Critchley, Andrew Eisen, 2012-12-06 The spinal cord is a long structure consisting of white and grey matter that not only serves to provide a neural connection between the brain and the body but also contains neural circuits that are organized segmentally and that are responsive to central and peripheral sensory input. Thus the spinal cord is capable of some behavioural activity that is of clinical significance and that is more evident when higher modulation is disturbed. The released activity of spasticity and the disturbances of bladder and bowel control that occur in patients with spinal cord lesions are examples. The spinal cord is well protected within its bony canal but is nonetheless susceptible to compression by degenerative joint or bone disease or by neoplasm. Spinal cord compression is a common clinical problem that is not always easy to recognize. However it is particularly important because of the good results of appropriate treatment and the unfortunate consequences should the diagnosis be missed. Many other medical and surgical disorders affect the spinal cord including vascular disease, decompression sickness, degenerative disorders and multiple sclerosis. In this book Dr Critchley and Dr Eisen and their collaborators chosen for their expertise and experience in spinal cord disorders have gathered together descriptions of the symptoms and signs of spinal cord disease.

Diseases of the Brain, Head & Neck, Spine
2012-2015 Jürg Hodler, Gustav K. von Schulthess, Christoph L. Zollikofer, 2012-09-02 Written by internationally renowned experts this volume is a collection of chapters dealing with imaging diagnosis and interventional therapies in neuroradiology and diseases of the spine. The different topics are disease oriented and encompass all the relevant imaging modalities including X ray technology, nuclear medicine, ultrasound and magnetic resonance as well as image guided interventional techniques. It represents a unique experience for residents in radiology as well as for experienced radiologists wishing to be updated on the current state of the art.
