give you a global perspective of architecture as collage Collage is an important instrument for analysis and design and Shields s presentation of this versatile medium draws on decades of relevance in art and architecture to be adapted and transformed in your own work

Modern Architecture in Mexico City Kathryn E. O'Rourke, 2017-02-10 Mexico City became one of the centers of architectural modernism in the Americas in the first half of the twentieth century Invigorated by insights drawn from the first published histories of Mexican colonial architecture which suggested that Mexico possessed a distinctive architecture and culture beginning in the 1920s a new generation of architects created profoundly visual modern buildings intended to convey Mexico s unique cultural character By midcentury these architects and their students had rewritten the country s architectural history and transformed the capital into a metropolis where new buildings that evoked pre conquest colonial and International Style architecture coexisted Through an exploration of schools a university campus a government ministry a workers park and houses for Diego Rivera and Luis Barragan Kathryn O Rourke offers a new interpretation of modern architecture in the Mexican capital showing close links between design evolving understandings of national architectural history folk art and social reform This book demonstrates why creating a distinctively Mexican architecture captivated architects whose work was formally dissimilar and how that concern became central to the profession

Shaping Terrain Davids, René, 2016-08-10 Shaping Terrain shows how the physical landscape and local ecology have influenced human settlement and built form in Latin America since pre Columbian times Most urban centers and capitals of Latin American countries are situated on or near dramatically varied terrain and this book explores the interplay between built works and their geographies in various cities including Bogot Caracas Mendoza Mexico D F Rio de Janeiro Santiago de Chile and Valpara so The multi national contributors to Shaping Terrain have a broad range of professional experience as urbanists historians and architects and many are globally renowned for their design work They examine how humans negotiate with the existing environment and how the built form expresses that relationship The result is a wide ranging representation of the unique legacy of Latin America s urban heritage which is a repository of possibilities for future cities

to Architectural Drawings and Models Federica Goffi, 2022-05-30 Architectural drawings and models are instruments of imagination communication and historical continuity The role of drawings and models and their ownership placement and authorship in a ubiquitous digital age deserve careful consideration Expanding on the well established discussion of the translation from drawings to buildings this book fills a lacuna in current scholarship questioning the significance of the lives of drawings and models after construction Including emerging well known and world renowned scholars in the fields of architectural history and theory and curatorial practices the thirty five contributions define recent research in four key areas drawing sites sites of knowledge construction drawing office construction site the afterlife of drawings and models archiving collecting displaying and exhibiting tools of making architectural representations and their apparatus over time and the ethical responsibilities of collecting and archiving authorship ownership copyrights and rights to copy The research covers a wide range of geographies and delves into the practices of such architects as Sir John Soane Superstudio Eug ne Emmanuel Viollet le Duc Frank Lloyd Wright Wajiro Kon Germ n Samper Gnecco A PS Mies van der Rohe and Renzo Piano

Model Perspectives: Structure, Architecture and Culture Mark R. Cruvellier, Bjorn N. Sandaker, Luben Dimcheff, 2017-09-25 This book contains a unique collection of various perspectives on the relationship between structures and the forms and spaces of architecture As such it provides students and professionals alike with an essential sourcebook that can be mined for visual inspiration as well as for textually rich and authoritative insight into the links between structure architecture and cultural context The chapters address fundamental structural elements and systems columns walls beams trusses frames tensile structures arches domes and shells Each chapter is subdivided into two parts The essays introduce the chapters with the reprinting of a curated set of essays and excerpts by various authors that uniquely address how particular structural elements or systems relate in essential fashion to architectural design concepts The model studies physical models of the overall structural systems of several notable contemporary buildings from Europe North and South America Africa and Asia are illustrated with large photographs detail close ups and views of their external forms and internal spaces that establish the exceptional qualities of these projects in connecting structural form to architectural design objectives Mosaic layouts complete the chapters with a collection of photographs of yet more models whose particular details and unique features serve to extend the visual repertoire of the structural type being considered The combination juxtaposition and mutual positive reinforcement of these two collections one largely textual and the other image based provides the reader with unique and multifaceted insights into how structural forms and systems can be related to architectural design intentions Conveyed by a strong and deliberate graphical design format this assembly of materials gets to the very essence of structures within the context of architecture and will inspire students and practitioners alike to make strategic design decisions for their own projects

