The Architectural Models of Theodore Conrad Teresa Fankhänel, 2021-06-17 Based on the recent discovery of his fully preserved private archive models photos letters business files and drawings this book tells the story of Theodore Conrad 1910 1994 the most prominent and prolific architectural model maker of the 20th century Conrad s innovative models were instrumental in the design and realization of many icons of American Modernism from the Rockefeller Center to Lever House and the Seagram Building He revolutionized the production of architectural models and became a model making entrepreneur in his own right Yet despite his success and the well known buildings he helped to create until now little has been known about Conrad s work and his impact on 20th century architectural history With exclusive access to Conrad s archive as well as that of model photographer Louis Checkman both of which have lain undiscovered in private storage for decades this book examines Conrad s work and legacy accompanied by case studies of his major commissions and full color photographs of his works Set against the backdrop of the surge in model making in the 1950s and 1960s which Jane Jacobs called The Miniature Boom it explores how Conrad s models prompt broader scholarly questions about the nature of authorship in architecture the importance of craftsmanship and about the translation of architectural ideas between different media The book ultimately presents an alternative history of American modern architecture highlighting the often overlooked influence of architectural models and their makers

Make-it-yourself architectural models R. Forman, 1946 Cardboard model making

Dr. Ulrich Böhme, Cardboard model making is probably one of the first types of model making for which kits or building sheets were offered in series. For the first time many people were able to build models of real or fictitious buildings and vehicles. It is interesting to note that cardboard model making even though nowadays there is an almost unlimited variety of materials available for model making is experiencing a great renaissance and an active community of cardboard model makers has developed. Nowadays there is almost nothing that is not available as cardboard model building sheets whether from professional publishers or from idealistic suppliers. In this book Ulrich Böhme looks at cardboard modelling from two perspectives. On the one hand he describes the history of this form of model making in all its facets. On the other hand he gives practical tips based on examples from the most diverse areas of cardboard model making. He shows how to create a simple model and how to improve it. He creates entire dioramas and restores aging historical models. In short, in this book he takes you into the fascinating world of cardboard model making. From the content: Models are contemporary witnesses Paper as a working material Early cut out and model sheets Publishing houses Which scale is the right one for me Working with paper Tools Adhesives Rounding Architectural models Aircraft Land vehicles Ships Special models Self build models Building an old shipyard hall Dioramas Restoration and storage
