M V Frunze Military Theorist:

M.V. Frunze Makhmut Akhmetovich Gareev, United States. Joint Publications Research Service, United States. Foreign Broadcast Information Service, 1985 **The Russian Military Today and Tomorrow** :. ,2010 *A History of Military Thought* Azar Gat, 2001 From the ideas of Clausewitz to contemporary doctrines of containment and cold war this is a definitive history of modern military thought A one volume collection of Azar Gat's acclaimed trilogy it traces the quest for a general theory of war from its origins in the Enlightenment Drastically re evaluating B H Liddell Hart's contribution to strategic theory the author argues that in the wake of the trauma of the First World War and in response to the Axis challenge Liddell Hart developed the doctrine of containment and cold war long before the advent of nuclear weapons He reveals Liddell Hart as a pioneer of the modern western liberal way in warfare which is still with us today **Soviet Ballistic Missile Defense and the Western Alliance** David Scott Yost, 1988 Yost suggests that the challenges for Western policy posed by Soviet ballistic missile defense BMD programs stem partly from Soviet military programs Soviet arms control policies and Soviet public diplomacy campaigns and partly from the West's own intra alliance disagreements and lack of consensus about Western security requirements Russia and Armed Persuasion Stephen J. Cimbala, 2001 In *Russia and Armed Persuasion* Stephen J Cimbala argues that Russia's war planners and political leaders must make painful adjustments in their thinking about the relationship between military art and policy in the twenty first century Russia must master the use of force for persuasion not just destruction As the author shows military persuasion requires that Russian leaders master the politico military complexity of crisis management deterrence and arms control and the limitation of ends and means in war Russia now has scarce resources to devote to defense and can no longer afford the stick only diplomacy and strategy that have characterized some of its recent past Russian and Soviet military thinking historically emphasized the blunderbuss and total war overwhelming mass firepower and conflicts of annihilation or prolonged attrition However historical experience also forced Russia and the Soviet Union to come to grips with crisis management and with limited aims and means in the conduct of war On the one hand Russia failed the test of military persuasion in its management of the July 1914 crisis that plunged Europe into World War I On the other hand the Soviet Union did adjust to the requirements of the nuclear age for crisis management deterrence and limited war Using this mixed record of Russian and Soviet success and failure in twentieth century experience Cimbala argues that Russia can and must improve in the twenty first century According to the author the first decades of this century will pose at least three immediate challenges to Russia's military persuasion Russia must continue to pursue strategic nuclear arms control and arms reductions with the United States and avoid re starting the Cold War by means of an ill considered race in missile defenses Second Russia must maintain a surer grip on the military information revolution especially as it pertains to the management of Russia's nuclear deterrent Third Russia must develop forces that are more flexible in small wars and peace operations its recent experiences in Chechnya show that it has a long

way to go in using economy of force as a military persuader Cimbala's original analysis demonstrates the similar features in apparently dissimilar or even opposite events and processes For example he shows how the problem of military persuasion applies equally to the challenge of managing a nuclear crisis and the problem of low intensity war In each case the dilemma is calibrating the military means to the political ends Controversially the author argues against both military and academic traditionalists contending that the complexity of the force policy relationship in the next century will reward the subtle users of military power and that others will be subject to a Gulliver effect of diminishing returns *The Soviet High Command, 1967-1989* Dale Roy Herspring, 2014-07-14 The recent transformations in the USSR are nowhere more evident than in the Soviet military Top level military officers have been relieved of their positions Gorbachev has warned of lean times for the military the symbolic role of the armed forces has been downgraded and the concept of military sufficiency points to major modifications in Soviet force structure Contrary to some who see Gorbachev as a Sir Galahad out to slay the evil military high command Dale Herspring concludes that the relationship between the highest Soviet political and military leaders is at the moment more symbiotic than conflictual In this first in depth study of the evolution of civil military relations in the Soviet Union from 1967 to the present he shows how the views of senior military officers have varied over time currently even if the members of the high command do not like all Gorbachev's changes they understand the need for them and are prepared to live with them As Herspring looks at the personalities and politics of eight top military figures he reveals that the most important of them Ogarkov was the first senior Soviet military officer to understand the value of working with the political leadership Ogarkov believed that the arms control and détente processes if carefully managed could enhance the national security of the USSR In Gorbachev the Soviet military has found the type of individual that Ogarkov was seeking Originally published in 1990 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *Quarterly Review of Military Literature*, 1987 **Review of Current Military Literature**, 1987 Russia and Postmodern Deterrence Stephen J. Cimbala, Peter Rainow, 2007-02 Russia grapples with the radical post Cold War world order The Evolution of Modern Land Warfare Christopher Bellamy, 2015-10-05 Extensively illustrated with 52 detailed campaign and battle maps and diagrams this book originally published in 1990 surveys the evolution of warfare in Europe from Napoleon to the end of the twentieth century and in Asia from the Middle Ages It considers the interaction of technology and warfare With wide ranging examples the book includes two in depth case studies one on the Soviet Operational Manoeuvre Group and its predecessors in the Russian Imperial Army the other on the history of land warfare including guerilla warfare in Asia In this book the author demonstrates that military

