Lysosomes in Biology and Pathology J. T. Dingle, 1969 Current Catalog National Library of Medicine (U.S.), 1979 First multi year cumulation covers six years 1965 70 Physiological Responses of Marine Organisms to Environmental Stresses Janet V. Dorigan, Florence Louise Montana Harrison, 1987 An Introduction to Human Biochemistry Charles Alexander Pasternak, 1979 **Journal of Biological Education** , 1979 **Subcellular Biochemistry** Donald B. Roodyn, 2012-12-06

This volume continues the tradition of SUBCELLULAR BIOCHEMISTRY of trying to break down interdisciplinary barriers in the study of cell function and of bringing the reader's attention to less well studied but nevertheless useful biological systems. We start with an extensive article by T P Karpetsky M S Boguski and C C Levy on the structure properties and possible functions of polyadenylic acid. Apart from revealing a general lack of appreciation of many important aspects of the chemical properties of poly adenylic acid the literature also shows that there is a great gulf between those who study the biological role of polyadenylic acid and those who study its physicochemical properties. The article by Karpetsky and his colleagues is an attempt to overcome this lack of communication and to present an integrated view of the subject. The authors go into the subject in full detail and the more biologically inclined reader may on occasion have to reread his nucleic acid physical chemistry notes. However the effort is worthwhile and the article is a timely reminder that we cannot treat nucleic acids as mere abstractions but that they are complex organic macromolecules capable of equally complex but nevertheless important interactions. The next article is by J Steensgaard and N P Hundahl Møller and deals with computer simulation of density gradient centrifugation systems Library of Congress Catalogs Library of Congress, 1980 Controlled Drug Delivery Stephen D.
