Inventaris del desenvolupament d'habilitats comunicatives

MacArthur-Bates en català Elisabet Serrat Sellabona, Eva Aguilar-Mediavilla, Mònica Sanz-Torrent, Llorenç Andreu Barrachina, Anna Amadó Codony, Iris Badia Llenas, Miquel Serra i Raventós, 2022-02-09 En aquest manual presentem una eina d'avaluació i utilitat per als professionals del desenvolupament infantil. Els inventaris del desenvolupament comunicatiu i lingüístic MacArthur-Bates a partir de les observacions de les mares i els pares descriuen situacions i permeten seguir l'adquisició de les competències comunicatives i lingüístiques dels infants entre els 8 i 18 mesos (CDI I) i els 16 i 30 mesos (CDI II). El CDI I inclou les primeres mostres de comprensió del llenguatge (la comprensió i l'expressió de les primeres paraules en català), els gestos comunicatius que els infants produeixen i les accions simbòliques en què participen. El CDI II inclou la producció d'un inventari ampli de paraules en català, les habilitats morfològiques així com la complexitat gramatical dels enunciats infantils.

MacArthur-Bates Inventario del Desarrollo de Habilidades Comunicativas Larry Fenson, Philip S. Dale, J. Steven Reznick, Elizabeth Bates, Donna J. Thal, Donna Jackson, Jeffrey P. Hartung, Steve Pethick, Emeritus Professor of Psychology, Judy S. Reilly, Virginia A. Marchman, Tyler Newton, Barbara Conboy, 2003-08-19 With the Inventarios the Spanish adaptation of the MacArthur Communicative Development Inventories (CDIs) professionals can tap into parents' invaluable day-to-day knowledge about their children's language and communication skills and respond to legislation that requires parental input in child evaluations. Top language researchers developed these standardized parent-completed report forms to assess language and communication skills in young children ages 8-30 months. They've designed the forms to focus on current behaviors and salient emergent behaviors that parents can recognize and track. The Inventarios have three components: Inventario I: Primeras Palabras y Gestos. This words and gestures form is for use with children ages 8-18 months. The first part of the form prompts parents to document the child's understanding of hundreds of early vocabulary items separated into semantic categories such as animal names, sound effects, and question words. Parents mark the words understood or used, and the form yields separate indexes of words understood and words produced. The second part of the form asks parents to record the communicative and symbolic gestures the child has tried or completed. This form generally takes 20-40 minutes to complete and 20-30 minutes to score by hand. Inventario II: Palabras y Enunciados. This words and sentences form is for use with children ages 16-30 months. In the first part of the form, parents document the child's production and use of hundreds of words divided into semantic categories similar to the ones on Inventario I. The second part analyzes the child's early forms of grammar and the complexity of the child's multi-word utterances. Parents identify the words the child has understood or used and provide written examples of the child's three longest utterances. This form generally takes 20-40 minutes to complete and 20-30 minutes to score by hand. It is also desktop-scannable with the appropriate software. User's Guide and Technical Manual. The manual for the Inventarios is written in English and provides detailed instructions for administering, scoring, and interpreting the forms, various uses of the inventories for clinical and research purposes, background information on the development of the forms, technical reports on reliability and validity, and tables and graphs of norming data. Numerous

studies document the reliability and validity clinical utility and research potential of the CDIs and Inventarios The CDIs were normed on approximately 1 800 children in three locations and the Inventarios were normed on more than 2 000 children The CDI and Inventario forms were developed separately to reflect the vocabulary and grammatical structure of each language Learn more about the Inventarios and the CDIs **Cuerpo de Maestros. cada tema ya que esto dispersa enormemente la atención. Confiamos en que este libro le sirva al opositor para conseguir el objetivo propuesto que es también el nuestro: lograr una preparación de calidad que le permita superar la oposición. Los autores Helping Individuals with Disabilities and Their Families Todd V. Fletcher, Candace S. Bos, 1999. The collection emphasizes three themes: the important role of cultural and linguistic diversity in the education of students; the need for continued development of policy and practices that support children with disabilities and their families; and the importance of collaboration in solving the issues and meeting the challenges within and across the two countries. BOOK JACKET

Approaches to Language: Data, Theory, and Explanation Ángel J. Gallego, Aritz Irurtzun, 2020-12-24. The study of language has changed substantially in the last decades. In particular, the development of new technologies has allowed the emergence of new experimental techniques which complement more traditional approaches to data in linguistics like informal reports of native speakers' judgments, surveys, corpus studies or fieldwork. This move is an enriching feature of contemporary linguistics, allowing for a better understanding of a phenomenon as complex as natural language where all sorts of factors internal and external to the individual interact (Chomsky 2005). This has generated some sort of divergence not only in research approaches but also in the phenomena studied, with an increasing specialization between subfields and accounts. At the same time, it has also led to subfield isolation and methodological *a priori* with some researchers even claiming that theoretical linguistics has little to offer to cognitive science (see for instance Edelman, Phillips, den Dikken, Bernstein, Tortora, Sprouse, Schütze, Phillips 2013). **Housing, health, and happiness** Rocio Titunuk, 2007. Despite the importance of housing for people's well-being, there has been little work done to assess the causal impact of housing and housing improvement programs on health and welfare. In this paper, the authors help fill this gap by investigating the impact of a large-scale effort by the Mexican government to replace dirt floors with cement floors on child health and adult happiness. They find that replacing dirt floors with cement floors significantly reduces parasitic infestations in young children, reduces diarrhea, reduces anemia and improves cognitive development. Finally, they also find that this program leaves adults substantially better off as measured by satisfaction with their housing and quality of life and by their significantly lower rates of depression and perceived stress.