history can be of immense practical help to the modern military analyst and professional Now updated with a new introduction to take into account changes since 1990 this book remains of essential value to students teachers professionals in political social history international relations defence war peace studies From Garrison State to Nation-State John Moran, 2002-09-30 Why has the military not intervened in the post communist political arena since the advent of democracy in Russia Do lowered levels of professionalism actually lead to higher levels of intervention Through a systematic exploration of professionalism within the Russian military this study addresses these important questions Moran suggests that by examining the notion of subjective fragmentation both Gorbachev and Yeltsin utilized a highly effective yet potentially troublesome form of civil military control Findings that overall levels of praetorian behavior on the part of the Russian military have declined in this period in spite of declining levels of military professionalism challenge one of the most basic theoretical assumptions of civil military relations Since 1991 post communist Russia has exhibited all of the classic indicators of a society ripe for a military takeover Not only have institutional interests of the Russian officer corps been gravely threatened but surveys conducted within it have found a general lack of sympathy for democratic values Furthermore Russia's weak civil society is accompanied by high levels of corruption rampant crime secessionist movements a significant terrorist threat and a general disrespect for the rule of law Even further augmenting the chances of a military coup d'etat public opinion polls of civilians have found that the military is one of the most trusted institutions in the country so trusted in fact that many Russian citizens have expressed support for a military takeover Moran explains why the military has not capitalized on these factors **Philosophers of War** Daniel Coetzee, Lee W. Eysturlid, 2013-10-21 This user friendly reference systematically covers the entire intellectual history of strategy and war in all cultures and all times Each culture has had its Machiavelli its Sun Tzu its own Mohammed like or Napoleonic figure This encyclopedia ranges across the world to provide entries on every significant military and strategic thinker in human history as well as a number of military cultures covering Chinese Western Indian Islamic and other cultures Each entry supplies a brief biography a synopsis of the writer's theories their success or failure and their impact on other thinkers and military practitioners The unique coverage allows readers to cross cultural barriers and gain access to sources in languages as diverse as Arabic and German and to note key similarities and contrasts The relative importance and contribution of each individual to intellectual progress is noted as is the greater significance of specific schools of thought and debates **War Scare** Peter Pry, 1999-09-30 Why do some American intelligence officials maintain fallout shelters and private contingency plans to evacuate their families in the event of a Russian nuclear strike even in today's post Cold War era of U S Russian partnership The frightening answer lies within the pages of War Scare a terrifying assessment of the prospect for nuclear holocaust in our day Written by Peter Vincent Pry a former CIA military analyst War Scare provides a history of our country's little known brushes with nuclear war and warns that contrary to popular opinion and the assurances of our political leaders the possibility of a Russian attack still exists

Nuclear deterrence has been the foundation of Western security for the last 50 years but since the end of the Cold War Russian military doctrine has become more destabilizing and much more dangerous than is commonly believed By making use of a wealth of declassified and unclassified material Dr Pry illustrates how Russia's brutal past continues to shape the consciousness and decision making of its leaders many of whom are unreconstructed ideologues from the old Soviet regime Gripped by a perpetual perception of imminent threat a war scare the Russian General Staff which controls the technical capability of launching a nuclear strike has shown itself to be unstable at best The author explores recent history and near disasters such as the Bosnian crisis the Norway missile incident and U S air strikes on Iraq from the perspective of the Russian General Staff believing that only by understanding their viewpoint can we minimize the risk of unintentionally provoking a deadly attack Wary of NATO expansion and reeling from the Russian economy's descent into chaos the General Staff may interpret Western military exercises and operations in the Middle East and elsewhere as concealing surprise aggression against Russia This is a grave situation indeed as even after the START I II and III agreements Russia will retain enough nuclear weapons to destroy the world not to mention significantly expanded chemical and biological warfare capability War Scare convincingly shows that we ignore these facts at our peril

