interactive breakout sessions in which experts in early childhood development examined the four organizing themes of the original report and identified both measurable progress and remaining challenges The second day of the workshop speakers chosen for their diverse perspectives on early childhood research and policy issues discussed how to build on the accomplishments of the past decade and to launch the next era in early childhood science policy and practice From Neurons to Neighborhoods An Update Workshop Summary emphasizes that there is a single integrated science of early childhood development despite the extent to which it is carved up and divided among a diversity of professional disciplines policy sectors and service delivery systems While much work still remains to be done to reach this goal the 2010 workshop demonstrated both the promise of this integrated science and the rich diversity of contributions to that science **Feet**
