 systematic description of how American doctors think about racial differences and how this kind of thinking affects the  
 treatment of their black patients The standard studies of medical racism examine past medical abuses of black people and do  
 not address the racially motivated thinking and behaviors of physicians practicing medicine today Black Blue penetrates the  
 physician s private sphere where racial fantasies and misinformation distort diagnoses and treatments Doctors have always  
 absorbed the racial stereotypes and folkloric beliefs about racial differences that permeate the general population Within the  
 world of medicine this racial folklore has infiltrated all of the medical sub disciplines from cardiology to gynecology to  
 psychiatry Doctors have thus imposed white or black racial identities upon every organ system of the human body along with  
 racial interpretations of black children the black elderly the black athlete black musicality black pain thresholds and other  
 aspects of black minds and bodies The American medical establishment does not readily absorb either historical or current  
 information about medical racism For this reason racial enlightenment will not reach medical schools until the current race  
 aversive curricula include new historical and sociological perspectives      **Medical Record** George Frederick