The Greenhill Dictionary of Military Quotations Peter G. Tsouras, 2020-05-18 A massive and valuable collection of quotes about war from soldiers commanders strategists and others The Spectator This volume brings four thousand years of military history to life through the words of more than eight hundred diverse personalities Napoleon Machiavelli Attila Che Guevara Rommel Julius Caesar Wellington Xenophon Crazy Horse Wallenstein T E Lawrence Saladin Zhukov Eisenhower and many more to build a comprehensive picture of war across the ages Broken down into more than 480 categories including courage danger failure leadership luck military intelligence tactics training guerrilla warfare and victory this definitive guide draws on the collected wisdom of those who have experienced war at every level From the brutality and suffering of war to the courage and camaraderie of soldiers to the glory and exhilaration of battle these quotes offer an insight into the turbulent history of warfare and the lives and deeds of great warriors A massive compilation casting light not only upon the pain suffering and sheer insanity of war but also upon the unique comradeship and exhilaration of battle this is a valuable addition to the literature of reference The Spectator

Changing Threat Perceptions and Military Doctrines Laszlo Valki, 1992-06-18 Owing to the revolutionary changes in Eastern Europe and the Soviet Union the threat perceptions of the East and West have vanished The contributors to this volume report this social process and try to identify some of the new threat perceptions which will arise Defense at Low Force Levels, 1991

The Soviet Naval Threat To Europe Bruce W. Watson, Susan M Watson, 2020-01-09 Originally published in 1989 Given the events of 1987 and 1988 the death of Admiral Sergei G Gorshkov who had served as Commander in Chief of the Soviet Navy from 1956 to 1985 and was so influential in the development of the current Soviet Navy the Soviet policy of glasnost the U S Soviet arms negotiations Secretary Mikhail Gorbachev's visit to Washington

President Ronald Reagan's visit to Moscow and the treaty concerning intermediate range nuclear weapons a study of the Soviet naval threat to Europe is particularly timely This study begins by examining Soviet military and naval strategy which provides a view of how the Soviets intend to use their forces Then the book explores Soviet naval capabilities and operations because a full understanding of Soviet naval power provides an understanding of the isolation that Europeans often feel In the fourth and fifth sections of the book we examine the threat to northern and southern Europe

The Russian Military Today and Tomorrow Stephen Blank, Richard Weitz, 2010 Given the stakes involved in achieving a correct understanding of Russian and Chinese defense policies and military developments the magnitude of Mary Fitzgerald's enlightening accomplishments in this regard becomes clear However the problems that we have outlined in this volume were not unfamiliar to students of the Soviet Union Indeed they are enduring strategic issues for Russian policymakers as well as those who analyze or contribute to foreign policies toward the Russian military despite the magnitude of the tremendous changes that have occurred since 1989 when the Soviet empire began to collapse Even more importantly Mary and her colleagues recognized that the issues outlined here are not just tasks relevant for the general study of Russia but by addressing these strategic issues and their underlying implications policymakers will engage in the essential tasks necessary for the creation of an enduring structure of peace

Nuclear Strategy in the Twenty-First Century Stephen J. Cimbala, 2000-05-30 The future of nuclear weapons and nuclear strategy in the 21st century is not entirely predictable from the Cold War past Nor is it easy to foresee on the basis of what has happened since the Soviet Union collapsed in 1991 Cimbala contends that nuclear weapons and the psychology of nuclear deterrence will remain important after 2000 but the character of that importance will change No longer will nuclear weapons be the dominators of military technology Instead advanced technology conventional weapons based on information and electronics will supplant nuclear weapons as the instruments of military supremacy in the 21st century What Cimbala asks can be expected of nuclear weapons in the 21st century given what we have learned from previous experience in the Cold War and in the 1990s Cimbala expects that nuclear weapons will spread among currently non nuclear states and states with regional grievances or hegemonic aspirations will seek to deploy small nuclear forces as deterrents against neighbors or against outside intervention by the United States in regional conflicts Regional rogue states may also obtain nuclear weapons Nonetheless as Cimbala explains the international balance of power is unlikely to change As he makes clear power will be less dependent on deployed military platforms and more dependent on information warfare A thoughtful and provocative analysis that will be of particular interest to policy makers scholars and other researchers involved with arms control security studies and international relations
