**H.G. Wells's The Time Machine** John R. Hammond, 2004-10-30. The *Time Machine* is one of the most important works of science fiction. It greatly influenced the genre and continues to be widely read at all levels. This reference guide overviews the novel for students and general readers. Written by a leading scholar on H.G. Wells, the volume covers all aspects of the work, including its plot, textual history, historical and intellectual contexts, themes, style, and reception. Written more than 100 years ago, H.G. Wells' first novel forever shaped the course of science fiction. Of all his vast writings, *The Time Machine* seems most likely to ensure his permanent place in literary history. But more than a literary work, it is now widely recognized as a key text in the history of ideas for the notion of time travel has profoundly influenced human thought. So too with its bleak view of the future, *The Time Machine* has made a seminal contribution to the ongoing debate concerning the future course of evolution. Though *The Time Machine* is widely read and studied, there is relatively little written about it. Prepared by a leading authority on H.G. Wells, this reference is a convenient introductory guide to the novel. It examines all aspects of the work, including its textual history, historical and intellectual contexts, themes, literary style, and critical reception. The volume also includes a detailed plot summary and an extensive bibliographic essay.

**The Plot Machine** Kai Mikkonen, 2021-11-01 This book presents a new and exciting theory of the modern French novel by developing the notion of the narrative as a textual machine Many turn of the century French novels thematically identified their means of narration through the various machines that they depicted The narrative devices that were particularly important in this self reflection included the temporal order of the plot the question of a narrative s beginning and end the hierarchy of narrative voices and the techniques of the point of view The question of mechanization became central on all these fronts Has the novel become automated or machine like At the same time the machine metaphors in the novels of Alfred Jarry Emile Zola Jules Verne Villiers de l Isle Adam Raymond Roussel combined the question of the narrative form with new ways to think about man s relationship with technology and the cultural environment The early modernist texts drew upon contradictory notions of technological promise and threat while they also depicted new forms of identity and behavior related to or modeled after machines These texts highlighted cultural assumptions concerning technological innovations and critiqued mainly through parody and through various figures of man machine fusion the positivistic belief in progress Such writers looked for evidence of advanced forms of consciousness arising out of encounters with new technology such as telephones trains bicycles telegraphy phonographs and electricity This volume will be of interest to anyone working in the field of modern French literary and cultural history It will especially appeal to anyone intrigued with the origins of the modernist novel the history of narrative forms and the question of how the experience of new technology may be portrayed in literary texts
