In a relative sense compared to the several thousand years of evolution in ground and sea warfare air power developed very rapidly When Benny Foulois retired from his post as Chief of the Air Corps at the close of 1935 the B 17 Flying Fortress of World War II fame had completed its test flights and in January 1936 a contract for the first 13 Fortresses was signed by the Army General Foulois died in 1967 just 6 decades after the Army s Aeronautical Division was formed At the time of his death the United States Air Force which he had helped to create was equipped with supersonic fighters bombers with a range of 8 000 miles or more intercontinental ballistic missiles and thermonuclear weapons But an air force is more than an agglomeration of aircraft bombs and bullets It needs several other elements a clear understanding of its purpose or mission a body of ideas concepts and doctrine governing in broad terms how it will carry out its mission strategy and tactics for the efficient use of its equipment a system for supplying its material and human needs a research and development organization to keep ahead of potential enemies experienced leaders and sound organization to coordinate and direct its activities These elements were lacking when the Army s only aviation unit first took to the field on March 15 1916 commanded by Capt Benny Foulois The 1st Aero Squadron was ordered to help Brig Gen John J Pershing scout out the bandit Pancho Villa and bring him back from Mexico dead or alive The squadron s unarmed underpowered Curtiss JN 2 biplanes could not make it over the mountains or cope with the strong winds of northern Mexico By April 20 only two of its eight planes were in commission

power in 1972 Dr Thompson began to learn about his subject when he was an Army draftee assigned to an Air Force intelligence station in Taiwan during the Vietnam War He took time out from writing *To Hanoi and Back* to serve in the Checkmate group that helped plan the Operation Desert Storm air campaign against Iraq Later he visited Air Force pilots and commanders in Italy immediately after the Operation Deliberate Force air strikes in Bosnia During Operation Allied Force over Serbia and its Kosovo province he returned to Checkmate Consequently he is keenly aware of how much the Air Force has changed in some respects how little in others Although he pays ample attention to context his book is about the Air Force He has written a well informed account that is both lively and thoughtful

Collateral Damage And The United States Air Force Major Patrick M. Shaw, 2014-08-15

Minimization of collateral damage is an objective of the United States Air Force USAF whenever it conducts hostile operations While the USAF has often expressed concern about causing collateral damage its actions have not always reflected a consistent level of commitment This essay explores the evolution of USAF concerns about collateral damage and examines the causes and effects of this unfortunate by product of airpower It concludes that the concerns harbored about causing collateral damage reduce the military effectiveness of airpower This loss of effectiveness is not always important For example when a resource rich coalition conducts an air campaign against an inferior adversary that coalition can discriminate in its application of airpower by allocating great effort to the avoidance of collateral damage In a different context such asymmetry may not exist Commanders then might have to focus on achieving objectives while paying little attention to the possibility of collateral damage In either case collateral damage will likely occur varying only in degree The USAF can take actions which will help alleviate some of the causes of collateral damage Improvements in the areas of planning and technology provide certain relief but ultimately political and military leaders must accept that collateral damage is an inevitable part of airpower