Modern Architecture in Latin America Luis E. Carranza, Fernando Luiz Lara, 2015-01-05 Designed as a survey and focused on key examples and movements arranged chronologically from 1903 to 2003 this is the first

comprehensive history of modern architecture in Latin America in any language Runner up University Co op Robert W Hamilton Book Award 2015 Modern Architecture in Latin America Art Technology and Utopia is an introductory text on the issues polemics and works that represent the complex processes of political economic and cultural modernization in the twentieth century The number and types of projects varied greatly from country to country but as a whole the region produced a significant body of architecture that has never before been presented in a single volume in any language Modern Architecture in Latin America is the first comprehensive history of this important production Designed as a survey and focused on key examples paradigms arranged chronologically from 1903 to 2003 this volume covers a myriad of countries historical social and political conditions and projects developments that range from small houses to urban plans to architectural movements The book is structured so that it can be read in a variety of ways as a historically developed narrative of modern architecture in Latin America as a country specific chronology or as a treatment of traditions centered on issues of art technology or utopia This structure allows readers to see the development of multiple and parallel branches historical strands of architecture and at times their interconnections across countries The authors provide a critical evaluation of the movements presented in relationship to their overall goals and architectural transformations **Barragán Guide** Federica Zanco, Ilaria Valente, 2002 The Barragán Guide presents architect Luis Barragán's constructed works to a larger public providing keys to his creative evolution and his cultural context Following the volume's itinerary through three Mexican cities Guadalajara Mexico City and Monterrey provides not only a chronological survey of Barragán's surviving work but also an interesting experience of three urban realities that constitute the basis of his architectural practice and the context of the work of his followers Born and raised in the provincial town of Guadalajara Barragán performed his first experiments there before moving to the more open and fertile creative environment of the capital where rapidly growing new neighborhoods provided a wealth of opportunities for an ambitious young architect It was on the outskirts of Mexico City that Barragán's vision of a new way of living at once modern and Mexican took shape in the late 1940s in the form of a sophisticated residential development known as Jardines del Pedregal The project won international acclaim and Barragán moved on to create a series of masterpieces his own house the houses built for the Prieto Lopez and Galvez families the monument known as Satellite Towers and the outstanding residential developments of Las Arboledas and Los Clubes are but a few examples of his singular way of dealing with nature and architecture as two key elements of the intimate relation between inside and outside between constructed and non constructed environments Post-Western Histories of Architecture Pilar Maria Guerrieri, Marco Biraghi, 2023-06-23 This book seeks to provide an alternative post Western perspective to the history of contemporary architecture It puts forward detailed critical analyses of various areas of the world including Europe Latin America Africa China Australia India and Japan where particular movements of architecture have developed as active political acts The authors focus on a broad spectrum of countries architectures and architects that have

developed a design approach closely linked to the building context The concept of context is broad and includes various economic social cultural political and natural aspects In all cases the architects selected in this book have chosen to view context as an opportunity However each architect has considered certain specific aspects of context some have been very attentive to the social context others to material aspects or typological issues and still others to aspects related to political visions or economic factors The analysis critically highlights interesting creative and respectful design approaches towards local conditions such as sustainability in Nordic Europe climate conscious design in Africa and the bottom up sensitivity of India The book s main aim is to retrace through both theoretical arguments and case studies the debate that focuses on politics and the environment Thanks to its valuable examples this book strives to make a conscious contribution to establishing a bulwark against the current flattening out processes that architecture is experiencing This book will be of relevance to researchers teachers and students interested in the history of architecture architecture and planning and postcolonial studies
