faculty researchers and academicians *Sustainable Food Networks: Chains of Values and Food Transitions* Carolina Yacamán-Ochoa, José Luis Sánchez-Hernández, Javier Sanz-Cañada, 2025-06-12 Sustainable Food Networks SFNs are emerging as pivotal value chains for agroecological and food transitions in both urban and rural territories. These networks aim to create a healthy, fair, localized and inclusive food supply model standing in contrast to the dominant corporate food system characterized by long haul, complex and fragile supply chains. Despite their potential, SFNs such as community supported agriculture, farmers markets and urban agriculture have not been thoroughly examined through the lens of economic geography and related interdisciplinary perspectives. The current globalized food system is fraught with economic, social and environmental issues including the marginalization of family farming, environmental degradation and the loss of local knowledge and biodiversity. SFNs offer a critical alternative by emphasizing small batch production, environmental sustainability and social equity, yet there remains a significant gap in understanding their full impact and potential. This research topic aims to collate comprehensive research on Sustainable Food Networks (SFNs) with specific objectives: identifying various SFN initiatives across different territories; evaluating their spatial dimensions in global contexts and assessing policies that can enhance the social, economic and environmental sustainability of food value chains. Key questions include: how alternative values are propagated within SFNs; the critical spatial nodes for these values; the role of urban and peri-urban agriculture; and the interplay between territorial conditions and SFN performance. Additionally, the research seeks to understand how SFNs compete with hegemonic value chains and the potential role of public policy in strengthening these networks. To gather further insights into the complexities and potentials of SFNs, we welcome articles addressing but not limited to the following themes: The propagation and transfer of alternative values within SFNs; Identification of critical spatial nodes for the reproduction of these values; Roles of urban and peri-urban agriculture in SFNs; Relationships between territorial conditions, governance and SFN performance; Strategies employed by SFNs to tackle competition from corporate value chains; The impact of SFNs on the surge of local organic and healthy food outlets; The role of public policy in supporting and strengthening SFNs.

Critical Perspectives on the

Management and Organization of Emergency Services Paresh Wankhade, Leo McCann, Peter Murphy, 2019-05-16 Critical Perspectives on the Management and Organization of Emergency Services makes an important contribution to the subject of emergency services management and to public administration and organization studies more generally. It critically assesses developments in emergency services management by examining the multi-dimensional nature of the provision of emergency services and their connectedness in advanced western democracies. The effective management of emergency services has never been more important than in today's high pressured and cost-conscious public sector. The authors of this volume forensically analyse the challenges of delivering emergency services within this context. This book provides an in-depth scholarly and comprehensive analysis of the changing landscape of emergency service provision and clearly addresses a gap in the market for a critical volume on the emergency services. For anyone seeking to understand why and how the management of emergency services matters, this collection is essential reading. *РЕМАРКЕТИНГ НА РЕАЛНОСТТА*, 2023-01-01 25 17 2022 Structure, Meaning and Ritual in the Narratives of the Southern San Roger Hewitt, 2008-08-01 Analyses texts drawn from the Bleek and Lloyd Archive arguably one of the most important collections for the understanding of South African cultural heritage and in particular the traditions of the Xam South Africa's first people. Initially appearing in a now rare 1986 edition and here re-issued for the first time, the doctoral thesis on which the book is based became the catalyst for much scholarly research. The book offers an analysis of the entire corpus of Xam narratives found in the Bleek and Lloyd collection, focusing particularly on the cycle of narratives concerning the trickster Kaggen Mantis. These are examined on three levels: from the deep structures with resonances in other areas of Xam culture and supernatural belief, through the recurring patterns of narrative composition apparent across the cycle, and finally touching on the observable differences in the performances by the various Xam collaborators. Hewitt's text remains the only comprehensive and detailed study of Xam narrative, and it has become itself the object of study by researchers and PhD candidates in South Africa, the United Kingdom, Canada, and elsewhere. This new edition at last makes Hewitt's important work more widely available. It will be a welcome addition to the recently burgeoning literature on the place of the Xam hunter-gatherers in the complex history of South African culture and society. **Sustainable Entrepreneurship and Entrepreneurial Ecosystems** Eddy Laveren, Robert Blackburn, Cyrine Ben-Hafaïedh, Cristina Díaz-García, Ángela González Moreno, 2020-09-25 Sustainable entrepreneurship and entrepreneurial ecosystems research is ever evolving, and this timely book stimulates further exploration, offering a research agenda and alternative approaches. Presenting new scientific evidence together with policy and other practical implications, chapters demonstrate the vibrancy and diversity of approaches in the field.
